HOMES IN ATHENS

As a Rule They Are Clean, but Bare and Comfortless.

PEOPLE LIVE IN THE CAFES.

When They Do Get Into Their Houses Their Principal Occupation Is Looking Out of the Windows—The Marriage Customs of Greece.

Home life in Greece, particularly in Athens, is peculiar. It might almost be said that there is no such thing. In Mr. Duckett Ferriman's book on "Greece and the Greeks" the manners and customs of the picturesque Hellenes, which are little known to the average English reader, are described at length. Mr. Ferriman states that the Greeks do not know anything about the art of making a home.

"One may meet with exquisite cleanliness," he writes, "with beautifully embroidered bed linen scented with rosemary, but never with what we mean by coziness. The Greeks are far less in their houses than we are, and when they are at home they appear to spend most of their time in looking out of the window. They are not given to inviting their friends to their houses. It is not that they are niggardly, for they will gladly entertain you at a restaurant at far greater cost to themselves. But it does not enter into their ideas to ask you home to dinner, even after an acquaintance of many years.

"They do not ask each other, so it can hardly be expected that they should make an exception in the case of foreigners. The cafe is a second home to them. There they meet friends and gossip. That is one reason perhaps why they dislike country life.

"It offers no alternative to the home: there the hearth is the social center, while in town it is the cafe. In Athens those who do not own the house they dwell in seldom remain long in the same abode. Two or three years is quite a long tenure. Many people make a point of moving every year.

"The imposing facades of Athenian houses conceal, for the most part, a bare and comfortless interior, and a well kept garden is rare. A garden is not made in a year, and a person who changes his residence every twelve months does not want to be troubled with much furniture, nor is he particular as to its arrangement, seeing that it will be carted away in a few months.

"Home life has no resources for the Greeks, as it has for us. It affords them little occupation and no amusement. They like to eat and drink in crowds, where there is noise and movement. Their instincts are too gregarious to allow them to appreciate the domestic intimacy which we prize.

"The day chosen for marriage in Greece is usually Sunday, but the day of all days in the year is the Sunday preceding the Christmas feast. It is not fashionable now to be married in church. In Athens the ceremony takes

TOWN COUNCIL.

Council Chamber,
March 20th, 1911.

Council met in regular session on Monday evening, Mayor A. S. Kimmerly in the chair.

Present—Reeve Alexander and Councillors Meng, Stevens, Waller, Denison, Steacy and Dickinson.

The minutes of the last regular session were read and confirmed.

Dr. Boice, of Kingston, was present and addressed the council, appealing for a liberal donation towards the sustenance of the Kingston General Hospital. Owing to the large number of patients applying for admission to this institution, it was found that it would be necessary to build an addition to the hospital, if the ever increasing number of applicants were to be accommodated. The cost of this addition would be about \$20,000. Last year the hospital had been to its full capacity in taking care of the patients, and at that time it was thought the limit had been reached, but so far this year the number of patients treated has exceeded the same period of last year by about one hundred, and from this it could readily be seen the necessity for assistance if this worthy institution was to be placed in a position where it could continue its charitable and benevolent work. With the helpful assistance of the different municipalities in this county last year the management of the hospital had been able to break about even financially, but this year, with the extra financial burden of building the new wing to the institution, and the ever increasing number of patients, it could readily be seen that liberal assistance was one of the immediate necessities. The doors of the hospital were always open to the people of Napanee who were unfortunate in being sick and afflicted, and many from this town had availed themselves of the privilege of this grand and glorious institution, whose sole aim was rendering assistance to afflicted humanity. Dr. Boice expressed himself as being perfectly satisfied in leaving the question of the amount of the donation in the hands of the council, as he felt the members of the council thoroughly understood the situation and would contribute with what liberality the finances of the town would admit.

Coun. Stevens informed the council that Wm. Hall, blacksmith, had asked that the amount of his business tax be remitted. It was generally known by all that owing to the construction of the Dundas street sewer last fall, admission to Mr. Hall's place of business had been impossible, and the remission of the tax asked for was by no means unreasonable.

The matter was referred to the Court of Revision as the council has no power to deal with it.

A petition signed by Wm. Conger and a large number of ratepayers was presented to the council asking that an electric lamp be placed on Vine's corner, at Salem.

Referred to the Fire, Water and Light Committee to report.

Coun. Waller informed the council that a number of residents, living south of the swing bridge have asked him to bring to the attention of the council the necessity of putting wire netting on both sides of the approaches to the swing bridge. Children when crossing the bridge often stopped and put their heads through the openings in the bridge and it was feared that some day a fatality might occur by some of the children losing their balance and falling into the water.

Moved by Coun. seconded by Coun.

SYMINGTON'S.

YARKER.

A runaway team came into the village and was stopped and taken back, when it was learned that two young men, helplessly drunk, were found on the roadside and they did not seem to know whether their horses had run away or not.

Yarker adult Bible class will meet at the parsonage, next Tuesday evening, for a social time.

Charles Freeman bought the late J. Ewart's stock and will continue the business.

Service is being held each night this week in St. Anthony's church, Yarker. A fine monument has been erected to the memory of the late E. W. Benjamin and his wife.

Cyrus Edgar and a gang of men are moving the buildings of J. C. Connolly, and will have them in place this week.

Eggs are dropping in price and are now within the reach of all. Many in the country villages who in previous years never had an egg to sell, are now wending their way to the country store with their basket of eggs.

Mrs. T. Bradford, of Petworth, is at her daughter's Mrs. Edward Joyner.

Farmers wanting coal can get it at the Rathbun yard.

F. E. VanLuvan.

They like to eat and drink in crowds, where there is noise and movement. Their instincts are too gregarious to allow them to appreciate the domestic intimacy which we prize.

"The day chosen for marriage in Greece is usually Sunday, but the day of all days in the year is the Sunday preceding the Christmas feast. It is not fashionable now to be married in church. In Athens the ceremony takes place in the house of the bride's parents. A temporary altar is set up in the middle of the room.

"At the conclusion of the ceremony the priest and the couple join hands and walk three times round the altar, the guests pelting them with comfits. The most important part of the ceremony is the crowning of the bride and bridegroom with wreaths of orange blossom; hence a wedding is popularly called 'the crowning.'

"Love marriages are rare exceptions. The match is made by the parents and relatives rather than by the parties principally concerned. There are certain established usages which, though not legally binding, are not to be contravened with impunity.

"Then it is considered wrong for brothers to marry until their sisters have been wed. Again, girls must marry in order of seniority. It would not be right for a girl to be married while she had an elder sister who remained single. The men of a family are thus naturally anxious to see their sisters settled, and as a dowry is indispensable its provision is often a matter of serious anxiety and the fruit of great self denial on the part of the brothers if the parents are dead.

"There are cases in which brothers have remained unmarried for years and have devoted all their hard earned savings to the dowries of their sisters. Among the poorer classes emigration is resorted to, not infrequently solely with this object, and many a dowry comes to a Greek maiden from across the Atlantic."

What Was Lacking.

The Hobo—Please, mum, I'm a sick man. De doctor gimme dis medicine, but I needs assistance in takin' it. The Lady—Poor fellow! Do you want a spoon and a glass of water? The Hobo—No, mum; I wouldn't trouble yer. But dis medicine has to be took before meals. Have yer got a meal handy?—Cleveland Leader.

Fame.

Fame is easily acquired. All you have to do is to be in the right place at the right time and do the right thing in the right way—and then advertise it properly.—Puck.

Ennui.

Tommy—Pop, what is ennui? Tommy's Pop—Ennui, my son, is a disease that attacks the people who are so lazy that they get tired of resting.—Philadelphia Record.

Death expecteth thee everywhere; be wise, therefore, and expect death everywhere.—Quarles.

Rubbers.

At the cheapest prices. None of these are seconds.

ROYAL SHOE STORE,

How to get a 50 cent Psychine free.

Write to T. A. Slocum, Limited, Toronto, asking for coupon and mention T. B. Wallace, Napanee, as your druggist.

For painting white inside.

Be sure to get the marine or steam boat white at Wallace's Drug Store. It does not turn yellow and is as white as a lily. Sold in Napanee only at Wallace's in sizes 20 cents and upwards.

south of the swing bridge have asked him to bring to the attention of the council the necessity of putting wire netting on both sides of the approaches to the swing bridge. Children when crossing the bridge often stopped and put their heads through the openings in the bridge and it was feared that some day a fatality might occur by some of the children loosing their balance and falling into the water.

Moved by Coun, seconded by Coun. Steacy, that the Streets Committee have power to place the required netting on the swing bridge. Carried.

Moved by Councillors Waller and Stevens that the sum of \$100 be granted the Kingston General Hospital. Carried.

A list of the parties owing the town for cement walks, etc., was referred to the Streets Committee to consult with the solicitor in reference thereto.

Dr. Simpson addressed the council on behalf of The Local Chapter of the Daughters of The Empire. The substance of his remarks was that the Daughters of The Empire were willing to take possession of the Wright property in accordance with the agreement presented to them recently. Evidently there had been some misunderstanding, but it looked as though a mutual understanding might be arrived at.

On motion of Councillor's Dickinson and Waller the matter was referred back to the Town Property Committee to meet the members of the Local Chapter of The Daughters of The Empire and report at next session of council.

ACCOUNTS.

The following accounts were ordered paid:

Albert Smith	\$ 8 30
Frank Bowen	1 50
Police Magistrate	4 90

Council adjourned.

Children Cry FOR FLETCHER'S CASTORIA

MURVALE.

Thomas Botting, Godfrey, has moved in Maxwell Purdy's home.

Mrs. William Wallace attended the funeral of her sister, Mrs. Graham, at Verona, on Monday.

A number have tapped trees, but report a poor run so far.

Mies Edyth Shillington is visiting friends at Westport.

Henry Swerbrick narrowly escaped having his fine residence destroyed by fire on Wednesday morning, but by hard work, it was extinguished before much damage was done.

Visitors: Miss M. Emberly, Colebrook; S. Freeman, Yarker and Chas. Fraser and family, Elginburg. at A. Cowdy's; William Irwin, Elginburg, at Maxwell Purdy's.

Horses, Horses.

The best thing to put your horses in good condition for the spring's work is Milling's Improved Compound Iron Powders, sold in 2 lb. packages for 25 cents, freshly prepared, at The Medical Hall—Napanee's Largest Drug Store—Fred L. Hooper.

MARLBANK.

John Winter is moving in Mrs. Walsh's house, on Derry Hill.

R. Perry is fitting up his new store. Mr. and Mrs. McCutcheon entertained a few friends on Friday evening last.

Mr. Colden made a business trip to the village recently.

The station agent is laid up with erysipelas.

Visitors: Mrs. Folen, at Mrs. Thompson's; Mr. and Mrs. W. Allan, at T. Hughes'; Mrs. R. Thompson, at G. Hughes'; Abe Whiteman, at W. M. Adams.

David Whiteman and family have moved near the village.

The people are pleased to hear of Mrs. Thompson's recovery from a serious illness.

Three weddings are scheduled to take place shortly.

select your Easter
Suit.

We're ready to serve the man who
desires Expert Tailoring.

We employ the talent and good
judgment that it requires to produce
it.

We have the largest assortment of
Men's Suitings ever shown in Napanee.
It will pay you to look at our
handsome Spring Woollens.

Let us know what you want and
we will show you how well we can
grasp your ideas, and how faithfully
we can execute them.

There is no tailoring disappoint-
ments in store for the man who
comes here for his work.

**Good Suits \$15 to \$18.
Better Suits \$20 to \$25**

If you have never had a Suit made
at our store we are both losers.

J. L. BOYES,

CENTREVILLE.

Cutting next season's wood seems
now to be the order of the day.

Some farmers have tapped their
bushes but have not made much syrup
yet.

There is a great depth of snow in
the woods for this time of season and
unless we get warm weather soon the
spring will be a late one.

Quite an amount of cream will be
shipped to Toronto from this part this
season.

Geo. McFarlane and Wm. J. McGill,
carpenters, have begun operations.
They have started hewing timber.

John Lyons has gone to Coldwater
to spend the summer.

Those who have been suffering with
la grippe during the past winter are
nearly all convalescent.

Wesley McGill has engaged the ser-
vices of Wesley Kelly for the coming
season.

Percy Thompson spent Sunday even-
ing in the village.

Rumor says a wedding soon.

Joseph Barrett and bride have re-
turned from an extended honeymoon
and taken up residence on his farm
here.

For Spring Calves.

Nothing better than the Pure Flax-
seed Meal, containing all the oil and
nutritious properties of the seed. You
get it at Hooper's - Napanee's Largest
Drug Store.

In the estate of William Saul, deceased

Notice is hereby given pursuant to Chapter
123, of the Revised Statutes of Ontario, section
38, and amending acts, that all persons having
any claims or demands against the estate of
Wm. Saul, late of the Township of Camden, in
the County of Lennox and Addington, retired
farmer, deceased, who died on or about
the 5th day of February, A. D. 1911, are requir-
ed to deliver or send by post, prepaid to John
English, Esq., Napanee, Ontario, solicitor for
the executors of the last will and testament
of the said William Saul, deceased, on or before
the 15th day of April, A. D. 1911, their christian
and sundry names, addresses and descriptions, with
full particulars of their claims or demands
fully verified, and the nature of the security
of any bond held by them.

And further take notice that after the said
15th day of April, A. D. 1911, the said executors
will proceed to distribute the assets of the said
estate amongst the parties entitled thereto
having regard only to the claims or demands
of which they shall then have received notice,
and will not be responsible for the said assets
or any part thereof to any person or persons of
whose claims or demands they have not received
notice at the time of the distribution thereof.

JOHN ENGLISH, ESQ.,
Solicitor for the said executors.

STRATHCONA.

The paper mill is to resume operations after being shut down for some time for want of water.

Mrs. Ed Rook has returned home from Utica, N. Y., where she was called to the bedside of her mother, who was very ill.

Jas. Ballantyne left on Monday for Merriton, where he has secured a situation. Sorry to lose him as he was a good citizen.

The farmers are tapping their sugar bushes but the run of sap has been light.

Mr. Kilpat, of Tamworth, spent Sunday the guest of his cousins, Mr. and Mrs. E. Hanes.

Thos. Lewis, of Switzerville, has moved on the farm vacated by Wm. Schermehorn.

J. W. Walker, of Switzerville, spent Sunday in our village. What is the attraction John?

Mrs. Wm. Sutton is recovering after her recent severe illness. Her many friends will be glad to see her around again.

The many friends of John Pybus are sorry to hear of his intention to leave for British Columbia early in April.

John Beck has gone to Merriton, where he has a lucrative situation.

Wm. Cooper has returned from Toronto where he went on business.

R. L. Lott attended a meeting of the Library Institute at Picton on Tuesday and Wednesday last.

F. Hughes has moved into the house where John Asselstine formerly resided.

Mrs. R. L. Lott was called to Binghampton, N. Y., to attend the funeral of her mother, the late Mrs. Baker. She has the sympathy of her many friends in her bereavement.

James Grange has moved into the house formerly occupied by Frank Hanes.

Mr. and Mrs. Harry Scott have returned to Napanee after spending some time with Mrs. Scott's parents, Mr. and Mrs. George Dunlop.

George Finlay has returned home after spending a week visiting friends in Baltimore and Canton.

Mrs. James Meagher is spending a week visiting her parents, Mr. and Mrs. Jas. McGuire.

Mr. and Mrs. W. A. Lasher, of Morven, were visiting friends here the past week.

Liquid Vener.

Will brighten up your own furniture, and remove scratches. Use it on your piano, table, bed, anything that needs to be brightened. Two size bottles at

BOYLE & SONS.

The spring delivery of the Deering Farm Implements for this section took place on Tuesday, of this week. Nearly two car loads of machinery, consisting of binders, mowers, rakes, cultivators, cream separators, gasoline engines etc., amounting to about \$9000 were delivered to twenty-two rigs. Mr. Fitzpatrick, the local agent, and a general agent entertained the farmers to dinner on the occasion and also had the line of rigs photographed.

House cleaning, papering, painting etc. We sell everything but the paper at Wallace's Drug Store, and anyway

Wallage's of muresco is more sanitary than paper. Ask for color cards at our store. Muresco makes a nice finish, you can stop any place and start next day if you like and it will not show the lap. Price 45c a large package at Wallace's.

will proceed to distribute the assets of the said estate amongst the parties entitled thereto having regard only to the claims or demands of which they shall then have received notice, and will not be responsible for the said assets or any part thereof to any person or persons of whose claims or demands they have not received notice at the time of the distribution thereof.

JOHN ENGLISH, ESQ.,

Solicitor for the said executors.

Dated the 15th day of March, 1911. 15-d

EXECUTOR'S NOTICE TO CREDITORS.

In the Estate of Anne Decker, deceased.

Notice is hereby given pursuant to Chapter 129, of the Revised Statutes of Ontario, Section 35, and Amending Acts, that all persons having any claims or demands against the estate of Anne Decker, late of the Village of Odessa, in the County of Lennox and Addington, widow, deceased, who died on or about the 30th day of November, A. D. 1907, are required to deliver or send by post prepaid to J. L. Whiting, Esq., K. C., Kingston, Ontario, solicitor for Beatrice R. Mayboc, executrix of the last will and testament of the said Anne Decker, deceased, on or before the 15th DAY OF APRIL, A. D. 1911, their christian and surnames, addresses and descriptions, with full particulars for their claims or demands duly verified, and the nature of the security (if any) held by them.

And further take notice that after the said 15th day of April, A. D. 1911, the said Executrix will proceed to distribute the assets of the said estate amongst the parties entitled thereto, having regard only to the claims or demands of which they shall then have received notice, and will not be responsible for the said assets, or any part thereof, to any person or persons of whose claims or demands they have not received notice at the time of distribution thereof.

J. L. WHITING,

Solicitor for the said Executrix

Dated this 21st day of March, 1911. 15-d

MORTGAGE SALE.

Under and by virtue of the power of sale contained in a certain mortgage which mortgage will be produced at time of sale there will be offered for sale by public auction at Fitzmartin's hotel, in the village of Newburgh, on SATURDAY, APRIL 8TH, 1911, at 1 o'clock in the afternoon, the following real estate: All and singular that certain parcel or tract of land and premises situate, lying, and being in the Village of Newburgh, in the County of Lennox and Addington, and Province of Ontario, and being composed of lots numbers one (1) and two (2) on the east side of Brock street, in the said Village of Newburgh.

For further particulars apply to MATTHEW RYAN, Newburgh, or to HERRINGTON, WARNER & GRANGE, vendors' solicitors, Napanee, Ont.

Dated this 18th day of March, A. D. 1911.

HOW OLD IS MA?

She won't tell the census man.

We won't give it away because she always sends the neighbors to us for wedding cards whenever there's anything doing in the MATRIMONIAL LINE.

Follow Suit --- Try Us.

We have just installed a fast new Job Press, making three presses in our office exclusively for Job Work. We are also adding new type, etc. making our Job Plant the best in the district.

RHEUMATISM CURED TO STAY CURED

Liniments of no Avail—The Trouble
Must be Treated Through
the Blood.

This article is intended as a talk to the man or woman with rheumatism who wants to be cured. Not merely relieved, not half cured, but actually cured. The most a rheumatic sufferer can hope for in rubbing something on the swollen aching joints is a little relief. And all the while the trouble is becoming more firmly seated. Medical authorities now know that rheumatism is rooted in the blood, and that while rubbing on liniments or hot fomentations may give temporary relief, they cannot possibly cure—you must go to the root of the trouble in the blood. That is why Dr. Williams' Pink Pills cure rheumatism. They make new, rich blood, which expels the poisonous acid, and the rheumatism disappears. There are thousands of former rheumatic sufferers in Canada, now well and strong, who thank Dr. Williams' Pink Pills that they are now free from the aches and pains and tortures of this dreaded trouble. Mr. Joseph Luddington, New Harbor, N. S., says: "Some three years ago my wife was stricken with rheumatism, and suffered so much that we despaired of her ever getting well again. At first she was able to go about, but in spite of all we did for her she grew so bad that we had to lift her in and out of bed, and finally the pains grew so excruciating that we could only move her little by little, with the sheet under her. Finally we were induced to get Dr. Williams' Pink Pills for her. I do not remember just how many boxes she took, but I do know that they were the first medicine that reached the disease, and that she continued to improve until she was again as well as ever, and could do her household work. To us it is simply marvellous what Dr. Williams' Pink Pills did for her, and we are glad to give this testimonial in the hope that it will benefit some other poor sufferer."

Dr. Williams' Pink Pills are sold by all medicine dealers or will be sent by mail at 50 cents a box or six boxes for \$2.50 by writing The Dr. Williams' Medicine Co., Brockville, Ont.

VALUE OF A GOOD MEMORY.

Its Possession Not Always Proof of a Great Mind.

The trouble with old men usually is that their memories become overloaded with actual and psychic facts, among which they are unable to distinguish those that have a value for the present and those that have become obsolete. Generally speaking, an old man knows a great deal more than a young man, but, says the Dietetic and Hygienic Gazette, it does not necessarily follow that he is wiser. While, therefore, a strong memory is a great convenience, it is not necessarily an advantage.

Cardinal Mezzofanti, whose memory for words was so retentive

FORTUNE FAVORS THE BRAVE; OR, A LOOK INTO THE PAST

CHAPTER VIII.—(Cont'd)

Nancy turned to look at her lover.

"Like him?" she said, slowly. "I detest him!"

Darnley heaved a sigh of relief. "Poor fellow!" he said, with almost a feeling of pity for his rival.

"Poor, with all that money?" "I wish it were mine," Nancy. "Do you?" she said, gently. "Why?"

"That I might lavish it on you, dear one. Nancy, do you know I am a poor man?—that I have only a few hundred pounds that I can call my own?"

"And I—have nothing." She smiled, then growing grave, she went on hurriedly. "Don't!—oh, don't talk to me like this! Do you think that all the money in the world could make you dearer to me? No, no. I am glad you are poor. We shall work together. Sir Humphrey has told me all about your wonderful talent. You will rise in the days to come. You will take your rank among the celebrated barristers of the day, and I—I shall be so proud of you!"

Her eyes flashed with imaginary triumph, and her cheeks glowed.

The band struck up again at that instant, and, with a passionate look into her eyes Darnley took her in his arms and they glided away.

Mrs. Darnley had sat very still and cold as her son left her; her encounter with Dorothy had awakened into life every particle of the heavy, revengeful temper she possessed.

Accustomed to rule with the sway of a queen, she resented Miss Leicester's almost arrogant independence, and, with a strange injustice, it was on Nancy Hamilton she vented the most of her anger, as being the immediate cause of the dispute between her niece and herself.

It infuriated her to see the success that this upstart girl undoubtedly made, and she felt inclined to rise and stalk off with Lord Merefield, when he went to get consolation from Nancy. But even this feeling was as nothing compared to her disgust and anger as she saw her son go direct to that corner, and watched his face change as he gazed at the piquant, picturesque one beside him.

Her mother's heart at once took alarm.

She was indescribably proud of Derrick; he was, and had been, everything her son should be; his future was the one matter on which she permitted herself to indulge in any feminine weakness; and that he should not only aid Dorothy Leicester in her foolishness, but find such apparent pleasure in this Hamilton girl's society, was a perplexing and terrible revelation.

At this moment Sir Humphrey came up to her.

"Sir!" began Mrs. Darnley, trembling with anger.

Mr. Crawshaw shrugged his shoulders.

"I beg your pardon, I am sure," he said, with a sneer. "I only judged by appearance, and if that doesn't look like a case of lovers—well, I'm a Dutchman, that is all!"

Mrs. Darnley closed her hand so suddenly on her fan that the delicate tortoise shell snapped in two. "You are mistaken," she said again, in a choked sort of way.

"I think not," replied the other, laconically. "Your son is evidently madly in love with this girl, who comes from nowhere, and gives herself the airs of a queen"—there was an ugly look on Mr. Crawshaw's face and his lips twitched nervously—"but"—he paused, and Mrs. Darnley's cold gray eyes met his black ones—"but between being in love and marrying there is a vast deal of difference, you know."

Mrs. Darnley moistened her lips; she felt if she had a dagger in her hand at that moment that she could have willingly struck it into poor Nancy's great, loving heart. She was maddened to think that this girl, whom she already allowed herself to hate so unjustly, should dare to permit Derrick to so abase himself as to love her.

Crawshaw took a long, slow gaze at Nancy's sweet face blushing beneath her lover's eyes; the sight made his fierce jealousy and revengeful passion burn still more furiously. He had long vowed to be even with this girl; he had an old sore to settle up, and the bitter anger he had experienced this afternoon as he had watched Nancy turn to her lover as the flower turns to the sun, and heard her soft, earnest vow of love, had stirred his mean spirit to its uttermost depths. And when he had stood alone by the lake, he had vowed to himself that he would blot out her happiness and bring her to his feet as surely as he lived.

He drew his eyes suddenly from that window in the corner.

"You will never consent to the marriage?" he asked, abruptly.

"Never!" said Mrs. Darnley, forgetting her dignity in her apprehension; "I would sooner die first!"

"Then they must be separated, if it is as I suspect."

Crawshaw dropped his voice.

Mrs. Darnley's cheeks flushed.

"If it is as you suspect they shall be separated."

"Come with me," he said.

Crawshaw rose suddenly.

Mrs. Darnley, carried away by his vehemence, rose, too.

"I will give you proof that what I say is true."

that she was separated from him and a long night stretched between their next meeting; her heart suddenly yearned for him; she felt that she had not half expressed her love, that she had not half told him how happy, how indescribably happy he had made her.

Her heart thrilled with a thousand tender impulses—pride—gratitude—amazement—all melted into an ecstasy of passionate love.

Alone with that quiet night, the silent stars, the great blue realm that stretched above her, the girl suddenly realized the fullness of this joy that had come to her—her eyes were opened, and she knew how sweet a thing life was when love overshadowed it.

Now so much was explained, her interest—her eagerness to hear his name on other's lips, the indescribable pleasure his presence brought, the vague sensation his frank, manly tones had awakened in her breast; she knew them all now—the veil had fallen, she saw into her very heart of hearts, and knew that Derrick Darnley had not grown suddenly her king, but had crept slowly and surely into her life, there to remain and be treasured for ever.

Still and more silent grew the hour.

Away in the far distance came the misty dawn; the moon's pale rays sank slowly before it; her summer reign is ever short.

"A sense of heavy harmonies
Grows on the growth of patient
night,
More sweet than shapen music is."

This unfathomable melody touched the girl's full heart.

"I cannot sleep," she murmured to herself, and, throwing a shawl over her shoulders, she went out onto her balcony to watch the birth of the coming day.

"Will it be as beautiful as yesterday?" she thought, wistfully, to herself. Already the canker of fear was creeping into her paradise, it could not last, this sudden happiness, she told herself; no, it was too wonderful—too beautiful.

(To be continued.)

WHAT EVERY WOMAN SHOULD KNOW

**DODD'S KIDNEY PILLS THE
SURE CURE FOR ALL
ACHES AND PAINS.**

Mrs. Vaillancourt adds her experience to the great mass of proof that Dodd's Kidney Pills are woman's best friend.

Lafond, Alberta, Feby. 6 (Special).—That the women of the West are finding in Dodd's Kidney Pills a sure relief from those aches and pains that only women know is becoming more evident every day, and Mrs. Agnes Vaillancourt of this place gladly gives her experience as an addition to the mass of proof that is being piled up.

"For three years I suffered intensely with Kidney Disease," Mrs. Vaillancourt states. "I had pain everywhere. I only used six boxes of Dodd's Kidney Pills and I am

speaking, an old man knows a great deal more than a young man, but, says the Dietetic and Hygienic Gazette, it does not necessarily follow that he is wiser. While, therefore, a strong memory is a great convenience, it is not necessarily an advantage.

Cardinal Mezzofanti, whose memory for words was so retentive that he never forgot one after hearing it once, and which enabled him to acquire more than a hundred languages, was in most respects a very ordinary person. Pliny relates that Mithridates, King of Pontus, had so excellent a memory that he was able to speak fluently twenty-two languages native to the provinces of his vast empire. Yet he was a cruel barbarian.

A well known peripatetic elocutionist and reciter still living declares that he can repeat without further preparation about 3,000 selections in prose and poetry. He probably tells the truth, since he has been training his mind in this particular direction for many years.

On the other hand, such men as Sir Walter Scott, Macaulay and Gladstone were not only the possessors of excellent memories, they were also men of good judgment.

Among human beings children have the most remarkable memories. Under favorable circumstances they will learn three and even four languages, so as to be able to express their thoughts with equal ease in any one of them by the time they are six or seven years of age.

And they accomplish this remarkable feat without any aid from the mnemonic devices to which adults are compelled to resort when they undertake a similar task. They learn words and phrases unconsciously, and rarely forget them as long as they live. On the other hand, grown-ups rarely acquire an accurate pronunciation of a foreign language, although they may be able to use it with entire correctness.

It is a common belief that the memory is more tenacious in early life than in later years. That seems to depend almost entirely on the individual.

BOWEL TROUBLE MAKES SICKLY BABIES

Bowel trouble is the cause of most of the ailments from which little ones suffer. When baby's bowels are not working regularly illness is sure to appear, but when the bowels are regular the little one is usually bright, active and happy. No other medicine for babies has such good effect on the bowels as has Baby's Own Tablets. They make their action regular, sweeten the stomach and promote good health. Concerning them Mrs. Freeman Feener, of Barry's Corner, N. S., writes: "I can heartily recommend Baby's Own Tablets for all the troubles from which little ones suffer. My baby girl was troubled with her bowels and was so small and puny I thought we would lose her. I saw Baby's Own Tablets advertised and began giving them to her and now she is a big, healthy baby. For this I thank the doctor, and I always keep them in the house." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Elockville, Ont.

ture was the one matter on which she permitted herself to indulge in any feminine weakness; and that he should not only aid Dorothy Leicester in her foolishness, but find such apparent pleasure in this Hamilton girl's society, was a perplexing and terrible revelation.

At this moment Sir Humphrey came up to her.

"Anne," he said, genially, "Mr. Thomas Moss Crawshaw requests the pleasure of an introduction."

Mrs. Darnley frowned. She felt in no mood to submit to the indignity of meeting this parvenu, but there was no help for it.

Sir Humphrey passed on, and Mr. Crawshaw was left standing beside her chair, with an expression on his swarthy face which vaguely puzzled her.

Perhaps her intuition, that marvellous gift all women possess, warned her that this man might serve her in some way; at any rate, she moved her dress.

"Will you not sit down?" she said, coldly, yet not ungraciously.

Thomas Crawshaw took the chair and sat in it uneasily; his new position had done very little to rub off the edge of his common ways and manners.

It was not for mere fancy that he had commanded rather than asked his host to present him to this lady.

He had noticed her very fixed stare at Nancy, and his quick ears had caught a few words, as Dorothy had poured out her vexation about her aunt's unkind and unjust remarks into Lord Merefield's ready ears just a few minutes previous. Sharp and cunning as a ferret, Crawshaw saw in Mrs. Darnley a willing and useful worker in a little scheme which he had been planning since he had witnessed that love scene down by the lower lake.

"She won't stick at a trifle if I get her on the right track," he said to himself, as he glanced at Mrs. Darnley's haughty, handsome face.

Derrick's mother waited for her new acquaintance to speak first; and Crawshaw was so slow to begin, that she made a plunge into platitudes.

"This is a very fine place," he said, slowly, after a while, "and Sir Humphrey's a good old chap! They tell me that young fellow over at the window will come into everything—is that true?"

That young fellow was Mr. Darnley, who was fanning Nancy and talking quietly at the same time.

Mrs. Darnley drew herself up.

"Miss Leicester will inherit everything on her father's death, Mr. Crawshaw. You have been misinformed; my son, Derrick, is not the heir of Rinstone Hall."

Crawshaw smiled curiously.

"Well, that's perhaps a good thing, seeing as he's likely to make a fool of himself in that quarter," with a comprehensive nod of the head at Nancy's figure.

Mrs. Darnley started, her fan slipped from her fingers and fell to the ground. She was pale to the lips as Crawshaw stooped and handed her her fan.

"Not but what she is pretty enough," he went on, quietly; "he might do worse."

Shiloh's Cure
quickly stops coughs, cures colds, heals the throat and lungs. . . . 25 cents.

Crawshaw rose suddenly.

Mrs. Darnley, carried away by his vehemence, rose, too.

"I will give you proof that what I say is true."

Not until they had passed out of the hot room did Mrs. Darnley question him, but as the cool night breeze met her she suddenly awoke to the fact that this strange, plebeian man was controlling her in a most decided and unpleasant fashion, and, moreover, that he was acting in an altogether unorthodox manner which required some explanation.

"Where are you taking me?" she asked, curtly, standing still.

"I am leading you to the terrace beneath that window, where you will have a good opportunity of overhearing your son's conversation with this Nancy Hamilton."

Mrs. Darnley shuddered slightly. She had no heart, but she had a sense of honor.

"Do you want to see her your son's wife?" asked Crawshaw, fixing her with his brilliant black eyes.

"You know I do not," broke from the mother's lips.

"Then come with me; you have no time to lose, if you would prevent him from openly declaring his love to the world."

Mrs. Darnley followed him down the steps.

"What is this to you?" she asked, abruptly, as they reached the bottom; "why are you mixing yourself up in the affair? What is my son's marriage to you?"

"Nothing," was Crawshaw's blunt reply. "I am working for myself; I love this girl, and I've sworn to make her my wife!"

CHAPTER IX.

Night had fallen; outside the trees moved to and fro in the soft breeze, the delicate blooms drift in the refreshing dew, the stars shone out of the dark-blue sky in fullest majesty. The heat of the day was dead, and as the pale moon gathered in strength and silver light, the least of the revellers left Rinstone Hall for their homes, weary with the pleasure which had fallen to their lot.

"It has been a success; yes, I really think it has been a success. But, oh! how tired I am!" yawned Dorothy, when the last carriage had rolled away. "Nancy, you look as fresh as though you had just got out of bed."

They were all assembled in the hall, Sir Humphrey, with old-fashioned gallantry, insisting on lighting the candles himself, and escorting his fair guests to their chamber doors.

Nancy received his good-night kiss and ran fleetly up the stairs, leaving Dorothy, after she had embraced her tenderly, alone with Lord Merefield, Darnley and her father.

The moonlight shone in through the long windows in the corridor, and illumined her as she sped along the passage.

She had not said good-night to her lover, or even given him a glance from her eyes downstairs; she had felt too shy to brave his gaze, but when once she gained the seclusion of her room, she overwhelmed herself with reproach for her unkindness. She might at least have given him her hand, and now it was too late. She put her candle down, and walked to the window with a sense of disappointment and vexation creeping over her. How could she have been so foolish, now

becoming more evident every day, and Mrs. Agnes Vaillancourt of this place gladly gives her experience as an addition to the mass of proof that is being piled up.

"For three years I suffered intensely with Kidney Disease," Mrs. Vaillancourt states. "I had pain everywhere. I only used six boxes of Dodd's Kidney Pills and I am completely cured of all my aches and pains. I am in perfect health to-day."

Woman's health depends on her Kidneys. If they are not in perfect order the impurities are not strained out of her blood and she cannot be healthy. She feels it in every part of her body and the result is that she is weary and worn and full of aches and pains. What every woman should know is that there is sure relief and perfect health for her if she uses Dodd's Kidney Pills.

PARROT MURDERED.

Landlady Who Wrung Bird's Neck is Now in Hospital.

A parrot called Plato, remarkable for its ability as a linguist, was the principal character in a tragedy in Paris, France, recently. M. Vincente de Carvallo, its owner, is in prison, and M. Carvallo's landlady is in hospital, with severe injuries inflicted by the student when she wrung the parrot's neck.

Plato was a remarkable parrot. He could utter many military commands in Spanish, make charming little speeches in English, demand sauerkraut, beer, and the Kaiser in German, and also talk French with uncanny fluency.

M. Carvallo was very proud of his pet, and when he returned from his lectures he spent hours teaching the bird new phrases. It appears, however, that Mme. Machuel, his landlady, disliked the parrot and she frequently urged M. Carvallo to get rid of it.

One morning while at breakfast, M. Carvallo noticed a murderous look in the landlady's eye when Plato amicably invited her to come out and pick violets with him. M. Carvallo left to attend a lecture, but became uneasy and returned an hour later, just in time to find the landlady wringing the parrot's neck.

Maddened with grief, the student threw his landlady downstairs. She was taken to the hospital, and he was taken to prison.

AN EVEN BREAK.

"Those people talked all the time you were playing. They couldn't hear a word of your music."

"That's all right," replied the eminent performer. "My music prevented me from hearing their conversation."

THEIR FATE.

"Papa," queried the small son of a physician, looking up from his Sunday school book, "did the patients of Job get better, or did they all die?"

"How's your wife's cold this morning?" asked a neighbor. "Much better, thank you. There's a dance to-morrow evening that she wants to go to."

brush should be held across the teeth and placed at the top of the gums of the upper jaw. Then the bristles must be drawn down to the bottom of the teeth following the space between. The lower jaw is treated by beginning at the gum and drawing the brush up toward the top. Chances are that particles will be eliminated; in any event the edges of the teeth have been cleared.

"And, of course, dental silk should be used after each meal, drawing it between the teeth to remove any bits of food. If they remain they certainly will make the teeth decay."

Many patent medicines have come and gone, but Bickle's Anti-Consumptive Syrup continues to occupy a foremost place among remedies for coughs and colds, and as a preventive of decay of the lungs. It is a standard medicine that widens its sphere of usefulness year by year. If you are in need of something to rid yourself of a cough or cold, you cannot do better than try Bickle's Syrup.

Kate—These new photographs of yours remind me of Jack. Alice—Of Jack? For mercy's sake, where's the resemblance. Kate—They flatter you so, dear.

Minard's Liniment for sale everywhere.

NOT FOR LOOKS.

"Are you sure he married her for her money?"
"Absolutely—I've seen her!"

Soft corns are difficult to eradicate, but Holloway's Corn Cure will draw them out painlessly.

Wife—"A tree, you know, gets new clothes every spring—bat, parasol, everything."
Husband—"Yes, darling—and makes them all itself."

CORONATION COACH BURNED.

Had Been in Use for Over Two Hundred Years.

A glass coach belonging to the King, which was to have been used at the Coronation, was destroyed in a fire which did \$400,000 worth of damage at Notting Hill last week.

The coach had been placed with Messrs. Barker & Company of Olaf street, Notting Hill, for retrimming in readiness for the Coronation, and the work was nearing completion. Gold to the value of \$1,500 was used in the ornamentation of the vehicle.

The fire, which broke out about 2 o'clock in the morning, practically burned out the great range of buildings occupied by the firm, covering an area of 180 feet by 120 feet. The place was closely stocked with beautiful carriages of every description, and many of these were burned. Among those destroyed, in addition to the Coronation coach, was a barouche belonging to the Queen, and the State coach of the Duke of Richmond, which was also being decorated.

It was at first thought that the Royal coach was the famous Acorn coach, but this proved to be incorrect, as the Acorn is now housed at

sores, chapped places, piles, ringworm, children's eruptions, burns, scalds, and all skin injuries and diseases. Zam-Buk will be found unequalled. All druggists and stores sell at 50c. box, or post free from Zam-Buk Co., Toronto, for price. Refuse harmful substitutes and imitations. Try Zam-Buk Soap, too!

NO NEED TO REST.

"Why don't you pause there, Annie?" rather impatiently inquired the music teacher who was struggling with a dull, but willing, pupil. "Don't you see that rest?"
"Yes, teacher," was Annie's innocent answer, "but I ain't a bit tired."

Ready-made Medicine—You need no physician for ordinary ills when you have at hand a bottle of Dr. Thomas' Electric Oil. For coughs, colds, sore throat, bronchial troubles, it is invaluable, for scalds, burns, bruises, sprains it is unsurpassed, while for cuts, sores, ulcers and the like it is an unquestionable healer. It needs no testimonial other than the use, and that will satisfy anyone as to its effectiveness.

THINK THIS OVER.

Why do you take yourself so seriously

have been cheaper to give him what he wanted than to pay the doctor."

Costiveness and its Cure.—When the excretory organs refuse to perform their functions properly the intestines become clogged. This is known as costiveness and if neglected gives rise to dangerous complications. Parmelee's Vegetable Pills will effect a speedy cure. At the first intimation of this ailment the sufferer should procure a packet of the pills and put himself under a course of treatment. The good effects of the pills will be almost immediately evident.

Loud apparel naturally proclaims the man.

Minard's Liniment Cures Dandruff.

No doubt the mind cure is all right—if you have the mind to begin with.

PILES CURED IN 6 TO 14 DAYS
Your druggist will refund money if PAZO OINTMENT fails to cure any case of Itchtag, Blind, Bleeding or Protruding Piles in 6 to 14 days. 50c.

"After all," said the optimist, "you must admit that this is the best world you have ever been in."
"Yes," replied the pessimist; "but hang it, my wife is the best wife I've ever had, and that's not saying much for her."

Mrs. Winslow's Soothing Syrup

Has been used for over SIXTY-FIVE YEARS by MILLIONS of MOTHERS for their CHILDREN WHILE TAKING with PERFECT SUCCESS. IT SOOTHES THE CHILD, SOFTENS THE GUMS, ALLAYS ALL PAIN, CURES WIND COLIC, and is the best remedy for BRUISING. Sold by Druggists in every part of the world. Be sure and ask for Mrs. Winslow's Soothing Syrup, and take no other kind. Twenty-five cents a bottle. Guaranteed under U.S. Food and Drug Act, June 25th, 1906. Retail Everywhere.

AN OLD AND WELL TRIED REMEDY.
"I want to look at some canes," said a magnificent young man to the shopkeeper, "and I'm in a great hurry."
"Yes, sir; yes, sir," responded the shopkeeper, very much flurried. "Here, James," to shop assistant, "show this gentleman some hurricanes."

Relief for the Depressed.—Physical and mental depression usually have their origin in a disordered state of the stomach and liver, as when these organs are deranged in their action the whole system is affected. Try Parmelee's Vegetable Pills. They revive the digestive processes, act beneficially on the nerves and restore the spirits as no other pills will. They are cheap, simple and sure, and the effects are lasting.

Every man is a comer until he reaches a certain age—then he's a goner.

Minard's Liniment Cures Burns, Etc.

IMPERTINENT.

"Are you the maid?" asked the stranger at the door.

"Do I look like the hired man?" was the young woman's impertinent reply.

A stout woman entered a crowded car and took hold of a strap directly in front of a man seated in the corner. As the car started she lunged against his newspaper and trod heavily on his toes. As soon as he could extricate himself he rose and offered her his seat. "You are very kind, sir," she said, panting for breath. "Not at all, madam," he replied. "It's not kindness; it's simply self-defence."

PILES of all kinds, in any and all stages, quickly relieved and positively cured. Cure your suffering and live quietly. "Common Sense" for Piles will do it. \$1 a box, \$5 for 6 boxes. Mailed on receipt of price.

LYLE MEDICINE COMPANY, TORONTO
718 WEST QUEEN STREET

THE CAUSE.

"What was the cause of the quarrel between the two tramps?"

"One found some money, the other tried to make him fork it over, and when he refused, knifed him."

BE DIFFERENT.

"I understand he's one of your leading citizens?"

"He is, my boy, but for goodness sake don't follow his example."

SELF-CONSCIOUS

We don't know, but it's our opinion that the most self-conscious person on earth must be the man in his first plug hat.

Unless worms be expelled from the system, no child can be healthy. Mother Graves' Worm Expeller is the best medicine extant to destroy worms.

"Honesty, my son," said the millionaire, "is the best policy."
"Well, perhaps it is, dad," rejoined the youthful philosopher; "but it strikes me you have done pretty well, nevertheless."

Minard's Liniment Co., Limited.
Gentlemen,—Theodore Dorais, a customer of mine, was completely cured of rheumatism after five years of suffering, by the judicious use of MINARD'S LINIMENT.

The above facts can be verified by writing to him, to the Parish Priest or any of his neighbors.

A. COTE, Merchant.
St. Isidore, Que., 12 May, '98.

The brave ship was wallowing in the waves that threatened to engulf her at any moment. Hastily the captain ordered a box of rockets and flares to be brought to the rail, and with his own hands ignited a number of them, in the hope that they would be seen and the passengers and crew rescued. Amid the rockets' red glare a tall, thin, austere individual found his way with difficulty to the rail and spoke to the captain. "Captain," said he, "I protest. We are now facing death. This is no time for a firework display."

SAVED IN HIS OLD AGE.

Annapolis, N.S., May 14, 1909. I am over eighty years of age and have suffered from Kidney and Bladder Trouble for fifteen years. I took doctor's medicine but got no help. I want to thank you for sending me the sample box of Gin Pills which helped me.

I have taken six boxes of Gin Pills altogether, but got relief before I had taken near that amount. I had to get up some nights every fifteen minutes and had to use an instrument before I could urinate. Now I can lie in bed four or five hours without getting up.

W. H. PIERCE.
Write National Drug and Chemical Co. (Dept. W.L.), Toronto, for free sample. Regular size 50c, 6 for \$2.50.

NOTES AND COMMENTS

An English paper recently took up a campaign against houses that are traditional death traps, houses in which successive tenants persist in dying and have cited some remarkably gruesome cases which emphasize the necessity thoroughly of disinfecting any room, flat or dwelling before moving into it. One striking case is that of a pretty little cottage, now about thirty years old, outside of London.

Twenty years ago a family moved into it and three members died in rapid succession. The remnant moved out and another family took its place. Again three died and it was noted that the same disease had attacked the newcomers, namely consumption. For some time the owners had difficulty in renting the place and then a third family came and were scarcely installed when a child contracted lung trouble and died. The relatives fled from the place in horror and from that time forth no one would occupy the place. It was said to be haunted or to be presided over by an evil spirit.

At last a young physician took it, heard the gossip and made outside inquiry and internal tests. He found that twenty-five deaths had occurred in the place since the original occupant, a bachelor with lung trouble, had died there ten years before. He fumigated thoroughly and moved his family in, where they have lived in perfect health ever since. The medical journals have taken this investigation up and it is astounding the number of such houses they have found which are shunned as death holes, are reeking with germs and are simply in need of the same disinfection that is given the clothes of a person who has recovered from a contagious disease.

Certain rooms in lodging houses are notorious for the lives they have claimed and are shrouded in superstition. English medical authorities advocate the fumigation of every room and dwelling which changes tenants and are trying to impress upon the English people the folly of exposing themselves to dangers so terrible and yet so easily avoided.

A certain Englishman, Dr. T. Anderson by name, has made a discovery which may render our man made structures as immortal as the hills themselves. He has been making a special study of stone and has looked into stone crumbling and the rot which affects stone in buildings and has come to the conclusion that it is all due to nothing more or less than a germ. The germ has grown in importance enormously in the last few decades, but we certainly never expected to

ALMOST ALL VICE IS SOCIAL

This Makes Plain Why the Bible Tells Us to Beware of the World

"Strait is the gate and narrow is the way that leadeth to eternal life, and few there be that find it.—Jesus.

Let us, at least for the moment, consider this shattering statement of Jesus, not as describing the difficulty of getting into heaven when we die, but getting into any sort of success, efficiency, and poise of soul while we live. Look at it once, not as a day-of-judgment decree, but as a simple law of our human nature.

That law is that whoever gauges and models himself after other people is on the road to deterioration and eventually ruin; that all real moral advancement and true success is solitary and along "the lone trail."

Men go to the devil in crowds. One goes because the rest are going. One boy gets drunk because he does not like to refuse "the fellows." The politician steals because he hears

THEY ALL DO IT.

In fact, the devil's name is "They-all-do-it." Almost all vice is social; almost all righteousness that is of any account is purely personal.

The real gist of any kind of genuine salvation, Jew or Gentile, Catholic or Protestant, is that a man has formed a partnership of two, himself and God, against the universe and all that dwell therein. Saving one's soul is, in its last essence, a sort of a declaration of independence, a sworn allegiance to one's own inner, individual convictions and ideals and renunciation of all outside authority.

The world means the mob — other people. The prince of this world is one of the names Jesus gives Satan. He is "Mr. They-all-do-it."

When the devil was cast out of

the Gadarene swine he confessed his name was Legion. God is one; devil is the many.

The truth of this appears in ordinary business. The kind of clerk that is hardest to find is the one who simply does what he ought to do. Says Kipling:

"Creation's cry goes up
From age to cheated age,
Give us the men who do the work
For which they get the wage!"

IT IS A PITY,

but true as gospel, that the average servant is inefficient, the average mother incompetent, the average business man incapable, the average actor a poor one, and the average preacher a bore.

In fact, the average of any class of men is below the average, so to speak. The world's work is carried on by makeshifts. If any man will train himself properly and correctly perform the duties of his calling, whatever it is, he will find that people call him a remarkable person, unusual! extraordinary!

If you want to amount to anything, follow the gleam, satisfy yourself and not others, go in for your own self-respect and not the admiration of the crowd. The curse of many a youth is that he has been content to do as well as those about him.

You have heard possibly many a sermon on "What shall I do to be saved?" Here is one on "What shall I do to be ruined?" and it is a short one: Do nothing! Follow the crowd. Aim for the average.

"For wide is the gate and broad is the way that leadeth to destruction, and many there be that walk therein."

DR. FRANK CRANE.

THE SUNDAY SCHOOL STUDY

INTERNATIONAL LESSON, MARCH 26.

Lesson XIII. — Review Golden Text, Psa. 144. 15.

One Truth These lessons Teach.
Final power belongs to the one great King.

Therefore, the Aim is, To lead the pupils to worship and serve the King to whom worship is due.

Clue to Pupils' Interest. How one earthly king recognized the power and authority of God the greatest King.

Introduction. Many of you have read of King Canute on the seashore, and you need not be reminded of the story to see in your mind the king sitting in his royal chair by the side of the sea with his scepter in his hand and his crown on his head. One hand is stretched out over the sea and he is saying to the rolling waves:

Sing during the review Luther's hymn, "A Mighty Fortress Is Our God."

SEEN IN PARIS SHOPS.

French knots are fashionable. Beaded effects continue in good style.

The newest real shell hairpins are quite small and light.

The long, seamless shoulder remains in excellent vogue.

Chemisettes are now colored chiffon, made perfectly plain.

Revers that end in a cape effect at the back are used on little street dresses.

The lace trimmed hat brim is effective indeed, especially with a plumed hat.

Small white satin beads are much used on the frock of black chiffon or marquisette.

Organdies are dainty and inexpensive and make delightful frocks for summer wear.

Special attention is given this season to parasol handles shown in handsome woods.

A quaint style suited to the slim figure is a velvet bolero suit trimmed with colored lace.

THEY RISK LIFE FOR HONEY

BEEES DEFEND THEMSELVES WITH GREAT VIGOR.

Their Stronghold in India Attacked by an Englishman—Wore Suit of Armor.

In India, about eight miles from the town of Jabalpur is a place called "The Bee," from the fact that swarms of the insects live there and defend their holding against the world. Shocking tragedies have resulted from invasion of the spot. Some men who had unwittingly disturbed the bees were set upon by millions and stung to death, or those drowning in the river near by as a more tolerable fate. Deer, pigs, and even the lordly tiger have paid the same penalty for their indiscretion.

DESIGNED ARMOR.

A bold Englishman, who some years ago determined to invade the home of the bees, began by designing a suit of defensive armor. It consisted of a sort of overall suit, tied round the neck with tape, a bee veil to be tucked into the garments, riding boots, gauntlets and two pair of gloves. Into this suit he was sewn by a tailor, so that there should be no chink or crevice. He took with him a native similarly armored.

The two were to climb up to the back of the hills so as to get above the bees, and another native, also armored, who was in charge of the boat, ascended the rocks. He went to the bank of the river, which was under the point of attack, and made his boat fast.

COULD HEAR HUM.

With his first attendant, the Englishman climbed to a well-considered height, and then crawled cautiously forward alone.

A dense mass of bees and comb lay about fifty feet below the Britisher, and fifty feet below that were the boat and the native in charge.

The hunter put one end of the rope round a tree growing at the edge of the cliff, gave the other end to his attendant, and went over. He found that he would have to get a swing to reach the ledge on which he meant to stand. Hanging down over this ledge from above were ten or fifteen feet of comb.

The Englishman reached the rock with his hand, gave a push, swung out, then in again, struck in the middle of the comb, and gained his feet upon the ledge with a scramble.

Immediately the bees were upon him. The noise of the water below was drowned by their angry hisses. The Englishman was completely blinded, for they had swarmed over his veil, blocking out the light.

For a few moments the daring Britisher was stupefied. Then he realized that his armor was trustworthy and that he was safe. The native lowered the bucket, and blindly the hunter felt about for the comb, and, as well as he could, scraped it into the bucket. He then lowered it to his native, giving the signal for himself to be lowered also.

MAN COVERED WITH BEES.

The Englishman swung out into the dark, bumping as he went. At last he was clutched, and at once knew that he was at the bottom. He

and the rot which affects stone in buildings and has come to the conclusion that it is all due to nothing more or less than a germ. The germ has grown in importance enormously in the last few decades, but we certainly never expected to find him in stone. Dr. Anderson's cure for the disease which troubles buildings is as unique as the theory itself. It is simply the use of germicides. Of course it takes years to test either the theory or the cure, owing to the slow process of decay; but the statement of Dr. Anderson's findings sounds plausible at least.

He discovered that treatments of building stone based upon the chemical theories and abrasion were failures. He found that the disease was not necessarily on the surface, but might begin in the most unexpected part of the block, so he decided that wind and weather had nothing whatever to do with it. Two years ago he treated certain stones with sulphate of copper, bichloride of mercury, and creosote on the theory that there was some organic creature or plant working the downfall of building stone and that it could be best treated with germicide. As compared with others treated on the basis of other theories at the same time these stones are remarkably well preserved, but of course a two years' test is scarcely efficient and it will take many more to prove or disprove anything.

The parent of all the wheat in the world has recently been found. At least the finder, Dr. Aaron Aaronsohn, a distinguished botanist, claims that it is the patriarch of wheats, and he is a good authority. It grows in Palestine, in the upper Galilee district, and is of good quality and an exceptionally adaptable and hardy nature. It reproduces itself vigorously on Mount Hermon, 6,300 feet above sea level, and also along the shores of the Dead sea, which is absolutely arid and lies 500 feet below the level of the Mediterranean. An effort will be made to transplant this species to the wheat country in the extreme north of Canada, where it is hard to find a crop that is cold-proof. The same plant also has been sent to Algiers, Tunis and Egypt, to be sown in waste and desert lands where no other profit-bearing plant will thrive.

MOVING.

Doctor—"Now that I've set your husband on his feet again, you must see that he gets more exercise."
Patient's Wife—"All right, doctor; this bill of yours will help. He'll be terribly exercised when I show it to him."

The first ten miles of the Kettle Valley Railway out of Merritt, B.C., has been completed. By next August 20 more miles will be completed.

read of King Canute on the seashore, and you need not to be reminded of the story to see in your mind the king sitting in his royal chair by the side of the sea with his scepter in his hand and his crown on his head. One hand is stretched out over the sea and he is saying to the rolling waves: "Sea, I command you to come no farther! Waves, stop your rolling and do not dare to touch my feet!" But the tide is coming in just as it has always done. In a few minutes King Canute is throwing his crown down upon the sand. He is saying, "There is only one King who is all-powerful, and it is he who rules the sea and holds the ocean in the hollow of his hand." He is doing this to teach his subjects who are gathered around that he is only an earthly king, and that real power and glory belong to the heavenly King, for, turning to them, he says: "Do you, my men, learn a lesson from what you have seen. It is He whom you ought to praise and serve above all others."

Lesson Story. We have been learning during the past three months about the earthly kings who ruled over the divided kingdoms of Israel and Judah. Over and above all there ruled the God of hosts, turning battles whichever way he chose, granting peace and plenty to the kings who followed him in purity and truth, overthrowing the worship of idols, teaching strange and wonderful lessons through his mighty works, permitting his prophets to perform miracles in his name, and taking his faithful servant into heaven in a chariot of fire on a whirlwind. We have come to understand more of God's dealings with men through the history of such kings as Jeroboam, Rehoboam, Asa, Omri, Jehoshaphat, and Ahab, and through the teachings of their prophets Elijah and Elisha.

If we can remember the lessons for to-day learned from the lessons of long ago and have planted the truth they hold in our hearts, we shall not have spent these months in vain.

Let the teacher test the class by giving the aim of the different lessons and encouraging the pupils to tell in their own language the story that accompanies. For example, the teacher may say: "In one of our lessons we learned that the true worship of our hearts is what God would have from us to-day. Can anyone tell in his own words the lesson through which we learned this truth?" The response should be, "Elijah's Victory over the Prophets of Baal." But if there should not be an immediate response, the pupils may be led to remember the lesson if the teacher quotes the Golden Text, "Choose you this day whom ye will serve." The teacher might begin: "It was at Mount Carmel, and there was gathered a company of priests of Baal on the one side, and a single, lonely, white-haired prophet on the other side. There were two altars ready for the sacrifice—" When she has gone thus far, some pupil will surely be ready to go with the story.

Write out the Aims in each lesson either on the blackboard or on tablets if the lesson is taught in individual classes and have the pupils read all the Aims.

If there is time, it might prove helpful to have the pupils restate as many of the Aims as they can in their own words.

Teach in closing the text for this lesson, impressing it as much as possible as a vital lesson for to-day.

or marquette.

Organdies are dainty and inexpensive and make delightful frocks for summer wear.

Special attention is given this season to parasol handles shown in handsome woods.

A quaint style suited to the slim figure is a velvet bolero suit trimmed with plaited lace.

Pointed jabots with edging of real lace are used on many simple undecorated blouses.

Dresden stripes are most effective among trimmings, as are also satin stripes bordered in flowers.

The latest auto coat is reversible. One side is tweed and the other is tan waterproof cloth.

Cotton dress goods are galore—among them crepes, tissues, marquisettes, and a host of others.

Many new mixtures of silk and cotton are offered under the titles of foulard, messaline, and tussore.

Little necktie bows are a means of decoration that may be placed in the outer or inner side of the sleeve.

Marabout, or, better, the new cut ostrich feather edging, comes in for its share of attention as sash trimming.

For strictly tailored hats there are ornaments of straw, of ribbon, and the new knitted stuff that looks like the sort used in gloves and mufflers.

One of the most exquisite of the new nets has a border of ragged blue that trails off indefinitely into pale green.

There is a great demand for artificial flowers for corsage bouquets. Gardenias, lilacs and camellias are displacing the popular violets.

Togues of brocade with puffed crowns of plain satin are good for the early spring days. They are trimmed with small aigrettes at one side.

The spring time colored blouse that matches the materials of which the tailored suit is made is an important factor in the outfit of every well dressed woman.

HOME.

It takes a heap o' livin' in a house to make it home,
A heap o' sun an' shadder, an' you sometimes have t' roam
Afore you raily 'preciate the things yer lef' behind,
An' hunger fer 'em somehow, with 'em allus on yer mind.
It don't make any difference how rich yer git t' be,
How much yer chairs an' tables cost, how great yer luxury,
It ain't home to yer, though it be the palace of a King,
Until somehow yer soul is sort o' wrapped round everything.

"I know what's passing in your mind," suddenly said the maiden as the habitually silent caller stared at her. "I know, too, why you are calling here night after night, appropriating my time to yourself and keeping other nice young men away. You want me to marry you, don't you?" "I—I do," gasped the young man. "I thought so. Very well, I will!"

If a man's wife can read about politics without wishing she were a man he will never experience the pleasure of being henpecked.

He is a wise man who agrees with his wife rather than argue with her. Forgive your enemies—if they are bigger than you are.

the comb, and, as well as he could, scraped it into the bucket. He then lowered it to his native, giving the signal for himself to be lowered also.

MAN COVERED WITH BEES.

The Englishman swung out into the dark, bumping as he went. At last he was clutched, and at once knew that he was at the bottom. He brushed the bees from his veil, and through a driving mist of them saw a cluster of other bees in the shape of a man. This was the native who had the boat.

They cut themselves adrift and rowed to a convenient place, where they made for the shore. There, five miles away, they made a sulphur smoke and were freed from the last of their persistent enemies. The armor had held, none of the men were stung, and the booty was just fifteen pounds of honey.

DOMESTIC SUPERSTITIONS.

Some Signs and Omens Noted in Kitchen.

If when washing dishes you forget an article, it is a sign you will hear of a wedding.

If you sing while making bread you will cry before it is eaten.

If your apron becomes untied, it is an indication that somebody is speaking of you.

To forget to put coffee in the coffee pot it is a sign of a coming gift.

To accidentally place the tea kettle on the stove with the spout toward the back is a sign of company.

If a coal of fire falls on the floor, it is a sign a stranger is coming to see you.

If, after sweeping a room, the broom is accidentally left in a corner, strangers will visit the house that day.

WORTH THINKING ABOUT.

How pleasant it is during snappy cold days to sit by the fire and through the window watch one's wife wading through the snow to hang out the week's washing.

The man who owns a two-year-old colt that is not harness broken has much to learn about horses.

Cut out the 30 per cent. middleman and send your butter and eggs and other produce direct to your customers in town. Two dollars worth of postal cards will give you a start in the business.

We have more respect for the farmer who puts a stone in the butter jar or conceals the wormy apples in the middle of the barrel than the man who poisons the children's food with chemicals.

At a barn raising the man who grunts the loudest generally lifts the least and eats the most.

The farmer who dresses like a tramp is sadly out of place among self-respecting men these days.

DESTRUCTIVE.

"I see that they're making brandy from sawdust."

"Good gracious, as if the forests were not disappearing fast enough as it is!"

"So your daughter has been to a cookery school?" "Yes," answered Mrs. McGudley. "I suppose she has helped along the household economies?" "Not exactly. She has made us appreciate our regular cook so much that we have to raise her wages every time she threatens to leave."

retreat; on the contrary, it was only preparing for another assault.

Yes; it was now descending like some terrible and live bomb—descending on her with a force enough to crush her to the ground.

She closed her eyes in terror. Another instant, and—

What was this?

A strange, an imperative sound had arisen on the air—a sound like a whirr of wings, yet unlike any wings of birds.

She had opened her eyes again wide, and beheld the most superb vision of this astounding century of ours.

For, whizzing across the loch, high in the heavens, came a flying machine, its wide planes gleaming in the sun, its propeller a mere blur in front of it. In the centre of the planes, on a little saddle, sat a small black figure—the figure of a man.

The flying-machine dipped gracefully, then rose on a long tilt. Straight as an arrow it flew now towards her, then rose again.

Crash!

The propeller had struck the eagle on one of its pinions. There was a spurt of feathers. With a hoarse cry, the bird turned over once in the air, then regained its balance, and, flapping woundedly, disappeared in the direction of Dalna.

The owner of the parasol had not swooned, but she had sunk to the ground, allowing the lamb to escape from her arms. Now she rose, for the flying-machine had come to rest on the moor close by, and its rider was hastening towards her.

"You are not hurt?" he gasped. "I saw the whole thing through my field-glasses from my shed. It was extraordinary that an eagle should have had the pluck—" He laughed. "No; I ought to say that it was extraordinary that you had the pluck—Why, great Scott, it's Rose!"

"Yes; it is I, Harry," she said, showing him her full face.

"To think that I should have been the means of rescuing you," he said reverently—"of rescuing the one girl in the world—"

She held up her hand.

"No; I won't stop!" He answered her unspoken plea. "We parted two years ago; foolishly quarrelled over a mere nothing. Each was too proud to give in. It was a misunderstanding, Rose—all a mistake. I confess I was in the wrong; but"—his bronze face lit up with one of his rare and masterful smiles—"you were in the wrong, too, you know. Never mind that now. Fate has reunited us, and at a moment when I am once more at liberty to speak to you. My money—you remember that the quarrel arose from your parents' insistence on the money question—has all been sunk in this flying-machine. It is my own invention, and the War Office is pledged to buy it when I have proved its worth."

"To-day you have given the proof," she nodded.

"Exactly! And you—though I didn't recognize you—were my inspiration. I had been waiting for some token, almost superstitiously—waiting for some sign, I knew not what—that the moment had arrived for me to launch myself forth over the loch. It takes a bit of pluck, you know!" He smiled again thoughtfully.

He resumed: "To-day, when I saw your plight through my field-glasses, and realized that I couldn't possibly come to your aid on foot

The Home

Notes of Particular Interest to Women Folks

TASTY RECIPES.

New Barley Dish.—Boil until tender a heaping teacupful of coarse barley. Also boil 10 cents' worth of spareribs and same amount of calves' liver together until tender. When the meat is removed from the ribs grind it up real fine with the liver, then mix thoroughly with the barley. Add salt and pepper and mold into little cakes or balls and fry in deep butter or drippings until brown. This can also be fried without molding into cakes and is delicious.

Waffles.—Eggless Waffles—One cup flour; one rounding teaspoonful baking powder, salt to taste, one cup sweet milk, one tablespoonful melted butter (or butter and lard). This will make three waffles.

Another—Beat two eggs, add two cups of milk, one tablespoon of melted butter, and one of lard, two cups of flour, sifted, with two teaspoons baking powder and a little salt; mix well together.

PIE.

Mock Cherry Pie.—Cook one cup of cranberries, one-half cup chopped raisins, and two-thirds cup of cold water together until soft, add one cup of sugar and cook until dissolved. Then take one tablespoon flour, stir smooth in one-third cup water and add to mixture for thickening. Let cool and add one teaspoon vanilla. Bake between the crusts and you will find it an excellent substitute for cherry pie.

Never Fail Pie Crust.—One cupful of flour, pinch of salt, two generous tablespoonfuls of lard, three tablespoonfuls of cold water. Mix flour and lard thoroughly with hands, then add water. This makes one large piecrust which never fails to be flaky and tender.

MEAT.

Meat Loaf.—One pound of round steak, one-half pound of fresh pork, one-half pound of veal; grind all together or have the butcher do it for you; add one egg, one tomato, either fresh or canned; one-half green sweet pepper, chopped fine; two-thirds cupful of bread crumbs; salt and pepper to taste. Mix all well and form in two loaves and put in the roaster with a little water and a slice of bacon on top of each and roast about one hour and a half; will serve eight people and is also good sliced cold for lunch; the tomato keeps it moist.

Baked Meat.—Put pieces of leftover steak through food chopper; add one-fourth quantity of bread crumbs; season with salt and pepper; mix with milk to moisten and bake twenty to thirty minutes.

FAVORITE RECIPES.

Saratoga Chips.—Peel good sized potatoes and slice them as evenly as possible. Drop them into cold water—ice water is better; have a kettle of hot lard as for cakes;

cup sugar and mix well. Add one tablespoonful of this on each tart. Dust with powdered sugar. Let rise for half an hour and bake for twenty minutes in hot oven.

Date Tarts.—One cup sliced dates, one cup of sugar, three eggs, one cup of walnut meats cut fine, one-half cup of flour, one-half teaspoon soda; mix as for a cake and bake. Before serving cold, dip one-half cup of milk over the cake. Serve with whipped cream. This will serve twelve persons.

USEFUL HINTS.

Bent whalebones can be straightened by soaking them in boiling water for a few moments and then ironing them straight.

Rice to be a useful article of food should be stewed with milk, butter or stock, which will supply the want of natural fat.

Salt will curdle milk. Hence, in preparing milk porridge, gravies, etc., the salt should not be added until the dish is prepared.

Dry flannels quickly after washing, and when nearly dry press with a moderately warm iron, and they will shrink but little.

To keep the larder sweet place a pan of charcoal in the larder, for this helps greatly to keep everything sweet and wholesome.

A few drops of oxalic acid should be added to water in which white stockings are washed to remove the stains caused by shoes.

A thick slice of onion laid on top of a roast, when put into the oven will impart a fine flavor to the meat, also to the gravy.

Cold water dashed on the face and chest each morning gives nearly the same effect as the cold sponge, without danger of shock.

When the ribbon bows on a hat get out of shape, try heating the bowl of a large kitchen spoon and pressing the bows with it from the inside.

Mould can be kept from the top of preserves by putting a few drops of glycerine around the edges of the jar before screwing on the cover.

A flower-pot cover is made of either gathered silk or crinkled paper drawn around the cardboard shape in a deep frill hem at the top and bottom.

To cut a loaf of hot brown bread take a piece of twine, place it around the loaf, cross the ends and pull. There will be a clean cut without crumbs.

When cooking vegetables, such as onions, cabbage, etc., which emit a disagreeable odor, try boiling with them a generous piece of stale bread.

Add a piece of wax the size of a bean and a teaspoonful of powdered borax to your starch while it is boiling if it is desired to brighten the polish.

Dry, grate and bottle all your lemon and orange rinds, and they will be ready for use in dishes and sauces that call for the grated rind of a lemon or orange.

wants. The owner of the parasol continued to reflect idly, speaking aloud. "That shed is a blot on the landscape, anyhow! Why, what's that?"

She heard a cry—a strange, wavering cry of complaint—rising from close beside her.

She rose and gazed round. As she did so her heart seemed to stop. For the scene which she beheld was one the like of which the owners of red parasols and Paris gowns are by no means accustomed to see every day.

Close under the side of a mighty boulder, a little way up the hill, lay a dead sheep, and beside it stood its lamb.

But the bleat was more than a mere expression of sorrow at the mother sheep's decease.

In the sky, just above the lamb, a black shadow hovered—the black shadow of the golden eagle from Dalna.

The eagle's mighty pinions hardly moved; every detail of its body was visible, and its yellow eyes were fixed intently on its prey. In another instant that hooked beak would be plunged into the little white body, and those sharp talons buried in its immature wool, and the tiny, bleating thing carried off through the air to the eyrie on the cliff.

The little lamb bleated again, and at the same instant the eagle dropped on it like a thunderbolt from above.

But the owner of the red parasol had already leaped forward. Brandishing the parasol, she rushed to the defence of the lamb. Whether she managed to strike the eagle or not, she hardly knew, but, at all events, she surprised it, and, for the moment, beat it off. With a whirr of its wings, it soared heavenward once more.

The girl impulsively bent down, picked up the trembling little victim, and pressed it to her bosom.

She looked up into the air. "Will it come again?" she asked herself anxiously. "And if it does come again, shall I have the strength to fight it?"

The eagle had risen to an enormous height, and was now a mere speck. But, even as she looked, it grew larger with appalling quickness. It was descending in an almost vertical line. Yes; it was going to attack again.

The girl trembled. She looked round wildly. It was impossible for help to come. Not a human being was in sight. Away across the loch were the stranger's shed and cottage; but, even if he had wonderful eyesight, and could see her plight, he could not come to her rescue. The loch lay between them. The way round by the loch's head was at least half a dozen miles.

No; she must fight the eagle alone and unaided.

Even as she came to this conclusion it was on her—the fierce beak, the clutching claws, the yellow, glaring eyes. But she felt the lamb pushing closer into the safety of her breast; strength seemed to come to her, and she faced the enemy unflinchingly.

Once again she beat at the eagle with her parasol, and this time its stick broke. But once again the eagle was frightened off, and rose skyward.

She watched it, gasping, the broken parasol still in her hand. As a weapon it was now practically useless. Would the eagle return? If it did, all was over.

Her eyes followed the eagle as it began to describe vast circles in the air above her. It was not in

some token, almost superstitiously—waiting for some sign, I knew not what—that the moment had arrived for me to launch myself forth over the loch. It takes a bit of pluck, you know!" He smiled again thoughtfully.

He resumed: "To-day, when I saw your plight through my field-glasses, and realized that I couldn't possibly come to your aid on foot, it dawned on me that I must use the flying-machine—must—must! The sign had come. It was an inspiration. Behold in two minutes I was flying—flying, with the knowledge that the machine I bestrode was worth a fortune, and had given me the right to speak once more to my Rose!"

Her cheeks were flushed, her eyes sparkled. She placed her hands in his.

"I have never been happy since we parted, Harry; and this last London season so bored me, so saddened me, that I came alone to the shooting-lodge, where I have been staying— She hesitated. "I wanted to be alone, because—because"—the tears choked her—"because I was longing for you!"

He lifted her face and kissed her lips. So, if the golden eagle was watching from Dalna, it witnessed yet another notable occurrence in the drama of Ardgarron. But, though it doubtless saw the wings of the aeroplane, it was blind to the phantom flutter of a smaller, lovelier pair of wings—the wings of Cupid.—London Answers.

HISTORY FROM TOYS.

German City Noted for Dolls With Porcelain Faces.

Nuremburg, Germany, has been noted for its toys since the Middle Ages. From the fourteenth century the city has been noted for its dolls with porcelain faces, says the London Globe. At the time of the Renaissance the Nuremburgers began constructing dolls' houses such as those which are so much admired to-day. In 1572 the Elector Augustus of Saxony ordered a table service for his three daughters, consisting among other articles of 71 plates, 150 glasses, 36 table spoons and 28 egg cups.

This has come down to posterity, and it is a historical document in a sense, for there are no forks in the service. Forks belong to a later period. Albert IV. of Bavaria had constructed a realistic house for his children. It was completed from cellar to greenhouse; even the household chapel and ballroom were included. In the grounds were stabling and a menagerie. This is another historical document, for much is to be learned of the elegance of the time from this toy.

DID NOT WANT DUCKS.

In a certain village a lady started a poultry farm with the uncertain foundation of a barn door hen and thirteen eggs.

Not having even the most elementary knowledge of poultry, she inquired of a friend how long eggs generally took to hatch. She received the reply:

"Three weeks for chickens and four for ducks."

The lady friend met her some time afterwards, and on being asked how the poultry farming was going on, she replied, with a lowered countenance:

"Oh, I've finished with it; at the end of three weeks there were no chickens, so I took the hen off as I didn't want ducks."

crumbs; season with salt and pepper; mix with milk to moisten and bake twenty to thirty minutes.

FAVORITE RECIPES.

Saratoga Chips.—Peel good sized potatoes and slice them as evenly as possible. Drop them into cold water—ice water is better; have a kettle of hot lard as for cakes; put a few at a time into a towel and shake to dry the moisture out of them and then drop them into the boiling lard. Stir them occasionally and when of a light brown take them out with a skimmer and they will be crisp and not greasy. Sprinkle salt over them while hot.

Pigs in Blanket.—Make a very light baking powder biscuit dough, roll this and cut in squares; take well seasoned pork sausage, without casings, and wrap a little in each square of biscuit dough; draw firmly together and bake a delicate brown.

SALMON.

Salmon and Rice Croquettes.—Cook one cupful of rice until tender, then set away to cool. Take one can of salmon, pick in small pieces with a fork; be sure and get all bones out. Then stir in rice and mix well together. Boil in small balls, dip in beaten egg, then in cracker or breadcrumbs, and fry in hot lard. Serve hot with tomato sauce. Can be made with rice that is left over.

Salmon Loaf.—Drain all oil from a large can of salmon, then remove all bones. Beat together four eggs until light, then add a cup of breadcrumbs, a scant cup of cream, juice of a lemon, salt to taste, and a dash of red pepper. Mix all together and bake or steam thirty minutes. This will serve twelve people, and is excellent for a luncheon.

BOILING TIME.

The following valuable table of time for the boiling of vegetables will be of use to many cooks:

Asparagus, fifteen to twenty minutes.
Beans (shell), one to two hours.
Beans (string), two hours.
Young beets, forty-five to sixty minutes.
Carrots, forty minutes.
Cabbage, thirty to forty-five minutes.
Onions, thirty to forty-five minutes.
Peas, twenty to thirty minutes.
Spinach, twenty to thirty minutes.
Tomatoes, fifteen to twenty minutes.
Turnips, two or three hours.

TARTS.

Mince Tarts.—In the center of a four inch square of pie paste place a small mound of mincemeat prepared as for pies. Gather up the four corners and pinch the edges close together. Place a lump of butter on top of each one and sprinkle well with cinnamon and sugar. Bake and serve with brandy sauce.

Bohemian Tarts.—Two quarts flour, two teaspoonfuls salt, one-half cup melted butter, one-quarter cup sugar, two eggs, and one pint lukewarm milk. Add one cup raised yeast and make a slight sponge. Set in warm place for two hours to rise. Then roll sponge to about one inch thickness and cut into three inch squares and place in greased pan. In the meantime boil one pound prunes till soft, remove stones and chop fine. Add one-half

cup of piece of raisins, and add a teaspoonful of powdered borax to your starch while it is boiling if it is desired to brighten the polish.

Dry, grate and bottle all your lemon and orange rinds, and they will be ready for use in dishes and sauces that call for the grated rind of a lemon or orange.

SAVED FROM WORKHOUSE.

Story of Robert Blatchford, the English Socialist.

Robert Blatchford, best known as editor of the Clarion and author of "Merrie England," has put into his stories many of his own adventures in London, where, as a mere boy, he walked the streets, hunting for work to save himself from actual starvation. The following story, quoted in A. Neil Lyons' life of Blatchford, has served "interests," chief of which, perhaps, is its testimony to the enduring quality of the mother passion. The boy, tired out and despairing, had finally gone to the police office for a ticket to the Clerkenwell Workhouse. Waiting outside with other vagrants, he sat down on the pavement by a miserable woman.

She was a swarthy woman, her skin tanned by long exposure to the weather. She wore no bonnet, and was smoking a short black pipe. I watched her for some time, and thought what a bold, hard, wicked face she had, and at length, more from curiosity to hear her speak than for any desire for information, I ventured to ask her a question about the tickets.

She turned upon me with a scowl, which gradually melted away as she looked at me, and at last said, not unkindly:

"What do you want to know for, boy? You're not going to Clerkenwell, are you?"

I said I was. She sat smoking for a few minutes, then took her pipe from her lips and stroking her chin with her great brown hand, said, very much to my surprise:

"You mustn't; no, you mustn't. You're only a boy, and not used to any kind o' wickedness, I can see. Don't you go, boy; don't you go."

"I have no other place to sleep," I said.

She shook her head. "Sleep in the streets; boy, sleep on the bridges; anywhere but there. It's the worst workhouse in all London. No, you mustn't go."

"But you are going."

"Oh, me," she said, and laughed. "It's good enough for me. But you are different. Ah, don't be stubborn. Take an old woman's advice. It's a cruel place. Don't go, don't go."

"I'm not a child," I said.

She laughed again, not pleasantly, and answered, "You know nothing, nothin'. I know all. Been through it all."

Then, very earnestly, she continued, leaning close to me, "Be advised, now. Be told. I know these places; and I've had sons of me own. Don't go; don't go. D'ye hear?"

I rose up wearily from the pavement.

"I will take your advice," I said. She nodded and put the pipe back in her mouth.

"Good," she said, "good boy. Now you're talkin'," and turned her attention another way.

A bunch of horses was seized at Duck Lake by the R.N.W.M.P. last week, the owner having smuggled them from the United States.

"Dr. Miles' Nervine Completely Cured Our Little Boy of Fits."

A family can suffer no greater affliction than to have a child subject to fits or epilepsy. Many a father or mother would give their all to restore such a child to health.

"I am heartily glad to tell you of our little boy who was completely cured of fits. He commenced having them at 10 years of age and had them for four years. I tried three doctors and one specialist but all of them said he could not be cured, but Dr. Miles' Restorative Nervine and Dr. Miles' Nerve and Liver Pills made a complete cure. He is now hale, hearty and gay. It has been three years since he had the last spell. I shall give Dr. Miles' medicines praise wherever I go. You are at liberty to use this letter as you see fit and anyone writing to me I will gladly answer if they enclose stamp for reply."

F. M. BOGUE, Windfall, Ind.

Dr. Miles' Nervine

is just what it is represented to be, a medicine compounded especially for nervous diseases, such as fits, spasms, St. Vitus' dance, convulsions and epilepsy. These diseases frequently lead to insanity or cause weak minds. Dr. Miles' Nervine has proven most effective in relieving these dreaded maladies.

Sold by all druggists. If the first bottle fails to benefit your money is returned.

MILES MEDICAL CO., Toronto, Can.

WAS AN ACTOR.

Bernard Partridge, "Punch's" Chief Cartoonist, is Versatile.

Mr. Bernard Partridge, who, ever since the death of Linley Sanbourne, has been "Punch's" principal cartoonist, was at one time an actor as well as artist; but it is now many years since he trod the boards.

His last theatrical appearance took place sixteen years ago, when he appeared as a dashing Bulgarian officer in Bernard Shaw's play, "Arms and the Man."

Like many another artist, Mr. Partridge began to draw when quite a child. Drawing was a passion with him. He was sent as a pupil to an Endell street architect, but found sitting at a desk such uncongenial work, that, though he stood it for six months, at the end of that time he decided he wasn't built for commercial life, and gave it up.

His people were in despair. But at eighteen, quite "off his own bat," as the schoolboys say, he got in with a firm of designers, and started work in real earnest.

The firm with which he became connected went in a great deal for ecclesiastical work, and turned out beautiful altar-pieces, stained-glass windows and such-like.

His talent was at once recognized, and he was given a free hand, and encouraged to develop on his own special lines, and turned out some really wonderful things.

At Ryde, Isle of Wight, there is a beautiful altar-piece, which shows the style of Mr. Partridge's work at this time, while yet another, at Haverstock Hill, bears witness to his talent.

It is just on twenty years since Mr. Partridge became a regular member of the famous "Punch" staff.

Three weeks before the death of Mr. Gilbert a Becket he was asked to contribute a drawing to "Punch," and when, a short time later, there was a vacancy on the staff, he was asked to fill it, and at once accepted.

Mr. Partridge tells an amusing tale of how he once personally submitted some of his work to a painter.

Will Farmers Gain or Lose When Canada's Door is Open?

Is the United States Market Worth the Price that we Must Pay for it under Reciprocity?

A Question For Farmers.

From the Canadian Century.

When we allow vast quantities of food from Australia and the twelve favoured foreign nations to come freely into Canada how are we going to prove to American customs officials that the farm products we are trying to send across the United States boundary were really produced in Canada? Ask your neighbors this question.

We may be sure that the farmers of the United States will insist upon customs regulations that will prevent Canada becoming the back door entrance to the United States for all the great food exporting countries of the world. The enforcement of these regulations will be very annoying. The necessity of proving that every consignment of food imported into the United States from Canada is actually Canadian will scare American buyers. They will naturally pay lower prices for Canadian farm products than for American farm products when they have to take the risk of disputes with customs officials as to whether they are genuine Canadian or come from countries overseas.

Prices are always fluctuating in the United States, and while a consignment of Canadian butter or eggs is being held up at the United States customs awaiting proof of genuineness the price may go down.

Australasian Food for Canada.

During the fiscal year ending March 31, 1901, there came to Canada from Australia and New Zealand 569,989 pounds of butter, 1,149,979 pounds of fresh mutton and lamb, 107,383 pounds of canned meats and small quantities of other meats. In view of the fact that such quantities are imported under the present tariff, what may be expected when the duties on butter and cheese are abolished and the duties on meats greatly reduced as a result of the Reciprocity Compact with the United States.

Farm products from Australia and New Zealand come in by way of both the Pacific and the Atlantic. New Zealand frozen lambs coming in by way of Vancouver have been sold as far east as Winnipeg. A large consignment of lamb carcasses from New Zealand has just reached St. John, N. B.

The New Zealand steamship "Aorangi" is now on its way to San Francisco with 5,000 carcasses of New Zealand mutton and large quantities of butter. They cannot pass into the United States without payment of high customs duties. Is it not probable that such cargoes will be diverted to Canadian ports when the Reciprocity Agreement goes into effect?

There is nothing in the Reciprocity Compact binding the United States to admit farm products free or at reduced rates from Australia, New Zealand and the twelve foreign countries that have favoured nation treaties with Canada.

He Loses His Bet.

A New Brunswick farmer writes to The Canadian Century as follows: "There may be something in what you say about the danger of competition from great food exporting countries like Australia and Argentina, but I'm willing to bet that not one pound of food will come to Canada from Switzerland, which is one of the twelve countries you mention as entitled to the privileges of the Reciprocity Agreement. What do you say to that?"

You lose your bet. During the fiscal year ending March 31, 1910, 227,954 pounds of cheese were imported into Canada from Switzerland. The Canadian customs tariff on cheese was three cents per pound. Is it not reasonable to suppose that when Swiss cheese can come into Canada free the quantity imported will increase rather than diminish?

Prices in the United States.

Even if the Reciprocity Agreement did not let in Australia, New Zealand and twelve foreign nations besides the United States, even if the favoured nation treaties could be got rid of so that Canada could open its markets to the United States alone, the majority of Canadian farmers would gain nothing by Reciprocity, while they would take very great risks.

Anyone who makes a careful study of the markets in the United States will note that the prices vary in different sections of the country. Boston, New York, Philadelphia, Buffalo, Detroit, Chicago, St. Paul, St. Louis, New Orleans, and San Francisco all have different prices, and there is a still greater variation in prices in small cities, towns and villages throughout the country.

The Canadian farmer should compare the prices he obtains for his products in a small village near his farm, not with the prices in Boston, New York, Chicago, or some other large city in the United States, but with the prices obtained by farmers in small villages in the United States equally distant from the great centres of population. He must take into consideration not only the cost of transportation to the big cities of the United States, but also the middlemen's profits.

A table of comparative prices in Montreal and Boston the week the Reciprocity Compact was made was compiled by The Montreal Herald, a Liberal newspaper, with the assistance of a number of prominent produce dealers and food experts. Cheese, eggs, live poultry, carrots, celery, lettuce, onions, squash, tomatoes, beans and cranberries all commanded higher prices in Montreal than in Boston. The best creamery butter was 1½ cents per pound higher in Boston than in Montreal, while storage creamery butter was one cent higher in Boston. Dressed poultry averaged about the same in the two cities. Hay and oats were considerably higher in Boston.

Since then butter prices have declined in most of the markets of the United States. A leading produce dealer of Montreal received the other day a telegram from Chicago offering him 300 tubs of September creamery butter, cold stored, at 18 cents, Chicago. At the time this telegram was received the same kind of butter was worth 24 cents to 25 cents in Montreal.

Mr. Gage, President of the Toronto Board of Trade, recently prepared a table of prices in Toronto and New York, comparing the Toronto market reports with the New York market reports as given in the New York Commercial Bulletin. The table follows:

Product	Toronto price	New York price
Best creamery butter in prints wholesale.....	26c	26½c
Prime chickens.....	18-20	15
Prime turkeys.....	20-22	18
Ducks.....	18-20	15-16
Geese.....	15-16	14
Bacon.....	16-16½	16½
Hams.....	13½-15	14

Synopsis of Canadian Northwest Land Regulations.

ANY person who is the sole head of a family, or any male over 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties.—Six months' residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter-section alongside his homestead. Price, \$3.00 per acre. **Duties.**—Must reside six months in each of six years from date of homestead entry (including the time required to earn homestead patent and cultivate fifty acres extra).

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may take a purchased homestead in certain districts. Price \$3.00 per acre. **Duties.**—Must reside six months in each of three years, cultivate fifty acres and erect a house worth \$300.00.

W. W. CORY,

Deputy of the Minister of the Interior.

of the famous "Punch" staff.
Three weeks before the death of Mr. Gilbert a Becket he was asked to contribute a drawing to "Punch," and when, a short time later, there was a vacancy on the staff, he was asked to fill it, and at once accepted.

Mr. Partridge tells an amusing tale of how he once personally submitted some of his work to a paper. The sketches he took were those of light opera.

The editor at once seized upon one of them, and exclaimed, with the greatest conviction: "This isn't a bit like Miss Brown!"

"No," said Mr. Partridge blandly. "Not in the least!" thundered the editor.

But Mr. Partridge kept calm. "Perhaps," he said, "that is because it is supposed to be Miss Smith, and not Miss Brown!"

Like a Man.

"Well, old Jenkins certainly bore his misfortune like a man," said his friend.

"Ah! Courageous, and all that sort of thing, what?" said the man who did not know Jenkins.

"Well, not so much that," said his friend. "As a matter of fact, he made rather a fuss about it. What I meant was that he blamed it all on his wife."

A Difference.

"He asked old Gotrox for his daughter's hand."

"What did he get?"

"Gotrox's foot."

may be completely eradicated if properly treated. We sell a remedy that we positively guarantee will completely relieve indigestion or dyspepsia, or the medicine used during the trial will cost the user nothing.

This remedy has been named **Rexall Dyspepsia Tablets**. Certainly no offer could be more fair, and our offer should be proof positive that **Rexall Dyspepsia Tablets** are a dependable remedy.

Inasmuch as the medicine will cost you nothing if it does not benefit you, we urge you who are suffering with indigestion or dyspepsia to try **Rexall Dyspepsia Tablets**. A 25c box contains enough medicine for fifteen days' treatment. For chronic cases we have two larger, 50c and \$1.00. Remember you can obtain **Rexall Remedies** only at—**The Rexall Store, T. B. Wallace, Druggist.**

A LIVE CITY.

Hanover Is One of the Most Progressive Cities of Europe.

One of the most progressive and up-to-date cities of Europe is Hanover. It is full of interest to the tourist and its citizens are noted especially for their energy. For rapid progress it more closely resembles American cities than any other city on the continent. William E. Curtis, of the Chicago Record-Herald, writes very interestingly concerning this German city. Among other things he says:

Although it is so old and in several respects so antiquated, Hanover is one of the most enterprising cities in Germany, and is growing as rapidly as some of the boomed cities of America. The population in 1840 was 27,000, in 1850 it was 49,900, in 1880 it was 106,667, in 1900 it was 266,753 inhabitants, an increase of 33,000 during the last 10 years, or an average of 3,000 a year. Most of the newcomers are from the country districts, being attracted to the city by its commercial and industrial advantages. Almost every industry is represented among the factories, and the energy and enterprise of the population has been recognized for a hundred years. Hanover was the first town in Europe to use gas; it was one of the first to use electricity; it was the second to run street cars, and the second to adopt asphaltum for pavements.

The business section of the city is built up closely with fine large blocks of modern buildings. The residence portion will compare favorably with any other city in Germany, but it is a question whether the people are prouder of the modern palaces and the broad streets upon which they stand or the old part of the city, with its antiquated architecture and its narrow, crooked, laneklike thoroughfares. In the old town you can see where the ford was from which the city derived its name. Six highways running from different parts of Germany concentrated at a shallow place in the Leine river, the Hohen Ufer, as it was called, a phrase that was gradually corrupted into Hanover.

The Business of Life.

Life is a business we are all apt to mismanage, either living recklessly from day to day or suffering ourselves to be gulled out of our moments by the inanities of custom. We should despise a man who gave as little activity and forethought to the conduct of any other business. But in this, which is the one thing of all others, since it contains them all, we cannot see the forest for the trees. One brief impression obliterates another. There is something stupefying in the recurrence of unimportant things, and it is only on rare provocations that we can rise to take an outlook beyond daily concerns and comprehend the narrow limits and great possibilities of our existence.—Robert Louis Stevenson.

A Writer's Indoor Experience on a Cold Night in Bordeaux.

What beautiful sunshine we had at Bordeaux, and how nice and warm it was in the daytime! As long as the sun kept out it was lovely; but, oh, when the sun went down!

They gave me a beautiful, large, lofty room at the hotel with doors and windows all over it. After dinner I went up to try to write, and then I found that Siberia had come again. I put great logs of wood upon the fire and blew them with the bellows till the flames roared up the chimney, but still I shivered in the icy blasts that blew through every crevice. I put on my ulster, I dragged the blankets from the bed, I ran races around the room and practiced the Indian clubs with a heavy portmanteau in each hand, but still I felt my blood congealing, and the horrors of the early morning came back again.

In this dilemma my companion's Sudan experiences stood us in good stead. He was with Gordon in the expedition of 1874-7. He took our walking sticks and umbrellas, and with these and the blankets and the rugs he rigged up a nice, comfortable tent in front of the fire.

Sitting in this tent in our big room we at last got warm, and my fingers were able to hold a pen.—George R. Sims in "Dagonet Abroad."

Queer English Custom.

Persons aspiring to become bailiff at Alnwick, England, have to go through a curious and somewhat unpleasant ordeal. Before the election the various candidates ride up in a body to a horse pond and, there dismounting from their steeds, plunge into the water and struggle as best they may to the other side. The music of a brass band cheers them during their struggles in the dirty water. This ancient custom dates from the reign of King John, who once paid a visit to the town in 1210 and found no fitting welcome prepared for him. The blame for this state of unpreparedness was fastened on the luckless bailiffs, who were promptly thrown into the horse pond by royal command.

Phosphonol

(The Electric Restorer)

MAKES WEAK MEN STRONG

PHOSPHONOL restores every nerve in the body to its normal tension.

Nerves that have been dormant for years will vibrate once more with vigor. Two boxes of PHOSPHONOL have been known to make weak men feel as they did at eighteen.

Weakness is converted into strength where PHOSPHONOL is used; premature decay is impossible; sexual weakness is converted into strong manhood, both physically and mentally.

PHOSPHONOL is your medicine, regardless of your condition or age.

PHOSPHONOL is a new remedy, prepared upon purely scientific principles, by expert chemists. It produces results.

PHOSPHONOL promptly dispels all forms of nerve weakness, such as lack of control, twitching of nerves and muscles, despondency, mental worry, blues, indecision, weak heart and impoverished blood.

Price, \$3.00 a box, or two boxes for \$5.00. We will mail this to any address under separate cover on receipt of price. **THE PHOSPHONOL DRUG CO., St. Catharines, Ont. 13d**

Children Cry for Fletcher's

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of *Chas. H. Fletcher* and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

The Kind You Have Always Bought

In Use For Over 30 Years.

THE CENTAUR COMPANY, 77 MURRAY STREET, NEW YORK CITY

Trained Nurse on Zam-Buk.

Read What She Has Found.

Miss J. Keith of Olds, Alta., a trained nurse, who has had a wide experience of Zam-Buk, speaks of it as follows: "I wish to express my high appreciation of Zam-Buk. I have personally tested it in a great number of cases and find it excellent. I have introduced it to several patients, with highly satisfactory results. Indeed, in many cases I have been warmly thanked for its introduction. "Speaking professionally, I would give all sufferers from skin disease, the following advice: Cleanse the parts affected and apply Zam-Buk freely and regularly. Use clean lint and clean, soft rags for drying. Zam-Buk and cleanliness will be found sufficient for the most stubborn case of disease."

Zam-Buk will also be found a sure cure for abscesses, ulcers, blood-poison, varicose ulcers, scalp sores, eruptions, children's rashes, piles, cuts, burns, abrasions, scratches, scalds, and all skin injuries and diseases. 50c box, all druggists and stores. Try Zam-Buk soap, too; 25c. per tablet.

Rene's Seat Girt Tomb.

Francis Rene, Vicomte de Chateaubriand, some twenty years before his death, writing to the mayor of St. Malo, his native town, made the re-

Foiled the Match Scraper.

The new boarder stepped into the room and closed the door. The landlady stood in the hall until she heard him exclaim, "Hang it all!" Then she chuckled softly and went downstairs.

"Saved, and by vaseline," she said. "My detective instinct told me that that man is the kind that scratches matches on the woodwork. Many a door jam and mantelpieces in the vicinity of gas jets has been scratched past redemption by match fiends who had no respect for the furniture. But I have got the best of them. I simply smear with vaseline the woodwork that is convenient for scratching matches; then the matches won't light. The man doesn't know why, but he never tries it again."

The Arabic Day.

The Arabic day begins at sunset, and the particular one which begins any month is that on which the new moon is first seen after sunset. Apart from the cloudiness of the sky, there may be and generally is considerable difficulty in seeing the crescent, lost, as it must always be, in the radiance of the sea sun, and consequently there is always uncertainty for some time after sunset whether the day that has just begun is to be reckoned with the last month or as the first of a new month.

Cream of Celery Soup.

Cook one head of celery stalks and light leaves in a pint of water for forty-five minutes; mash the celery and put through a puree strainer; add a pint of cold milk and thicken with

HIBERNATING ANIMALS.

Many Creatures of Lower Order Which Sleep Through the Winter.

That certain animals retire to a concealed place and remain dormant or in a state of greater or less lethargy during the winter months is a well-known fact. That during this time they take neither food nor drink is likewise known, but just how life is sustained under these conditions no one knows.

A number of hibernating animals acquire a great amount of fat, usually just under the skin, and during the dormant period, as the naturalist theorizes on the subject, this is consumed by its possessors by absorption, and they come out of the sleep in the spring much attenuated, but in the case of serpents, frogs, toads and bats no such accumulation has been noticed. In order that a certain amount of heat may be maintained it is the habit of these creatures to conceal themselves in warm places or to congregate in secluded quarters. Bears, hedgehogs, raccoons, opossums and such animals go into holes in trees, hollow stumps, crevices in the rocks or beneath the roots of fallen trees. Woodchucks and their kind retreat to the depths of burrows made by themselves, in which they live in the summer and deepen for greater warmth and protection during the winter sleep.

Frogs and toads sink into the mud, so do alligators, crocodiles and all lizards. Shellfish dig down into the soft bottoms of their water holes and the catfish and the big mouth or Oswego bass forget their summer cares and go to sleep when winter comes.

The best example of perfect winter sleep is seen in bats. At the beginning of cold weather these creatures huddle together in bundles, become comatose and do not stir until warm weather comes again. An old hollow tree, or best of all a cave, affords the bats their winter protection.

Four Great Musicians.

Palestrina was a revolutionist in his day, but is now virtually obsolete even for the severest classicists. Gluck was as radical an innovator as Wagner, yet it is only occasionally and with difficulty that one of his works can now be briefly resuscitated. Beethoven was a madman even to many of the best musicians as late as 1805, when, as that musical veteran, Prof. Haupt, himself said the "Fifth Symphony" was rehearsed in Berlin for the first time and the orchestra dashed the music from the racks, declaring it was crazy and could never be played. Now this same "Fifth Symphony" is considered a model of form, and its composer is the cherished idol of conservatives and classicists.

Two Sunsets Per Day.

There is one place in the world where the sun sets twice daily, and that is at Leek, in Staffordshire, England. The reason of this is that a jagged mountain is situated to the west of the town, and in the evening the sun sets behind it and darkness comes on. Then the first sunset occurs, the gas lamps are lit, and apparently night has set in. But it has not, for in the space of an hour or so the sun reappears again through the opening at the side of the mountain, and daylight again appears. Artificial lights are extinguished, and daylight again prevails until the sun descends below the opening and the second sunset occurs and night comes to stay.

Berlioz.

Berlioz, the famous French composer, was made miserable by his wife. He married Miss Smithson, an actress, many years younger than himself. She had prolonged fits of jealousy and ill temper, ruined him by her theatrical ventures and finally fell

AN ARCTIC DELICACY.

Eskimo Soup Would Hardly Tickle Refined Palates.

Kape and Dr. Hayes, the first white men apart from an occasional whaler—to visit the Eskimos, found some difficulty in accommodating themselves to local customs. In "The Toll of the Arctic Sens" D. M. Edwards quotes Hayes' account of his first visit to a native hut. After a cordial welcome he was pressed to eat.

"This," says Hayes, "was an invitation which I feared, but now that it had come I knew that it would be unwise to decline it. The expression of thanks was one of the few in their language that I knew, and I made the most of this. They laughed heartily when I said koyenak in reply to their invitation, and immediately a not very beautiful young damsel poured some of the contents of the pots into a skin dish, and, after sipping it to make sure, as I supposed, that it was not too hot, passed it to me over a group of heads. At first my courage forsook me, but all eyes were fixed upon me, and it would have been highly impolite to shrink. I therefore shut my eyes, held my nose, swallowed the dose and retired. I was told afterward that it was their greatest delicacy—a soup made by boiling together blood, oil and seal intestines."

Origin of a Song.

The grumbling of a negro groom led to the composition of the immortal

Zam-Buk soap, too; 25c. per tablet.

Rene's Seat Girt Tomb.
Francois Rene, Vicomte de Chateaubriand, some twenty years before his death, writing to the mayor of St. Malo, his native town, made the request that the town would grant him on the west point of the rock of Grand bay a space sufficient for his burial. To this island rock, accessible only at low tide, the body of the great French litterateur was brought at his death. A granite cross marks the spot. At high tide the rock becomes an island, and the waves of the Atlantic beat against this lonely grave.

Announced Himself.
While looking for stragglers just as a Welsh regiment was about to sail from Cape Town for England an officer found a private standing at attention in a shed. "What are you doing here?" he was asked. "Please, sir," was the reply, "I am a lunatic, and I am waiting for the corporal's guard." He was right; he was a lunatic, and his guard had forgotten him.

Where He Made It.
"Hello, Binks!" said Wobbles. "I hear you've been in the chicken business."
"Yep," said Binks.
"Made anything out of it?" asked Wobbles.
"Yep," said Binks. "Ten thousand dollars."
"Ten thousand dollars in the chicken business?" demanded Wobbles.
"Nope. Out of it," said Binks.

Would Cook Whole Ox.
A South African baker has perfected a baking process by which steak is grilled at a temperature of 1,000 degrees. Steam at 220 degrees is transformed through pipes and a super-heater into the grilling air. The hot air will cook thoroughly a whole ox.

Light on a Dark Subject.
Caller—There's one question I should like to have answered. When a thought flashes across the intellect does it effect any molecular changes in the cellular or muscular tissues composing the material substance of the cerebral mass, or does it operate merely in the realm of the spiritual ego, thereby leaving no trace subject to detection or classification in the domain of substantiality? Information Editor (turning again to his desk)—There is no premium on the coin.—Chicago Tribune.

Swell Set Credentials.
Mrs. De Butt (making out a list of invited guests for dinner)—Can you think of any others?
Mrs. Von Setter—There is Mrs. Kumbac.
"I had thought of her, but she did not try to smuggle."—Philadelphia Ledger.

Worse Than Hard Words.
"Why did you kill your parrot? The poor bird meant nothing by its profanity."
"I could stand its profanity, but it learned to imitate the lawn mower last summer."—Washington Herald.

Prayer carries us halfway to God, fasting brings us to the door of his palace, and almsgiving procures us admission.—Koran.

CASTORIA
For Infants and Children.
The Kind You Have Always Bought
Bears the Signature of *Wm. D. Feltner*

with the last month or as the first of a new month.

Cream of Celery Soup.
Cook one head of celery stalks and light leaves in a pint of water for forty-five minutes; mash the celery and put through a puree strainer; add a pint of scalded milk and thicken with a teaspoonful of flour mixed with a little of the cold milk; add two table-spoonfuls of butter, salt and pepper to season and simmer ten minutes. Just before serving add a cupful of whipped cream with tiny pieces of browned croutons.

Constipation is the root of many forms of sickness and of an endless amount of human misery.

Dr. Morse's Indian Root Pills,

thoroughly tested by over fifty years of use, have been proved a safe and certain cure for constipation and all kindred troubles. Try them. 4
25c. a box.

Berlioz.
Berlioz, the famous French composer was made miserable by his wife. He married Miss Smithson, an actress, many years younger than himself. She had prolonged fits of jealousy and ill temper, ruined him by her theatrical ventures and finally fell from a carriage and broke her leg, thus ending her artistic career. Berlioz bore with her in patience until she finally felt him. He was a tall man, of stern aspect and very dignified. In spite of his immense musical abilities as a composer he could play no instrument except the guitar, and that very badly.

Lakes of Blood.
The name Lake of Blood or its equivalent has been given to places as far apart as England and South America. "Sanguelac"—i. e., the Lake of Blood—was the name given by the victorious Normans to the battlefield at Hastings, where the Saxons were overthrown and slain with terrible carnage. For a similar reason Lake Trasimene has borne the name "Sanguinetto" because its waters were reddened during the second Punic war by the blood of some 15,000 Romans who fell before the troops of Hannibal. Yet another Lake of Blood, called also "Yaguar Cocha," is situated in the state of Ecuador. It is one of a series of lakes formed by the extinct craters of volcanoes on the towering heights of the Andes range of mountains.

Or at Hooper's Drug Store.

dose and retired. I was told afterward that it was their greatest delicacy—a soup made by boiling together blood, oil and seal intestines."

Origin of a Song.
The grumbling of a negro groom led to the composition of the immortal "Old Folks at Home." While waiting for a change of horses at a Kentucky hostelry the composer, Stephen Foster, author of so many beloved darky melodies, heard a melancholy negro murmur as he threw a set of harness to the ground: "It's sick an' tired o' dis life. I wisht I was back wif de ole folks at home."
"Where may that be, Sam?" asked Foster.
"Oh," answered the darky, "way down on de Suwannee river."
The result was the song as we have it today.

You Can Get FREE a 50c. Bottle of Psychine (Si-Keen)

Because we want you to know this wonderful remedy as we know it.

Do you know another such sweeping proposition as ours?
Did you ever hear of anyone offering to prove any curative preparation along similar lines?
All the risk is ours, all the cost is ours.
You yourself are to be the sole judge of all we claim for Psychine.
Its beneficial effect alone will tell you, without prejudice, without any self-interest from any source.
It shows our confidence—this plan—does it not?
Yet our confidence to us is not phenomenal, not out of the way.
Nor would our confidence seem extraordinary to you were you in our place, and were you to know the things we know.

And Psychine builds these white corpuses because of certain medical herbs it contains, nature's true remedy. Which science now knows will do just that.
We go to great expense to make Psychine.
Our materials come from the ends of the earth.
They are compounded in one of the finest laboratories, in apparatus that is costly in the extreme.
But costly and all as it is we know what it will do, hence the reason of our buying a 50-cent bottle from your druggist and giving it you, free.
Now if you have any of these ailments, fill out the coupon and mail it to us to-day.
You'll never regret your decision so to do.

him the regular retail price) for a 50-cent bottle of Psychine to be given you free of cost.
We will undoubtedly buy and distribute in this manner, hundreds of thousands of these 50-cent bottles of Psychine.
And we do that to show our entire confidence in this wonderful preparation.
A confidence that has been based on our thirty years' experience with this splendid preparation, with a full knowledge of the hundreds of thousands of cures it has made.

We've known Psychine for a third of a century—almost a generation.
We know of the hundreds of thousands it has cured.
We have hundreds of thousands of unsolicited testimonials.
It doesn't require any great stretch of confidence to know from facts like these.

Psychine cures by increasing and strengthening the white corpuses of the blood, or phagocytes.
These white corpuses eat every disease germ that finds entrance to the body, when they're strong enough and in sufficient numbers.

AFTER DOCTOR'S FAILED

Lydia E. Pinkham's Vegetable Compound Cured Her.

Midgie Station, N. B.—One can hardly believe this as it is not natural, but it was my case. For ten months I suffered from suppression. I had

different doctors, tried different medicines, but none helped me. My friends told me I would go into a decline. One day a lady friend told me what your medicine had done for her, so I wrote you for advice and received your reply with pleasure.

I started taking Lydia E. Pinkham's Vegetable Compound, and at the second bottle showed improvement. Now I am regular and never was so well in my life, thanks to Mrs. Pinkham's medicine.

Please publish my letter for the benefit of others.—MRS. JOSHUA W. HICKS, Midgie Station, N. B.

Indian Head, Sask.—Lydia E. Pinkham's Vegetable Compound is indeed a boon to women who suffer from female ills. My health is better now than it has been in my five years of married life and I thank you for the good your advice and medicine have done me. I had spent hundreds of dollars on doctors without receiving any benefit.—MRS. FRANK COOPER, Box 448, Indian Head, Saskatchewan.

The most successful remedy in this country for the cure of all forms of female complaints is Lydia E. Pinkham's Vegetable Compound.

The Sicilian Vespers.

The Sicilian Vespers is the term given to the massacre of the French in Sicily, March 30, 1282. On Easter Monday conspirators assembled at Palermo, and while the French were engaged in festivities a Sicilian bride passed by with her train. A Frenchman used her rudely, and a young Sicilian stabbed him on the spot. The populace ran through the city crying out, "Let the French die!" and without distinction of rank, age or sex slaughtered all the Frenchmen they could find. About 8,000 were massacred. Not even the churches were allowed to become a sanctuary for them. The massacre was general throughout the island.

New Zealand Dairy Exports.

New Zealand is becoming yearly an increasing exporter of cheese and butter to the British market, a great development of the cheese-making industry especially having taken place within the last few years. In 1903 the total export of cheese was 2,356,432 pounds of the value of \$883,806. For 1910 the quantity as above noted was 49,491,008 pounds of the value of \$5,770,426, while for the first quarter of the current year (April 1 to June 30) the quantity exported was 15,308,048 pounds of the value of \$1,782,495.—Census and Statistics Monthly.

To Keep Young.

Think that you are young. On your birthday don't allow yourself to think that you are a year older. Keep mental cobwebs dust and brain ashes brushed off by frequent changes.

Don't be too ambitious. The canker of overvaulting ambition has eaten up

ELECTRIC LIGHTS.

Their Effect in the First Theaters in Which They Were Used.

The first theater in the world to use incandescent lamps was the Academy of Music, on Halstead street, Chicago, the plant being installed by the Western Edison Light company. The theater was wired for 150 sixteen candle power lamps. The lighting was confined to the auditorium. No electric lights were used on the stage, as dimmers had not been thought of at that time. On the opening night, after the new lights were installed, the actors struck, claiming that it was impossible to make up by gaslight and play their parts under the glare of the electric lights. It was with difficulty that they were persuaded to proceed with the second act.

The first theater to be completely lighted with incandescent lamps was the old Haverly theater, then located on Monroe street, where the Inter Ocean building now stands. This plant consisted of two dynamos with a capacity of 637 lamps. On the opening night only sufficient lights were started at first to enable the ushers to seat the audience. When the curtain rose every light was turned on, causing a tremendous sensation among the audience and eliciting applause that continued for fifteen minutes. The innovation was so successful that McVicker's theater and the Chicago Opera House immediately installed similar plants.—W. C. Jenkins in National Magazine.

A DENTAL CURIOSITY.

The Set of Artificial Teeth That Washington Endured.

It may not be generally known that the Father of His Country was one of the first Americans to wear artificial teeth. By the time the war of the Revolution had ended he had parted company with most of the outfit which nature had given him. An ingenious physician and dentist of New York city undertook the then unusual task of re-equipment and produced at length a full set of artificial teeth. These are now, of course, a dental curiosity and offer an additional proof of the heroism of our first president, for it is a matter of fact that General Washington wore those teeth for many years and, so far as we know, never complained of them.

The teeth were carved from ivory and riveted, wired and clamped to a somewhat ponderous gold plate. Three large clamps in particular figure conspicuously in the roof of the mouth and must have caused difficulty, if not anguish. There were an upper and an under set, and the two were connected and held in position relatively by a long spiral spring on each side, says Harper's Weekly.

Nevertheless Washington wore them long and well, a fact sufficiently attested by the worn and dented condition of both teeth and plate.

At the last account these teeth were the property of a dental institution in Baltimore.

You Take No Risk

Our Reputation and Money are Back of This Offer.

We pay for all the medicine used during the trial, if our remedy fails to completely relieve you of constipation. We take all the risk. You are not obligated to us in any way whatever, if you accept our offer. Could anything be more fair for you? Is there any reason why you should hesitate to put our claims to a practical

CURIOUS PERUVIAN TREE.

It Produces a Copious and Continuous Supply of Rain.

The rain tree of Peru grows very large, is rich in leaves and is called by the Indians *tamalcaapl*. It has the power of collecting the dampness of the atmosphere and condensing it into a continuous and copious supply of rain.

In the dry season, when the rivers are low and the heat great, the tree's power of condensing seems at the highest, and water falls in abundance from the leaves and oozes from the trunk. The water spreads around in veritable rivers, part of which filters into the soil and fertilizes it. These rivers are canalized so as to regulate the course of the water.

It is estimated that one of the Peruvian rain trees will on the average yield nine gallons of water per diem. In a field of an area of one kilometer square—that is, 3,250 feet each way—can be grown 10,000 trees separated from each other by twenty-five meters. This plantation produces daily 385,000 liters of water. If we allow for evaporation and infiltration we have 135,000 liters or 29,531 gallons of rain for distribution daily. The rain tree can be cultivated with very little trouble, for it seems indifferent as to the soil in which it grows. The tree increases rapidly and resists both extremes of climate.—Espana Moderna.

A BRAVE TOREADOR.

One of the Most Thrilling Incidents of the Bull Ring.

The famous Spanish toreador Reverte figured in one of the most thrilling incidents ever witnessed in the arena. It was at Bayonne. After disposing of two bulls Reverte had twice plunged

MOTHER-OF-PEARL.

How It Is Gathered By the Divers of the South Seas.

An interesting report concerning the mother-of-pearl industry in the South Seas, especially that of the Society Islands, is furnished by the consul at Tahiti. While shells are produced in all the islands, they are found of good quality and in paying quantities in fewer than one-fourth of the lagoons. The shells of the lagoons are regarded as the property of any natives of the colony who will dive for them. The hours for diving are from nine to two. The diver paddles his canoe out into the lagoon and anchors it, and if he happens to hit upon a good place he may not move his boat during the five hours. A basket to hold the shells is let down by a rope tied to the boat. On the end of another small rope, also tied to the canoe, is a piece of lead weighing from 15 pounds to 20 pounds. The diver, who wears only a narrow loin-cloth, places one foot upon the lead with the rope between his toes, stretches the rope with one hand held against his chest, utters several loud yells to empty his lungs, refills them quickly with pure air, and descends rapidly, foot foremost, to the bottom of the lagoon.

His goggles exclude the water and enable him to see from 12 feet to 15 feet. He bears the shells from their support, usually a piece of dead coral to which they are firmly fastened. He may fill the basket with 30 or 35 pounds of shells at once, and he may have to dive several times to fill it. When his time is up the diver ascends by means of the rope, and immediately waves his hand with a towel. He rests and warms himself in the sun for ten to fifteen minutes before going down again. A good diver will be able to dive 20 to 25 times in the five hours. This colony has the best divers in the world. They have all the way from six feet to 120 feet of water in their work, and

Think that you are young. On your birthday don't allow yourself to think that you are a year older. Keep mental cobwebs, dust and brain ashes brushed off by frequent changes.

Don't be too ambitious. The cancer of overhauling ambition has eaten up the happiness of many a life and shortened its years.

Put some beauty into your life every day by seeing beautiful works of art, beautiful bits of scenery or by reading some fine poem or selection in prose.

An Oversight.

A glutton once made a bet that he could eat ten apple dumplings at one sitting if the other party would pay for the accompanying wine. After the ninth dumpling, however, he declared himself beaten. Sadly he regarded the tenth dumpling, which still rested on his plate. Shaking his finger at it, he said: "Ah! If I'd known you'd be left over I'd have eaten you first."

to completely relieve you of constipation. We take all the risk. You are not obligated to us in any way whatever, if you accept our offer. Could anything be more fair for you? Is there any reason why you should hesitate to put our claims to a practical test?

The most scientific, commonsense treatment is Rexall Orderlies, which are eaten like candy. They are very pronounced, gentle and pleasant in action, and particularly agreeable in every way. They do not cause diarrhoea, nausea, flatulence, griping or any inconvenience whatever. Rexall Orderlies are particularly good for children, aged and delicate persons.

We urge you to try Rexall Orderlies at our risk. Two sizes, 10c and 25c. Remember, you can get Rexall Remedies in this community only at our store—The Rexall Store. T. B. Wallace, Druggist.

One of the Most Thrilling Incidents of the Bull Ring.

The famous Spanish toreador Reverte figured in one of the most thrilling incidents ever witnessed in the arena. It was at Bayonne. After disposing of two bulls Reverte had twice plunged his sword into a third of great strength and ferocity, and as the beast continued careering wildly the spectators began to hiss Reverte for bungling. Wounded to the very quick of his pride, the Spaniard shouted, "The bull is slain!" and, throwing aside his sword, sank on one knee with folded arms in the middle of the ring. He was right, but he had not allowed for the margin of accident. The wounded beast charged full upon him, but the matador, splendid to the last, knelt motionless as a statue, while the spectators held their breath in horrified suspense. Reaching his victim, the bull literally bounded at him, and as he sprang he sank in death, with his last effort giving one fearful lunge of the head that drove a horn into the thigh of the kneeling man and laid bare the bone from the knee to the joint. Still Reverte never flinched, but remained kneeling, exultant in victory, but calmly contemptuous of applause, till he was carried away to heal him of his grievous wound.

Killing the Bad Taste.

"Maybe I won't have to take medicine again, and even if I do have to take it maybe the doctor will prescribe an ambrosial mixture, but if I should be condemned for my sins to swallow vile doses I know how I'll take them," a city salesman volunteered. "A man who was doctoring himself in the drug store showed me the way."

"The druggist had mixed a particularly obnoxious dose. The man before taking it asked for cracked ice. The errand boy brought it, several spoonfuls nearly pulverized. The sick man held that in his mouth until it melted, after which the medicine seemed as mild as tea."

"I always prepare my mouth that way for a disagreeable medicine," the man said. "The ice numbs the nerves, and the medicine slips down without leaving any taste, good or bad."—Exchange.

Retention of Heat.

In human beings the skin is the principal means of heat loss, being responsible for the loss of 87.5 per cent. of the total heat lost. This is not so in some animals—the dog, for instance, whose hairy coat does not permit its skin to perspire. The dog loses heat largely by its expired air and by the radiation and evaporation of water from its tongue; thus it pants and puts out its tongue on a hot day. Obviously our clothes prevent the loss of heat, and the more effectually as they are bad conductors of heat. For this reason flannel, wool and furs are so much "warmer" than linen or cotton, materials from the vegetable kingdom and therefore not the natural clothing of animals.

A Misunderstanding.

"Why don't you go about with Miss Seadds any more?"

"Why—er—she told me that she did not care for society since her father had failed?"

"He is failing, that's a fact. Old age, I suppose?"

"Great Scott! It that what she meant? I must certainly call and—ah—express my sympathy."

Dr. de Van's Female Pills

A reliable French regulator; never fails. These pills are exceedingly powerful in regulating the generative portion of the female system. Refuse all cheap imitations. Dr. de Van's are sold at 25c a box, or three for \$10. Mailed to any address. The Seebell Drug Co., St. Catharines, Ont. Or at Hooper's Drug Store.

rests and warns himself in the sun from ten to fifteen minutes before going down again. A good diver will go down from 20 to 25 times in the five diving hours. This colony has the best divers in the world. They dive all the way from six feet to 120 feet, (rarely more) in their work, and remain under water a minute and a half for the average man, two to two and one-half minutes for a good diver, and three minutes for a few exceptional experts. Among the pearl divers of Ceylon the highest record is 110 seconds. Diving for shells is hard and wearing work.

Like many other industries, it exacts its toll of human life. At the beginning of each season the nose and ears of the diver bleed when he comes up out of the water and sometimes he vomits blood. His eyes become affected, and paralysis of the arms and legs is not uncommon. He is at his best between the ages of 20 and 25; after 30 he begins to decline and is able to dive less and less as he grows older. The finding of pearls in the mollusks adds a singular fascination to the hard work of the toilers in the deep. Occasionally the rare black pearl is found, but nearly all the pearls are the usual color and not many of them are of any considerable size. Among the products exported from the colony mother-of-pearl shells rank second in value, copra holding first and vanilla third place. No statistics are available to show the world's production of mother-of-pearl shells, but it runs well up into thousands of tons.

Lax-ets 5 C Sweet to Eat

A Candy Bowel Laxative.

AT LAST, A CURE FOR RHEUMATISM

"Fruit-a-tives Cured Me" Says Mrs. Baxter.

"I was a helpless cripple from Rheumatism for nearly a year. All down the right side, the pain was dreadful and I could not move for the agony. I was treated by two physicians without help."

I saw "Fruit-a-tives" advertised in "The Telegram" and decided to try them. After I had taken one box, I was much better.

When I had taken three boxes, I could use my arm and the pain was almost gone.

After taking five boxes, I was entirely well again. The cure of my case by "Fruit-a-tives" was indeed splendid because all the doctors failed to even relieve me. "Fruit-a-tives" cured me.

MRS. LIZZIE BAXTER.

4 HOME PLACE, TORONTO, Dec. 15, '09.

In hundreds of other cases, "Fruit-a-tives" has given exactly the same satisfactory results because "Fruit-a-tives" is the greatest blood purifying medicine in the world. "Fruit-a-tives" the famous fruit medicine regulates kidneys, liver, bowels and skin, and prevents the accumulation of uric acid, which is the prime cause of Rheumatism.

"Fruit-a-tives" will positively cure every case of Rheumatism, when taken according to directions. 50c. a box, 6 for \$2.50, or trial size, 25c. At all dealers or from Fruit-a-tives Limited, Ottawa.

WE REPAIR WEAK MEN

ONE SECRET OF OUR SUCCESS. Every case submitted to us receives the personal attention of our Medical Staff, who consider the symptoms, complications and chronicity, and then decide as to the disease and curability. Specific remedies are then prescribed for the case and are compounded by our own chemist in our own Laboratory. Such appropriate treatment cannot fail to cure, as specific medicines are selected to cure the symptoms that trouble you. We have no cure-all medicines like most specialists who send the same medicines to all patients alike and cure none. We have treated patients throughout Canada for over twenty years and can refer to any bank as to our responsibility.

We Guarantee Cures or No Pay. We Treat all Diseases of Men and Women.

Hennequin's Infant Tablets

Save Babies' Lives. For Babies and Small Children. (Made in France.)

Dr. Hennequin's Infant Tablets saved our little girl's life. Three doctors said she could not live. The Tablets cured her. MR. E. R. McBRIDE, Napanee, Ont.

My baby was so weak from sickness that he could hardly walk. We thought he would die. We could find nothing to help him. I was given a sample package of three Hennequin Tablets; we used them; I saw a change at once. We secured the Tablets and our baby improved every day, and is now a bright, fat, good natured boy; you could not believe he was the same child. They certainly cured my baby and saved his life. I believe them to be the best medicine ever sold for babies. Mothers if your babies are not well take my advice and try these Tablets.—MRS. JAMES RIDDELL, Barrydale, Ont.

We have hundreds of such letters. If the Tablets were not what you need we would not offer to give them away and prepay them. If your baby is not well send for trial package. Hennequin Tablets have the letter "H" stamped upon them—this is your guarantee. All dealers, 25c per package, or 5 for \$1.00 sent postpaid to any address.

Is Canada in Danger

If So, From Whom ?

Opponents of lower taxes and larger trade for Canada held a "mass meeting in Massey Hall, Toronto, on Thursday evening, March 9th, to condemn the proposed trade arrangement between Canada and the United States. It was presided over by an ex-Lieutenant Governor of Ontario, and was addressed by a number of prominent citizens of Toronto.

A resolution was passed expressing the sentiments of those present. As the meeting had been arranged for the purpose of passing the resolution it must be presumed that it had been carefully prepared, and that it expressed in the most forceful terms possible the matured opinion of the men who organized the meeting. The resolution therefore has the merit of putting in convenient form the best reasons that can be given against the agreement, and so enables a reply to be made.

Following is the text of the resolution, and the obvious answer to each assertion :

THE RESOLUTION.

Moved by Z. A. Lash, seconded by W. T. White, That this meeting protests against the adoption of the reciprocity agreement with the U. S. of America because :

- (1) It would substantially reverse the policy which has brought Canada to her present prosperous and enviable position and cause widespread disturbance in her trade and industry to many interests ; jeopardize the commercial and political status of the Dominion
- (2) It would hamper Canada's freedom in developing her own resources in her own way and by her own people.
- (3) It would check the growth and development of trade between the various provinces and parts of Canada with each other and between Canada and the Empire, and diminish Canada's position and influence as a unit within the British Empire.
- (4) It would lead to commercial union and ultimately tend to political union with the U. S.
- (5) Because the agreement was negotiated in secret and without consultation with the commercial interests involved and without any mandate from the people.
- (6) This meeting claims before the agreement is made executive by legislation the question should be passed upon by the people at a general election ; and that to prevent a continuation of the commercial disturbance which the agreement has already caused the election should be held without delay.

THE REPLY :

- (1) There are only two features of the agreement. One is reduction of taxation, the other expansion of trade. These have been the leading features of the policy of the Liberal party ever since it succeeded to power 15 years ago. As witness the tariff reductions of 1879 and 1907, the British preference, the French treaty, and the standing offer of the intermediate tariff Canada's present material prosperity and strength of national sentiment have attained under and because of that policy, and her commercial and political future demands its continuance and expansion, as provided in the proposed arrangement.
- (2) By reducing the burdens on the Canadian taxpayer and opening wider and more profitable markets for three out of the four creative industries of Canada : farming, lumbering and fishing, it would aid in the development of Canada's resources by her own people and to their greater profit.
- (3) Canada's foreign trade is greater than ever before. Her interprovincial trade is greater than ever before. When her foreign trade was least her interprovincial trade was least. Prosperity resulting from increase of foreign trade inevitably increases interprovincial trade.
- (4) By giving Canadian producers all the advantages of the United States market without political association of any kind, even to the limited extent of a trade treaty, it would take away any possible reason for tendency towards political union with the United States.
- (5) The agreement was made in secret as all trade arrangements between countries have always been made. Great Britain has trade treaties with every important country in the world—all negotiated in secret, without consultation with the commercial interests involved and without any special mandate from the people. A special mandate is not necessary, because under the British system of responsible government, every government has a standing mandate to protect and advance the best interests of the people whenever opportunity offers.
- (6) There is no warrant for commercial disturbance in the terms of the arrangement. The arrangement can be terminated without notice at any time the Canadian people desire. The only way in which the people can have a fair opportunity to pass upon it is by giving it final and definite form and effect by legislative enactment, so that they can know exactly what they are voting on—so that they will be voting on a concrete proposition and not on an abstract theory. They then have the double opportunity of rejecting the agreement and of punishing for their error the men who made it, in accordance with the well established British system of responsible government.

Is Canada's danger from the government that would reduce taxation and increase trade or from the so-called "Commercial interests" (but actually "combine interests") as represented at the Toronto meeting, which would increase taxation and restrict trade?

The agreement is evidence to the combines that they do not control the Government, therefore they fight the agreement and the Government that made it.

The question is, shall Canada be governed by the combines under the pet name of "Commercial interests" or shall it be governed for the workers, whether of the farm, the forest, the sea, the mine, or the factory.

Canadian nationality and Imperial loyalty have been strengthened by the Government's progressive policy of the past 15 years. They will be still further strengthened by the extension of that policy as expressed in the proposed trade arrangement

FAMOUS DOCTOR'S PRESCRIPTION.

CATARRH OF STOMACH

BOY SCOUTS.

The Boy Scout Movement is growing rapidly throughout the Province of Ontario. Through the kindness of a number of prominent gentlemen throughout the Province, a headquarters office has been opened in Toronto for the guidance of the work throughout the entire province. We would be pleased to forward suggestions when applied for.

The Movement started in Ottawa about a year and a half ago and has increased in number from 75 on the start to 5000 and is rapidly growing every day.

It has been endorsed by the leading Educationalists of our Province who realize that it is one of the best Movements of modern times for the development of character in the boy.

The idea which first occurred to the people that it was a military movement is gradually dying out, although the Movement is not opposed to militarism, taking from such, points, which tend to make an all-round man, namely, discipline, obedience, reverence and alertness.

The Boy Scout Movement is an Educational Movement which anyone who has read the Canadian edition of "Scouting for Boys" cannot fail to grasp. The boys, through the games and methods adopted by this Movement are taught Craftsmanship, Woodcraft, in fact there are in all 43 subjects which a boy can acquire through this organization. The Scout Law being as follows :—

- A Scout's honor is to be trusted.
- A Scout is loyal to the King.
- A Scout's duty is to be useful and to help others.
- A Scout is a friend to all, and a brother to every other Scout, no matter to what social class the other belongs.
- A Scout is courteous.
- A Scout is a friend to animals.
- A Scout obeys orders
- A Scout smiles and whistles under all circumstances.
- A Scout is thrifty.

We will be pleased to forward any further information upon application. This Movement is for the boy, appeals to the boys and will assist in developing that all-round manhood that means so much for the future of this Canada of ours.

Address all communications to Room 501 Lumsden Building, Toronto, Ont.

H. G. HAMMOND,
Secretary.

Children Cry FOR FLETCHER'S CASTORIA

THE FLY ON THE PANE.

It Will Crawl to the Top, but Will Fly
Back to the Bottom.

A fly on a window pane will crawl to the top, fly back to the bottom and crawl up again. This order is seldom reversed—why no one knows. It is on record that a fly crawled up a window pane thirty-two times, returning each time a-wing.

Hens scratch for food with the sun behind them, the reason being that the rays reflect on the minute particles. A blind hen will pick grain and not miss a kernel.

Cats seldom lie with their feet to the fire. Usually they lie on the left side. Dogs lie with their fore paws to the fire.

A mouse will ignore a food supply sufficient for a meal and run great risks to nibble at a wholesale supply. It will hide at the source of food supply and not depart therefrom until actually disturbed. It isn't true that a mouse runs to its hole at the first alarm.

Find a harmless little snake the length of a lead pencil and provide a box for it in the house, visit it daily and at the end of three months it will crawl to you for food.

Goldfish usually swim around a globe to the right. They can be taught to take a fly out of the hand in six weeks' time. The presence of other fish in the globe is generally ignored by goldfish. Drop a piece of chip on the surface of the water and it will frighten a fish.

Sheep spend more time grazing than do cattle and horses. Sheep will eat for twelve hours out of twenty-four.—New York World.

FIGHTING NATURE.

What One Man's Patient Effort Wrung
From a Desert in France.

In the southwest of France, between the rivers Adour and Garonne, are long stretches of pine woods, green and cool.

Where these pines now stand was a barren waste in the middle of the last century. Sun and wind vied with each other in making the land drier and dustier. Over the stormy bay of Biscay came winds that set up great sandstorms and sometimes buried whole villages. The whole region was one of hopelessness and despair. Fate was against it.

But finally there came a man who acknowledged fate only as something to be overcome. This man, one Bremon-tier, was an inspector of roads. He began fencing in the desert. He built a fence and behind it planted broom seeds. Behind the broom seeds he put seeds of the pine. The fence protected the broom seeds, and the broom grew. Then the broom in its turn afforded shelter to the delicate pine shoots.

Soon the pines spread, and their tough roots bound the sandy soil together. The first step was accomplished. Then canals were made to drain the wet parts and carry water to the dry.

Thus did one man by patient effort turn a dreary desert into a home for an industrious and healthy population. It was an instance of triumph over fate.—New York Tribune.

ALL OF ONE NAME.

So They Had to Tag Each of the Many
Tom Hazards.

Perhaps no community more carefully and frequently set forth its erratic fancy than did the early settlers of Narragansett. It is, of whom W. B. Weeden tells in "Early Rhode Island." There were so many of one name that the bearer must have a descriptive prefix lest he be lost in a concordant multitude. Mr. Updike cites thirty-two Tom Hazards living at one time and thus illustrates a few:

College Tom, because he had been at college. Bedford Tom was his son and lived at New Bedford. Barley Tom, because he boasted how much barley he raised from an acre; Virginia Tom, because he married a wife there; Little Neck Tom, from the farm of that name; Nailor Tom, the blacksmith; Fiddle Head Tom, an obvious resemblance; Pistol Tom, wounded by an explosion of that arm; Young Pistol Tom, his son; Short Stephen's Tom, the father low, against Long Stephen's Tom, the father tall; Tailor Tom needs no explanation.

The Georges were not so numerous, but they were distinguished as Beach Bird George, of little legs; Shoestring George, an opponent of buckles; Wig George, Dr. George and Governor George.

A LIFE FOR A LIFE.

Cheerful New Guinea Custom Which
Causes Frequent Murders.

Everywhere in New Guinea the traveler is continually brought face to face with death, and the natives are devoid of the slightest pity or respect for the dead or dying, although after a death they will often wall and mourn for a considerable time.

Murder is an everyday occurrence, and nothing could be worse than the morals of the natives. In fact, they have none. They thieve and lie with a persistence and cunning which are surprising.

The Papuans have a cheerful custom which demands a life for a life. Should any one die at the first opportunity they kill some one—they are not very particular whom—to make up for it. "While we were at Humbold bay," says Professor Pratt in the Wide World Magazine, "a Malay died of dropsy. He was the first Malay who had ever come to that part, and the Papuans greatly respected him.

"Very well," they said, "we must shoot a Malay with our bows and arrows to pay for his death." And sooner or later some innocent person would be killed to square the account, when everybody—except, presumably, the victim's friends—would be satisfied."

A Genuine Triumph

in the medical line is that made by a Canadian chemist, and called Merrill's System Tonic. It embodies a discovery long desired but only recently made by this eminent chemist. When System Tonic is taken the old blood is purified, new rich blood is made, while all the principal organs of the body are toned and strengthened and new tissue constructed. The result is a permanent cure of Dyspepsia, Rheumatism, Catarrh, Blood and Skin Diseases and Kidney Affections with their accompanying nervous symptoms. Get Merrill's System Tonic from your Druggist, 50c per box, 6 boxes \$2.50, or postpaid from The Merrill Medical Co., Merrill Building, Toronto.

Sold and recommended by T. B. Wallace, Druggist.

A Disguised Toast.

At one time the officers under Lord Howe refused to drink his health at their mess, for, though a splendid admiral, he was not popular in the navy on account of a certain shyness and want of tact with those about him. The chaplain, who was a protegee of his lordship, was mortified at this and determined that the officers should drink to Lord Howe. When called upon for a toast one day he said, "Well, gentlemen, I can think of nothing better at this moment than to ask you to drink the first two words of the Third Psalm, for a Scriptural toast for once may be taken from one of my cloth." The toast was drunk. Not one of the officers indicated by word or look that he was ignorant of the words alluded to. On referring to the Bible it was found that the Third Psalm begins, "Lord, how are they increased?"

Worth Her Weight in Butter.

Curious customs still prevail with regard to marriage. In some parts of Uganda the custom is to offer six needles and a pack of India rubber for a wife. Some of the Kaffirs sacrifice oxen. The Tartars of Turkestan give the weight of the prospective wife in butter. In Kamchatka the price varies from one to ten reindeer. Some savages require a certain amount of labor. Among the aborigines it is said the current rate for a wife is a box of matches, which prompted a Paris contemporary to speculate whether one of the French government boxes would be accepted.

so much for the future of this Canada of ours.

THE NEW REMEDY FOR Nervous Exhaustion

Alcoholic and physical excesses, mental shocks and bodily injuries drain the nervous system with surprising rapidity. Severe nervous exhaustion frequently results. The only remedy is Food, Rest and nerve repair. "ASAYA-NEURALL" is and makes possible this cure. It feeds the nerves, induces sleep, quickens the appetite and digestion, restores full nerve vigor. \$1.50 per bottle. Local agent.

E. E. JESSOP.

The artists who make Edison Records

have spent the best part of their lives in perfecting themselves for the sole purpose of entertaining others.

Each is a specialist and all are among the best that the field of opera, music hall, concert, musical comedy and vaudeville have produced. Every owner of an

Edison Phonograph

commands the services of this great array of talent. Their songs and music are offered on both Edison Standard and Edison Amberol Records every month. Have you heard this month's selections?

There are Edison dealers everywhere. Go to the nearest and hear the Edison Phonograph play both Edison Standard and Edison Amberol Records. Get catalogs from your dealer or from us. Edison Phonographs, \$16.50 to \$240. Edison Standard Records, 40c. Edison Amberol Records (play twice as long, 60c). Edison Grand Opera Records, 50c to \$2.50.

DASHED UNDER THE BIG GUNS

HEROIC EXPLOIT OF LORD CHARLES BERESFORD.

Many Gallant Acts Were to His Credit That Demanded Supreme Courage.

After more than fifty years' service in the Navy Admiral Lord Charles Beresford has now retired, having reached the age at which that step becomes imperative under the regulations. That he feels deeply the final separation from the service he loved, and in which he was one of the most popular of the higher officers, one cannot doubt. And the regret will be felt keenly among those he leaves behind.

But he will take into retirement the high satisfaction of knowing that he won the approbation of three Sovereigns, the deep affection of the nation, and the esteem of all with whom he had been brought into contact during his professional career.

Having joined the Britannia, as a naval cadet in 1859, he was after appointed to the Marlborough, and subsequently to the Defence. And although at the moment there were no opportunities to earn the approval of the country upon a field of battle or upon the deck of one of the ships of the British Fleet, he was not long before he gave a sample of the kind of work that might be expected from him when the opportunity came.

WAS VERY BRAVE.

It was while serving in the Defence that he saved the first of several lives by his courage. The ship was lying in the Mersey, when a shout went up that there was a man overboard. Without an instant's delay young Beresford leaped to the rail, and from thence dived into the water, holding up his man until a boat could be sent to his assistance. For his pluck he was awarded the medal of the Royal Humane Society, which, with its bar for further act of courage and life-saving, is still doubtless one of his most cherished trophies.

It was only a few years later that he earned the second reward by a particularly plucky act. It was in the early part of 1871, and his ship was lying in Port Stanley, on the Falkland Islands. There was plenty of sport to be had ashore, and the young officer was just going to start on a little expedition of that character.

But as he was about to step down the gangway, a marine fell over the ship's side, and was at once seen to be in danger of losing his life. Beresford had a heavy shooting jacket. Moreover, his pockets were bulging with ammunition.

Yet he was after the drowning marine while others were wondering what had better be done, or waiting for a boat to be got out. He was successful in saving the man's life in spite of his weighty clothes and cartridges, and when the news came ashore the society decided to add a clasp to the medal they had already given him.

LIFE-SAVING INCIDENT.

Before telling the story of the Condar there is another life-saving incident that stands to the credit of the brave officer. He had but three years' service, and was still

"RATS" AND SWITCHES.

Are Not Made of Hair Taken From the Dead.

Women who resort to "rats," switches and puffs of hair to reinforce nature need not think that they are wearing hair taken from the dead, according to the United States Consul-General at Hong Kong, China. He also contradicts the stories that have been circulated to the effect that much of the hair which goes to make up these "reinforcements" comes from queues that have been cut off. To substantiate this, he says that although thousands of queues have been cut off in Hong Kong during the past few months, the hair has not been sold.

The hair shipped from the Chinese Empire is the combings from well-to-do people, mostly women, says the Consul-General. Combings that formerly were thrown away, he adds, now are saved and sold to the barbers by Chinese maids. Barbers also obtain considerable hair while plying their trade, selling it to hair exporters. Much of the Chinese product is sent to Paris, and is exported from there to Canada and the United States as French hair.

CORONATION JEWELRY.

Real Coronets are Cheaper Than the Imitations.

London jewelers are working overtime in producing all manner of coronation novelties. Imitation coronets for those who are not entitled to wear the real article are among them. Strange to say, real coronets are cheaper than the imitations.

The special tiaras and coronets which the fashionable jewelers are turning out for the coming social festivities range in price from \$500 to \$50,000 or more. They are set with pearls and diamonds in elaborate designs and when not worn as a hair ornament some of them can be converted into necklaces.

The coronets worn by the nobility are plain affairs in comparison. Only the Royal coronets can be set with jewels. Those worn by peers and peeresses are fashioned in silver gilt and a nice one can be had for \$500 or a little more.

Imitation coronets are not the only expensive articles of jewelry to which the coronation year is lending a wide popularity. Hats pinned mounted with gold crowns are being turned out in large numbers. Facsimiles of the pure gold anointing spoon which plays a part in the coronation ceremony have already found place in many homes.

The new King George coinage is being made up into brooches and waist belts, and dainty tiepins are on sale with Royal crowns and tiny jewelled sceptres to ornament them.

BALKY HORSES.

A Fault Sometimes Inherited—Simple Ways to Overcome It.

The incorrigible balky horses of the rural districts find their way to wholesale markets, where under the test of hauling a heavy truck wagon on a paved street with the wheels blocked the vice is immediately discovered, says the Horse Shoer's Journal.

If the animal has been sold as serviceably sound and guaranteed a

BRITONS HOLD THEIR OWN NEWS FROM SUNSET COAST SIR

AGAINST GERMAN AND AMERICAN COMPETITION.

Gigantic Engineering Feats Prove That Britain is Not a Back Number.

In spite of what gloomy pessimists may say about Great Britain losing her grip of the world's trade, it would appear that in engineering, at any rate, we are not only holding our own, but grabbing other people's, says Pearson's Weekly.

This comforting reflection arises from the fact that British engineering firms have recently secured, in the teeth of strenuous German and American competition, the contracts for two great South American railways.

TO COST \$21,250,000.

The President of Chili has signed a decree accepting the offer of Messrs. Griffiths & Co. to build the new Chilean railway between Cabildo and Toledo, a distance of about four hundred miles, at a cost of \$21,250,000. Mr. Norton Griffiths, M.P., the head of the firm, has started for Chili, and from all quarters of the globe the firm's engineers have been ordered by cable to join their chief at the seat of operations.

Some idea of the tremendous task undertaken by the contractors may be formed from the fact that they estimate they will require a million sleepers and over thirty-five thousand tons of rails. There will be just under three miles of bridges and rather more than three miles of tunnels, and the earth to be removed is estimated at 14,000,000 cubic yards. With the exception of the sleepers, which will come from America, all the rails, tools for construction, and engines will be ordered in England.

This railway, which will be completed within five years, will ultimately form part of the much-talked-of Pan-American railroad system which is to extend from New York to Valparaiso. From Toledo a railway already runs up to Arica, and from Arica to La Paz another railway is being built by British capital.

A German syndicate was very keen on getting the contract for the Arica-La Paz railway, but it was secured by a company in which Messrs. Griffiths are largely interested, the contract price being \$15,000,000.

NO RAIN FOR FORTY YEARS.

For more than half the distance from Arica the line runs through a barren desert without any sign of vegetation, and this enormously complicates the difficulties of building. There has not been a shower of rain in the neighborhood for forty years, and the absence of rain is so certain that the contractors have not troubled to build sheds to shelter some thousands of tons of Portland cement, but have left it out in the open.

About five hundred mules are constantly employed in carrying food, water, and materials up the mountains, water at one time having to be carried over thirty miles. More suitable water-carrying arrangements have recently been made, however, by means of a line

WHAT THE WESTERN PEOPLE ARE DOING.

Progress of the Great West Told In a Few Pointed Items.

There are 80 licensed bars in Vancouver.

Churches may soon be taxed in New Westminster.

Fernie will soon have an up-to-date fire alarm system.

Fernie is economizing by cutting down the police force.

Cranbrook, B. C., expects a year of great industrial development.

The hotel license in Didsbury, Alta., have been raised to \$200 a year.

One hundred and six building permits were granted in Calgary during February.

The protest against compulsory vaccination continues loud and long in Vancouver.

Chilliwack, B. C., will have a brass band this year. It already has two newspapers.

W. H. Voight, who recently died in Merritt, went to British Columbia more than 50 years ago.

The Kosmos liner Uarda recently brought 600 tons of nitrate for the Victoria Chemical Works.

In agriculture and stock-raising there is remarkable progress in all parts of the Kootenay district.

The Harris Bros. of Rossland have refused \$110,000 for the American group of claims, near Hazelton.

The Fraser river valley has been pestered with hoboes this winter more than in any previous year.

In Creston, B. C., business men pay \$5 a month for telephones. This was the rate in Ontario 30 years ago.

A gypsum plant, costing \$200,000, is to be built at Spotsum, B. C. The plant will turn out 300 tons a day.

From a mine in Alberta there was taken the other day, a single piece of coal weighing over 1,200 pounds.

There is some talk of building a wagon road from Chilliwack to a group of mining claims on Tomahoy creek.

It has been conservatively estimated that nearly 2,000 men could find employment through Winnipeg agencies to-day.

A shortage of hay in the Lethbridge district is reported, and hundreds of tons, it is reported, are being shipped from outside.

With a population of just over 200,000 Winnipeg consumes approximately 40,000 pounds of butter and 30,000 quarts of milk daily.

In the northern part of the Kootenay Valley they are now engaged in getting out millions of feet of timber, also millions of ties.

Calgary city council will likely appropriate \$1,000 to assist in entertaining the Dominion Trades & Labor Council there next fall.

Different Boards of Trade met in Edmonton the other day for the purpose of working out a scheme of co-operation in publicity work.

Nine carloads of large pipes from Pittsburg, Pa., arrived over the Great Northern consigned to the Powell River Paper Works at New Westminster.

At Bull River, the Bull River Power and Mining Company are

man's life in spite of his weighty clothes and cartridges, and when the news came ashore the society decided to add a clasp to the medal they had already given him.

LIFE-SAVING INCIDENT.

Before telling the story of the Condor there is another life-saving incident that stands to the credit of the brave officer. He had but three years' service, and was still on the Defence, when it happened. Indeed, it was only a few months after the incident for which he received the medal already referred to. The ship was lying in Dublin Bay, and a boat was going ashore with some liberty men. Before the occupants had quite settled down one of them fell into the water. Beresford was scarcely more than a boy, and in his earlier days was but a weak little chap. But he had strong courage, and without hesitation went to the assistance of the drowning man. For this he was awarded the medal of another society.

It was in January, 1882, that he obtained command of the Condor, one of the gunboats of the Mediterranean squadron, and six months later he was the hero of the incident that has remained firmly fixed in the romantic side of historical reminiscences ever since.

The British fleet, under Admiral Sir F. B. Seymour, was engaged in the bombardment of the Alexandria. The enemy were effectively replying, and when, in the course of the bombardment, the Temeraire went ashore, she was in considerable danger from the guns of the fort.

Lord Charles Beresford was ordered to render her all the assistance possible in getting her floated, and when he had done the work allotted to him he started on something that was even more to his taste.

DISABLED TEMERAIRE.

The Marabout Fort had been particularly active in throwing its projectiles in dangerous proximity to the Condor and the disabled Temeraire, and the commander of the little gunboat determined to pay her back with some of her own coin.

An order was given, and in a moment those who were watching saw almost with horror that the Condor was dashing right under the very mouths of the guns of the fort, and engaging in a duel with them.

For a time those who witnessed the incident almost held their breath, expecting to see the frail little craft sink, with a well-placed shot inside her. The Condor had only three guns in all, a 7 inch and two 54-pounders. The fort was armed with two 12 inch, two 9 inch, twenty 32-pounders and five mortars. The odds were appalling. But the little gunboat spit her fire at the flame-belching mass of guns overhead, and before the enemy could depress their aim sufficiently to get at the little wasp that was stinging so disagreeable from below, the signal had been run up from the commander-in-chief's flagship, "Well done, Condor!" Beresford's name was at once on the tongues of the nation as that of a British sailor of the type of which the country and the empire have been proud since there has been a navy and an empire.

The essentials to domestic strife are a fussy husband and a nagging wife.

The incorrigible balky horses of the rural districts find their way to wholesale markets, where under the test of hauling a heavy truck wagon on a paved street with the wheels blocked the vice is immediately discovered, says the Horse Shoer's Journal.

If the animal has been sold as serviceably sound and guaranteed a willing worker and a cheerful puller the buyer rejects his purchase and the horse is resold without any guarantee except clear title of ownership.

Some horses have learned to balk by being overloaded and abused. Their courage has been overtaken and they rebel, disheartened at the task they are asked to perform. Other horses appear to balk from natural inclination and appear foaled full of innate stubbornness.

Balking, like windsucking, cribbing, weaving and halter pulling, is a vice developed by natural inheritance. In breaking young horses to harness too much caution cannot be observed in asking the youngster to pull light loads to begin with.

The balky horse cannot be conquered by brutal treatment, but may be induced to pull by many devices intended to attract his attention from his resolution not to pull. To lift the forefoot and pound on the shoe, to put a handful of grass or dirt in his mouth, to give him a lump of sugar or an apple to eat have all proved successful in some instances in inducing a horse to pull.

To pass a cord around the pastern and pull the forefoot forward until the animal has to move is also a means of starting a balky horse. An electric battery manipulated by the driver gives an animal a shock from a source that he does not comprehend and is the latest device in treating incorrigible horses.

INSURING AGAINST DEVILS.

Curious Way the Chinese Have of Taking Out an Annual Policy.

Once every year, during the first fifteen days of the seventh Chinese month, the curious ceremony of Yu-Nan-Whei is celebrated, being in fact the paying of homage to the land and sea devils.

Seven priests carry out the ceremony by offering up various forms of prayer, says the Wide World Magazine, and making an unearthly noise by beating gongs.

Any one wishing to show his respect to the devils can do so by a payment of 600 cash—about 22 cents—to each of the priests, for which amount they will continue their performance for twelve hours—a truly modest remuneration.

For an extra payment of 2,000 cash a number of small red paper boats about six inches long, with lights inside, will be sent floating down the river with the current. These lights are for the benefit of the sea devils in order that they may be able to see their way about on dark nights.

Having finished their performance the person on whose behalf it has been carried out goes away happy in the conviction that he will not lose any of his family throughout the year either from sickness or drowning, so that the whole ceremony may be looked upon as an insurance policy. At this time of year many thousands of the small lighted boats may be seen floating down the Yang-tze-kiang.

shelter some thousands of tons of Portland cement, but have left it out in the open.

About five hundred mules are constantly employed in carrying food, water, and materials up the mountains, water at one time having to be carried over thirty miles. More suitable water-carrying arrangements have recently been made, however, by means of a line of pipes about eighty miles long.

As our readers may remember, another great South American railway, the recently opened Trans-Andean Railway, is also British built, and these are only the larger of the engineering works being carried out in South America by British capital.

REGISTERED AS AMERICANS.

Middlesbrough engineering firm recently wrested a big contract from the grip of several powerful American firms. This was a contract for 6,000 tons of steelwork comprising 400 bridges, varying in length from 7 feet to 105 feet, required in connection with the doubling of the South Manchurian Railway system between Su-chra-tun and Dalny.

Another British firm triumphantly carried the war into the enemy's country, and has recently finished the tunnelling of East River, New York, a tunnel the Americans were unable to build for themselves.

To obtain the contract the firm had to go through the formality of registering themselves as an American company, and they also had to agree to a penalty of \$2,000,000 if they failed in their undertaking.

In the middle of the river is a low reef breaking up through slit and quicksand, but in few places was this reef high enough to cover the outer rim of the tunnel. This simply means that to drive through the quicksand the men had to work in compressed air that would resist the tendency of the quicksand to rush in and overwhelm them, and at the same time there was a constant danger of the roof of the tunnel being blown out by the immense pressure of air from within.

Men affected by compressed air die so quickly that special arrangements had to be made and doctors were kept in readiness for emergencies day and night.

CHINESE MARRIAGE SOLEMN.

No Levity and Much Weeping in Ceremony.

A Chinese marriage is all ceremony—no talk, no levity and much crying. The solemnity of a funeral prevails. After the exchange of presents the bride is dressed with much care. A feast is spread upon a table, to which the blushing bride is led by five of her best female friends. They are seated at the table, but no one eats, says the London Globe. The utmost silence prevails, when finally the mother leads off in a cry, the maids follow, and the bride echoes in the chorus. Then all the bridesmaids leave the table, and the disconsolate mother takes a seat beside the chair of state where the bride sits. The bridegroom now enters with four of his best men. The men pick up the throne on which the bride sits and, throne on which the bride sits and, in procession and walk around the room or into an adjoining parlor, signifying that he is carrying her away to his own home. The guests then throw rice at the happy couple.

Different Boards of Trade met in Edmonton the other day for the purpose of working out a scheme of co-operation in publicity work.

Nine carloads of large pipes from Pittsburgh, Pa., arrived over the Great Northern consigned to the Powell River Paper Works at New Westminster.

At Bull River, the Bull River Power and Mining Company are harnessing the Bull River Falls, to furnish power and light to every city and town in the district.

The Dominion Government has decided to supply flax seed to homesteaders, and the distributing points will be Bow Island, Winnipeg, Irvine and Medicine Hat.

At New Westminster, Elsie Gieschen, a three-year-old child, had her left arm and leg partially paralyzed, and her head injured, by being struck by a piece of blasted stump.

Three flocks of gray geese flew over Winnipeg northward the other morning. Old timers say this is a sure sign of an early spring. The geese are a month ahead of their season.

A statement just prepared by the coal mines department branch of the public works department shows that in 1910 three million tons of coal were mined in Alberta. In the previous year the total was 2,174,000 tons.

SHOOTING BY H.M.S. NEPTUNE.

At Five Miles Shell From Big Gun Cut Down Flag Pole.

Service circles are keenly interested in the progress of the gunnery experiments now being carried on in the Mediterranean by H.M.S. Neptune. The conditions under which the experiments are being conducted provide as severe a test as possible. The idea is new, H.M.S. Neptune is new, the ship's company is new, and therefore has not shaken down, as will be the case in a month or two.

On February 13 a flagstaff thirty feet high and four inches broad was dropped at a distance of nine thousand yards, or just over five miles from the ship. The flagstaff was invisible to the naked eye of any one on board the Neptune. When the button was touched by the control aloft five 12-inch shot went straight as a die to the target more than five miles off. The five shot fell in a space of a hundred and fifty yards. Such a volley would have crippled any Dreadnought afloat. The trials on February 13 were only the beginning of the experimental gunnery course, and it is expected within a few days that the big guns of the Neptune will make three times as many hits in a minute as any previous Dreadnought has done before.

ENGLAND DONS NIGHTCAPS.

Put on your old white night cap once more. English physicians are confident that the abandonment of the odd looking thing that grandfather used to wear as, candle in hand, he led the ghostly procession to the cold bedrooms upstairs, protected him from coughs, colds and influenza. One physician, in discussing the advantages of night caps, declares: If there were more work for the makers of the old fashioned woolly night caps there would be less for the doctors.

DAST SIR OLIVER LODGE'S VIEWS FROM MERRY OLD ENGLAND NEWS OF GERMAN SCHOOLS FROM DUNNIE SCOTLAND

PEOPLE SAYS CONCEPTION OF DEITY IS HUMANLY SIMPLE.

The Great Scientist Says It Appeals to the Ignorant and Babes.

No scientific man compels greater interest and attention in Great Britain when dealing with religious matters than Sir Oliver Lodge. His great lay sermon on the subject of "Christian Revelation" from the scientific point of view was the outstanding event at the National Free Church Council meeting recently at Portsmouth, England. Sir Oliver declared that he had learned to regard the universe as a concrete, full-bodied reality with its parts accessible and intelligible to all. Among other things he said: "God can be regarded as displayed to us in such fashion as we can make use of in the person of an incarnate being, who came for the express purpose of revealing to man such attributes of the Deity as would otherwise have been missed."

At another point Sir Oliver advised his hearers to "always mistrust negations. The impossibility of squaring a circle is not really a negative proposition except in form. Negations commonly SIGNIFY BLINDNESS

and prejudice always, except when they are thoroughly established and carefully formulated in the light of actual experience or mathematical proof. Even then, I would be ready to admit the possibility of higher generalizations which may uproot them. They are only safe when thrown in the form of a positive assertion. Always try for a positive form of any comprehensive denial. If it cannot be thrown in positive form, mistrust it. Its promulgator is probably stepping out of bounds into the easy region of negative speculation. He is like the rationalistic microbe, denying the existence of a human being."

In summing up his convictions, Sir Oliver said: "Progress lies in careful investigation as well as speculation and thought up to the limits of human power. When things are really understood, they are perceived to be fairly simple after all. The Christian conception of God is humanly simple. It appeals to the man in the street, to the unlettered, the ignorant and babes. That is the way with the greatest things. The sun is the center of the solar system,

A GLORIOUS OBJECT. full of mystery and unforseen force. But the sunshine is a friendly, homely thing that touches common objects and conduces to comfort, yes, and conduces to the comfort of the cat. Sunshine is not the sun, but is the human, terrestrial aspect of the sun.

"Thus would I represent the Christian conception of God. Christ is the human, practical, workaday aspect. Christ is the sunshine, that fraction of the transcendent Deity which suffices the earth."

In dealing with miracles, Sir Oliver said they were no more impossible, nor more lawless than the interference of a human being would seem to a colony of ants and bees. "The region of the miraculous," concluded Sir Oliver, "has been

NEWS BY MAIL ABOUT JOHN BULL AND HIS PEOPLE.

Occurrences in the Land That Reigns Supreme in the Commercial World.

Lady Warwick telegraphed to one of the leading London papers her emphatic disapproval of the trouser skirt.

The Government have proposed to increase the price of tobacco to the Navy is 8d per lb., and of soap 1/2d per lb.

A number of skeletons have been stolen from St. Piran's Oratory, Cornwall. It is believed that the thief is a medical man.

According to the annual report of the borough council, Holborn lost \$122,305 during the year owing to the number of empty premises in the borough.

Work and help were given to Wm. Arnold, the 15-year-old London boy who pawned his clothes in order to obtain food for his family.

A stone coffin or cist, composed of five slabs and containing human remains, has been discovered on the Abbey St. Bathans estate.

Cats are dying in large numbers in the Cullompton district of Devonshire of a malady as mysterious in its origin as it is deadly in its effects.

A beautiful specimen of the ermine was caught in the flower garden of Scottow Hall, Norfolk, last week. It is an extremely rare visitor to this country.

The ages of fourteen of the last fifteen persons who have died in the village of Dodinghurst, Essex, aggregate 1,086 years, an average of seventy-seven.

Tickets for 3 cwt. of coal were given to 1,150 blind persons, who were entertained to tea at the Shoreditch Tabernacle by an anonymous lady donor.

According to a return by the committee of the city police, London, there were 400 accidents with vehicles in the city in the last quarter of 1910, four proving fatal.

Since the Cosford rural council agreed to pay one penny for every rat killed in the district, 30,645 rats have been exterminated at a cost to the council of nearly \$635.

Mrs. Francis Wright, of Southwark, who went to the assistance of a police constable when he was struggling with an armed burglar, was decorated with the Albert medal by King George.

It was stated at Kingston-on-Thames Brewster Sessions that during the past six years the Surrey compensation authority has closed eighty-two licensed houses in the county at a cost of \$500,000.

Gardens are to be provided for London elementary schools at the rate of about twenty each year, the Day Schools Sub-Committee have decided. The average cost of forming a school garden is about \$75.

The Epping Forest Committee of the corporation of London, in their annual report, state that the necessary work of thinning was continued last year, each block of woodland being treated according to its needs.

A remarkable sight will be witnessed in London on Good Friday afternoon when a large procession

TAKING CARE OF THE HEALTH OF THE CHILDREN.

New Ideas Have Been Developed and Improvements Have Been Introduced.

In Germany gymnastic exercises in the open air during recesses and after school hours are held in the lower schools of 193 cities. Sessions are interrupted by calisthenic exercises in the schools of 236 cities and breathing exercises by open windows in the schools of 160 cities.

Orthopedic gymnastics for children suffering from curvature of the spine are arranged in 22 cities. In 205 cities the school authorities offer opportunities for swimming baths in pools with constantly changing water.

Gymnastic school excursions on free afternoons (Wednesdays and Saturdays) are made in 163 cities; games for children in the open air on playgrounds and in neighboring groves are arranged in 357 cities, and in 362 the teachers are obliged to take their classes out walking through woods and fields. Four cities have arranged rowing matches, skating on ice is promoted in 174 cities, 226 cities have play afternoons as regular school lessons. In 36 cities

FOREST SANITARIUMS

are main tained, three have forest homes for sickly children and eight have forest schools.

As many as 443 cities offered instruction in the upper grades of school on the evil effects of alcohol. In 20 cities school dental clinics are established, and in 15 other cities such clinics were planned, the authorities merely waiting for the required appropriation; 53 cities attend in other ways to the teeth of their school children and in 163 an examination of the children's teeth takes place at regular stated intervals.

In 274 cities cities a careful examination of children's eyes is made at intervals and records are kept; three cities have appointed professional oculists for that purpose and 215 furnish glasses at the city's expense. For children with defective hearing 131 cities have appointed experts, but only 24 have arranged special schools for such children.

In 196 cities courses of instruction for teachers for curing defects of speech are arranged; in 171 cities special treatment of throat and nose diseases and for children suffering from impediments in their speech, is arranged. Also for children with

NERVOUS TROUBLES

and for weak minded children 103 auxiliary classes in fully graded schools and 169 independent auxiliary schools are established.

In 238 communities special physicians are appointed to determine the existence of tuberculosis among the school children; 109 cities merely exclude such children from attendance at school; in 139 other cities such children are sent to appropriate institutions at the city's expense.

To all the efforts mentioned in the foregoing may be added the duty of feeding hungry children which is

The Galashiels Second Economic Building Society has now a membership of 190 holding 877 1/2 shares.

A blue shark, weighing two tons, was landed by a trawler at Dundee recently, but brought only \$1.68.

The death is announced at Galashiels of Mr. Isaac Nevin, for 48 years parochial schoolmaster at St. Monans.

Robert Duncan & Co., Port-Glasgow, are to build a steamer of 8,500 tons for Thomas Dunlop & Co., Glasgow.

The dismantling of the pitheads at Tranent Colliery is to commence soon. The miners are leaving the district.

A halibut of 120 lbs. weight was caught near Girvan the other day. Oddly enough, it was sent to Aberdeen.

Ex-Provost Kerr, Crieff, has been presented with a solid silver tray in recognition of 27 years' municipal service.

A very fine specimen of the "Shoveller" duck, which is rare in the vicinity, was shot in Wigtown Bay recently.

Denny school board will purchase Oakleigh House, Dennyloanhead, at a cost of \$2,500 for the use of the headmaster.

In Oban the number of unemployed is greater than for many years. A large number of artisans are leaving for Canada.

The erection and endowment of an addition to Dundee Infirmary, costing \$150,000, is proposed as a King Edward memorial.

It is proposed to repair and place a memorial tablet on the only remaining gable of the house at Torphicheu Parish Mill, Linlithgowshire, which was the birthplace of Henry Bell, the pioneer of steamship navigation.

A new borough flag has been presented to Arbroath, and will be unfurled over the town either on Victoria or Coronation Day.

A new nautical appliance has been invented by Donald Mackay, shipbuilder, Alloa. It indicates the weight of cargo put on board ships.

HOW TO HOLD TRADE.

net in aspect. Christ is the sunshine, that fraction of the transcendent Deity which suffices the earth."

In dealing with miracles, Sir Oliver said they were no more impossible, nor more lawless than the interference of a human being would seem to a colony of ants and bees. "The region of the miraculous," concluded Sir Oliver, "has been hastily and illegitimately denied. So long as we do not imagine it to be a region denuded of a law and order of its own akin to the law and order of a psychological realm, our denial has no foundation."

THE WORLD'S WHEAT.

Summary of the International Agricultural Institute.

A new publication of the Dominion Department of Agriculture is a monthly bulletin called "The Publications of the International Agricultural Institute." It undertakes to republish or summarize the most important articles which appear in the three monthly publications of the institute, viz.: The Bulletin of Agricultural Statistics, The Bulletin of the Bureau of Economics, and Social Intelligence (agricultural organization, co-operation, etc.), and the Bulletin of Agricultural Intelligence and Plant Diseases.

The most interesting data in the Canadian Bulletin under review are those relating to the cereal crops in the southern hemisphere, viz.: Argentina, Chili, Australia and New Zealand. The total production of wheat in these four countries for the year 1910-11 is given as 269,161,000 bushels, as compared with 249,643,000 bushels for the year 1909-10. The latest figures for Argentina are 136,310,000, against 131,032,000 last year. For Australia 89,736,000 bushels, against 90,642,000 last year.

In the northern hemisphere the areas sown to winter wheat for the ten countries so far reported are 10 to 30 per cent. greater than the previous year. France is an exception, showing a reduction of 10 per cent. in the area sown to winter wheat. Great Britain shows an increase of 7 per cent.

A recapitulation of the world's wheat production for 1910, as compared with that for 1909, is presented as follows:—

Northern hemisphere—1909, 3,230,221,000 bushels; 1910, 3,239,032,000 bushels.

Southern hemisphere—1909, 247,528,000 bushels; 1910, 249,632,000 bushels.

Other countries (from the Dorsbusch Agency)—1909, 168,656,000 bushels; 1910, 163,200,000 bushels.

Total—1909, 3,636,405,000 bushels; 1910, 3,651,864,000 bushels.

WHEN ROYALTY TIPS.

A German newspaper publishes some particulars of the tips and gratuities distributed by royal personages on their travels. The Kaiser has a triff that provides with German bureaucratic thoroughness for every claim upon his generosity when travelling, and, what is more, every recipient gets what has been allotted to him. It is different in the case of Nicholas II., certainly the richest man of the old world, and most likely of the new as well. The Russian Emperor lacks the money sense entirely, like his grandfather, and the gifts of various kinds arranged for his travels are on a scale of amazing extravagance.

The Epping Forest Committee of the corporation of London, in their annual report, state that the necessary work of thinning was continued last year, each block of woodland being treated according to its needs.

A remarkable sight will be witnessed in London on Good Friday afternoon when a large procession of some 200 clergy and 3,000 laity, headed by the Bishop of London and his suffragans will march from St. Martin's-in-the-Fields to St. Paul's Cathedral.

HEALTH APOSTLES IN A VAN.

English Women on a Gypsying Crusade Against Tuberculosis.

A novel way of fighting tuberculosis has been introduced in England by the Women's Imperial Health Association. Two caravans, as they call the luxurious vans in which high-bred folks go gypsying around the country, have been sent out by this society to spread a knowledge of hygiene among the ignorant classes.

"The van was supplied with everything that sufficed for the daily needs of an ordinary mortal," says a writer in the Gentlewoman in describing one of these tours, "though everything was of course as much as possible in tabloid form. A typical day was as follows: By 6 o'clock we were breakfasting in front of the caravan, our meal consisting of bacon, eggs, tea or coffee, bread and butter and marmalade.

From 9 to 11.30 we washed up breakfast things, tidied up caravan and prepared midday meal and supper. Eleven-thirty to one was spent in shopping, business calls and for the arrangement of future meetings. Our midday meal occupied us for an hour, including clearing away and washing up.

From 2.30 to 4 we probably either held a meeting in some parish room illustrated by moving pictures and lantern slides and then distributed literature or held a reception at the caravan for people who cared to come and inspect and find out all about it. From 5 to 7 we wrote up reports of afternoon meetings and attended to our business correspondence generally.

"Supper occupied us until 8, when a large organized lecture by some special doctor was held in a public hall, the audience varying from 300 to 1,000."

SALT BATHS BANISH COLDS.

Chicago's Health Bureau also Advises Using Salt Soda.

"Salt baths" will keep you from catching cold. This is the advice given in the latest bulletin of Chicago's health bureau.

"The skin is second in importance to our lungs and kidneys in renovating our system," it states. "Hence, how needful are clean skins. Here is a bath suggestion: Instead of soap use sal. soda, or bi-carbonate of soda (baking soda). They will clean the skin quicker and better.

"When through wipe thoroughly and then dash the whole body over with a cold saturated solution of common salt, and wipe sparingly. This is one of the best skin tonics and bracers against colds. Many a cold has been thwarted and many a coddled skin girted up by this plan. Rock-ribbed, germ-proofed health is largely attained by healthy skins."

the existence of tuberculosis among the school children; 109 cities merely exclude such children from attendance at school; in 139 other cities such children are sent to appropriate institutions at the city's expense.

To all the efforts mentioned in the foregoing may be added the duty of feeding hungry children which is done in 301 cities. This is not done in Germany from charitable motives; free breakfasts or lunches are not given or taken as alms, but the whole movement is prompted by pedagogical motives, since instruction to hungry children is about as useless as it is to sick children.

It may be stated that the appointment of school physicians is to-day almost universal in Germany, and that in consequence of the work of these men as well as of school nurses new ideas have been developed and improvements have been introduced, so that the foregoing report is in some of its statements already antiquated.

FOUGHT WITH HUGE SNAKE.

Four Men Succeeded in Killing Reptile With Shovels.

Hans Brenner, of the crew of the British steamer *Amelia*, had a thrilling experience with a huge serpent which attacked him in the hold. The *Amelia* had just sailed from New York on her trip to Jamaica to load cargo for Baltimore, and on the following day orders were given the crew to clean up the hold.

There were four men in the gang, and Brenner, who was working apart from the others, suddenly uttered a startled cry, and was seen to avoid being bitten by a large tropical snake.

The serpent was just in the act of coiling and getting ready to make a second attack, when the men succeeded in putting it to death with their shovels. The dead reptile measured eight feet long.

Nellie, the ship's pet cat, had been missing for several days, and her limp body, with all the bones crushed, evidently by the snake, was found by the boss stvedore, after the vessel's cargo had been removed at New York.

OPERATES UPON HIMSELF.

Exhibition of Nerve Power the Talk of Paris.

M. Alexander Fzaicon, a 26-year-old Roumanian surgeon in Paris, France, is the talk of Paris for an act of cool heroism of a unique character.

He has been studying a new anesthetic, the action of which he calls rachistrychno-stovainisation. It leaves the patient lucid, but suppresses all sensibility, and M. Fzaicon intends to make his discovery the subject of the medical essay which he will present at his final examination, which he is to pass in a few weeks.

M. Fzaicon had been suffering from hernia, and an operation became necessary. He determined to try his new anesthetic and to test its efficacy by operating on himself.

The anesthetic was administered and the young doctor sat down at the operating table, and, after calmly performing the operation, stitched up the wound and went to bed. The operation took an hour to perform. He is now in a fair way to recovery.

sent to the town either on Victoria or Coronation Day.

A new nautical appliance has been invented by Donald Mackay, ship-builder, Alloa. It indicates the weight of cargo put on board ships.

HOW TO HOLD TRADE.

Mr. Shovelton Discloses One Secret of Success.

"Most of us," said Mr. Shovelton, "are looking out for ourselves; I think we'll all admit that. The trouble with most of us is that we don't do this intelligently; we are always thinking of ourselves and our own interests only; and that's where we slip a cog. Let me illustrate:

"I buy fruit to carry home; I've done that for—well, a good many years, and for a long time I bought around in various places. Then one day some years ago I stopped at a store where I liked the looks of the fruit and where, as I noticed a moment later, the paper bags were a little heavier than those I had been accustomed to find. The bags here cost the dealer more, maybe a quarter or a half a cent more a piece; but I liked the looks of them. They were good, stout bags that wouldn't break on the way home.

"And when this dealer had put the fruit in one of these bags he didn't simply twist the neck of it and hand it over to me so in a form inconvenient to carry. He folded the top of the bag over and rolled it down to form a handle—a grip piece; and then he tied this bundle around securely with twine, thus making it up altogether into a bundle that was secure and handy to carry.

"Of course I liked all that, and I found that he always did up his packages so or putting on sometimes a wood and wire handle; but he always made the package secure and handy for me. He had some thought for me, and I've been buying of him ever since; and if he should move I'd follow him. I would go out of my way to trade with him.

"The moral is this: Any small storekeeper, if his goods are right, can build up a trade and hold it and increase it if he has the intelligence and the human quality that prompts him faithfully to consider not himself alone but as well the wants and interests of his customers."

A CLOCK OF 1790.

An interesting specimen of a long clock, made in 1790, is owned by a gentleman at Lutterworth, says the Westminster Gazette. It has an oval face, a hand which points to the days of the week, completing the round in seven days; one which shows the true dead beat, and another which points to the chimes and quarters. On the upper part of the clock is a small orchestra, which includes a flute, a cello, and two violins, and a boy and girl in addition to three singers. The hours and the quarters are struck and every three hours a tune is played "three times over either on the bells alone, the lyricord or on both together," while the three figures beat time and the boy and girl dance to the music.

Tapeley—"You are an orphan?" Miss Somergurl—"Yes." Tapeley (much disturbed)—"Well, whose consent must I ask in order to marry you?" Miss Somergurl—"Well, you might ask mine."

BREADSTUFFS.

Toronto, March 21—Flour—Winter wheat 90 per cent. patents, \$3.25 at seaboard. Manitoba Flours—First patents, \$5.40; second patents, \$4.90, and strong bakers', \$4.70, on track, Toronto.

Manitoba Wheat—No. 1 Northern, 97½c; Bay ports; No. 2 Northern, 95c; Bay ports, and No. 3 at 92½c; Bay ports; carrying Winter storage at Goderich, 1c extra.

Ontario Wheat—No. 2 white, 81c, and No. 2 red Winter 80c outside.

Barley—Malting qualities, 62 to 64c outside, according to quality, and feed, 52 to 55c outside.

Oats—Ontario No. 2 white, 34c, on track, Toronto, and 31½ to 32c outside. No. 2 C.W. oats, 36c, Bay ports, and No. 3 at 35c, Bay ports.

Corn—No. 3 American, 51½c, Toronto freight.

Peas—Shipping peas, 79 to 80c outside.

Rye—66 to 67c outside.

Buckwheat—No. 1 at 48½ to 49c outside.

Bran—Manitobas, \$22, in bags, Toronto, and shorts, \$24, in bags, Toronto. Ontario bran, \$22 to \$22.50, in sacks, Toronto, and shorts, \$24 to \$24.50.

COUNTRY PRODUCE.

Apples—Spys, \$5 to \$5.50; Baldwins, \$4 to \$4.50; Greenings, \$4 to \$4.50; No. 2 assorted, \$3.50 to \$4.50 per barrel.

Beans—Car lots, \$1.75 to \$1.90, and small lots, \$1.90 to \$2.

Honey—Extracted, in tins, 10c to 11c per lb.; No. 1 comb, wholesale, \$2 to \$2.50 per dozen; No. 2 comb, wholesale, \$1.75 to \$2 per dozen.

Baled Hay—No. 1 at \$12 to \$13, on track, and No. 2 at \$9 to \$10.50.

Baled Straw—\$6.50 to \$7, on track, Toronto.

Potatoes—Car lots, 80 to 85c per bag.

Poultry—Wholesale prices of dressed poultry—Chickens, 15 to 16c per lb.; fowl, 11 to 13c per lb.; turkeys, 19 to 21c per lb. Live, 1 to 2c less.

37½c; No. 3 local white, 36½c; No. 4 local white, 35½c. Flour—Manitoba Spring wheat patents, firsts, \$5.60; seconds, \$5.10; Winter wheat patents, \$4.50 to \$4.75; strong bakers', \$4.90; straight rollers, \$4.25 to \$4.35; in bags, \$1.90 to \$2. Rolled oats—Per barrel, \$3.90; bag of 90 lbs., \$1.95. Feed barley—Car lots, ex-store, 49 to 50c. Corn—American, No. 3 yellow, 56 to 56½c. Millfeed—Bran, Ontario, \$22 to \$23; Manitoba, \$21 to \$23; middlings, Ontario, \$24 to \$25; shorts, Manitoba, \$23 to \$25; mouillie, \$25 to \$30. Eggs—Selected, 22c; fresh, 23 to 25c; No. 1 stock, 20c; No. 2 18c. Cheese—Westerns, 12 to 12½c; easterns, 11½ to 12c. Butter—Choicest, 26 to 27c; seconds, 24 to 25½c.

UNITED STATES MARKETS.

Buffalo, March 21—Wheat—Spring, No. 1 Northern, car loads, store, \$4.04 7-8; Winter, steady. Corn—No. 3 yellow, 50½c; No. 4 yellow, 48c, all on track, through billed. Oats—No. 3 white, 34½c. Barley—Malting, \$1.00 to \$1.06.

Minneapolis, March 21—Wheat—May, 97 5-8c; July, 98 7-8c; September, 92 3-8c; cash, No. 1 hard, 90 to 90 3-8c; No. 1 Northern, 91 1-8 to 91 7-8c; No. 2 Northern, 95 5-8 to 96 7-8c; No. 3 wheat, 93 5-8 to 96.

Bran—\$20 to \$21. Flour—First patents, \$4.65 to \$4.95; second patents, \$4.55 to \$4.85; first clears, \$3.05 to \$3.50; second clears, \$2.05 to \$2.70.

LIVE STOCK MARKETS.

Montreal, March 21.—A few choice steers sold as high as 6½c, but the bulk of the trading was done at 6c, good at 5½ to 5¾c, fairly good at 5 to 5½c, fair at 4¾c, and common at 4¼c per lb. Cows, from 3¾ to 5¼c, and bulls 3¾ to 5¼c per lb. Calves, from \$1 to \$8 each. Old sheep sold at from \$4 to \$7, and yearling lambs \$5 to \$8 each. Hogs, \$7.25 to \$7.30 per 100 lbs., weighed off cars.

Toronto, March 21.—Four fancy steers brought \$6.12½, but the great bulk of the sales in butcher cattle was between \$5.25 and \$5.75. There were no cows sold over \$4.90. Good sound lambs from 90 to 110 lbs. are quite firm at \$7, but the fat ones are not wanted. Sheep and hogs are unchanged. Calves are still dull.

CHANGES IN LICENSE BILL.

Hon. Mr. Hanna Raises the Limit
to Fifty Dollars.

ESTIMATES FOR NEXT YEAR

In 1912 Ontario Government Expects to
Spend Over \$8,000,000

The main estimates for the fiscal year ending October 31, 1912, were tabled in the Ontario Legislature on Monday evening by the Hon. Col. Matheson, Provincial Treasurer. They call for an expenditure of \$8,090,911.66, which does not include the increases in salaries and other expenditures which will be contained in the supplementary estimates to be introduced at the 1912 session. Of the amount to be spent during the next financial year, \$7,332,411.66 is for current expenditure; \$625,500 is on capital account and \$133,000 is for other purposes. Hon. Mr. Matheson explained that more than half a million dollars would be spent out of capital account for the Parliament Buildings, Government House, the new Central Prison farm and the Provincial Museum. Otherwise, the amounts have been figured out on the same basis as this year.

For current expenditure the following amounts have been placed in the estimates—civil government, \$685,784; legislation, \$284,450; administration of justice, \$730,191.66; education, \$1,836,858; public institutions maintenance, \$1,272,657; agricultural, \$647,701; colonization and immigration, \$100,200; hospitals and charities, \$373,000; maintenance and repairs of government and departmental buildings, \$131,850; public buildings repairs \$82,900; charges on Crown lands, \$610,550; refunds account, \$66,000; miscellaneous expenditure, \$510,270. From capital account \$555,300 will be spent and on public works \$70,200. Colonization and mining roads call for an expenditure of \$133,000.

ELECTION EXPENSES.

Expenses of elections for next

year are placed at \$125,000. Manhood suffrage registration will cost \$500 and the revision of the voters' lists calls for \$7,000 more. For the preparation of the voters' lists in unorganized territory the Government will spend \$14,000.

An increase from \$50,000 to \$70,000 is made in the amount to be voted for the Hydro-Electric Commission.

For new trunk roads the sum of \$60,000 will be needed next year, and \$30,000 more for the Sudbury "Soo" road. Drainage of the Rainy River roads will cost \$5,000 and new short roads, bridges and repairs the same amount. Inspection and incidental expenses will amount to \$15,000 and road-making machinery \$3,000.

For the Industrial Home, at Fort William, \$20,000 is provided. Fort Frances also gets a conditional grant of \$5,000 for a new courthouse.

Additional land will be purchased for the Ontario Agricultural College, at Guelph, at a cost of \$5,000, and \$50,000 will be spent on a new building for the Ontario Veterinary College.

The new Government House is provided for by the sum of \$200,000, while \$190,000 will be spent on the Parliament Buildings. To finish the new north wing, \$100,000 is necessary. On the west wing \$50,000 additional will be spent. Furniture and furnishings will amount to \$10,000 and the library fittings will cost \$30,000. For the new buildings at the Central Prison farm \$75,000 is provided, which may be subdivided and charged to capital and maintenance. On Osgoode Hall \$16,500 will be spent.

IT IS THE COMING COUNTRY

Mr. Thomas J. Drummond Enthusiastic As
To Future of Ontario's Clay Belt

A despatch from Montreal says: Mr. Thomas J. Drummond, President of the Lake Superior Corporation, has just returned from the plant at Sault Ste. Marie, and is full of the subject of the rapid settlement of that great domain known as the Ontario clay belt traversed by the Canadian Northern and the Grand Trunk Pacific for four hundred miles, and crossed north and south by the Algoma Central. The company have explorers out in all directions, and Mr. Drummond says that country, capable of giving homes to two million people, will be the surprise of the century, as it is really a timbered prairie, and will be settled up as quickly as the western Provinces. But he says Ontario should be astir, for the French-Can-

nadians are especially adapted for such colonization, and all know what they have done along the line of the C. P. R. Although the two other roads have the advantage of traversing this clay belt, the Canadian Pacific, with its usual energy, will tap the country in various directions from the main line as a base, and get its share of the great traffic which is sure to come out of this immense domain. The President of the Lake Superior Corporation says there are at least sixteen million acres here of the very best land in the Dominion. It is understood that by the end of the year the Lake Superior Corporation will have spent twenty millions in two years, and the development is just begun.

track, Toronto.
Potatoes—Car lots, 80 to 85c per bag.
Poultry—Wholesale prices of dressed poultry:—Chickens, 15 to 16c per lb.; fowl, 11 to 13c per lb.; turkeys, 19 to 21c per lb. Live, 1 to 2c less.

THE DAIRY MARKETS.

Butter—Dairy prints, 18 to 20c; choice rolls, 18 to 19c; inferior, 16 to 17c. Creamery, 26 to 28c per lb. for rolls, 24c for solids, and 22 to 23c for separator prints.
Eggs—Case lots of new-laid, 20 to 21c per dozen.
(Cheese—12½c, and twins, 13½c.

HOG PRODUCTS.

Bacon—Long clear, 11½c per lb., in case lots; mess pork, \$20 to \$21; do., short cut, \$24 to \$24.50; pickled rolls, \$20 to \$21.
Hams—Light to medium, 16c; do., heavy, 12 to 13c; rolls, 12½c; breakfast bacon, 16c; backs, 18 to 19½c.
Lard—Tierces, 12c; tubs, 12½c; pails, 12½c.

BUSINESS AT MONTREAL.

Montreal, March 21.—Oats—Canadian Western, No. 2, 38¼ to 38½c, car lots, ex-store; extra No. 1 feed, 37¼ to 38c; No. 3 C.W., 37¼ to 37½c; No. 2 local white,

quite firm at \$7, but the fat ones are not wanted. Sheep and hogs are unchanged. Calves are still dull.

CHANGES IN LICENSE BILL.

Hon. Mr. Hanna Raises the Limit to Fifty Dollars.

A despatch from Toronto says: Several modifications in the bill introduced in the Legislature by Hon. Mr. Hanna, Provincial Secretary, to amend the liquor license act, were proposed by the Minister at Monday night's session. One change is that the sum over which the five per cent. of gross receipts of tavern licenseholders shall be taken by the Government is raised from \$40 a day to \$50 a day. Other provisions are:—Votes on local option are restricted to residents; license reduction is put in the hands of the electors, and once voted on cannot be submitted again for three years; a by-law cannot be quashed on the ground of creating a monopoly.

President Taft depreciates talk of war with Mexico.
The C. P. R. is negotiating for an entrance to Startford.
The Danish Government approve of international peace commission.

directions, and Mr. Drummond says that country, capable of giving homes to two million people, will be the surprise of the century, as it is really a timbered prairie, and will be settled up as quickly as the western Provinces. But he says Ontario should be astir, for the French-Can-

BRITISH AERIAL PLANS.

Sum of \$665,000 Provided in Estimates for Aerial Fleet.

A despatch from London says: War in air was discussed in the Commons on Tuesday night. Mr. Haldane, the War Secretary, gave details of the preparations of the British army to fight with dirigibles and aeroplanes. He said that \$665,000 would be spent for airships and aeroplanes, and a further sum would be expended by the Technical Research Committee. The War Office has acquired five aeroplanes, three of the latest pattern, and five biplanes, purchased from Sir George White of Bristol, to be delivered in April. The War Office will make use of other biplanes, supplied by the same firm, for experimental purposes. An observation war balloon factory has been completely organized, and Lord Kitchener will be placed at the head of a special committee to get fit men for the Royal Engineers, who can direct and conduct aerial warfare.

\$1,500 FOR A WINDOW.

Prices for Seats to View Coronation Procession Increasing.

A despatch from London, England, says: Enquiries along the route of the Coronation procession on June 22 from a Buckingham Palace to Westminster show that the prices of windows commanding a view are increasing instead of decreasing, as had been expected. An agent on Friday stated that \$1,500 was asked in Whitehall for a window holding from six to ten persons. Westminster Hospital, which overlooks the west part of the Abbey and will afford a splendid view of the arrival and departure of the King and Queen and their suite, is arranging to erect a stand, and will charge from \$25 to \$100 for a seat.

These prices will include breakfast and luncheon.

LOST HIS REASON.

Joseph Laporte Smashed Furniture in Lawyer's Office.

A despatch from Montreal says: Suddenly losing his reason, it is thought, Mr. Joseph Laporte, a well-known contractor, ran amuck in the office of Emard & Emard, lawyers, in the Liverpool, London & Globe building on Monday, smashing several plate glass windows and breaking up practically everything that was movable about the office. It required six policemen to subdue him and carry him out. He was taken to the Central Station and a doctor was at once summoned to attend him. Both his forearms, his face and his hands were badly cut and his clothes were in ribbons.

RECORD IN GUN PRACTICE.

75 Per Cent. Hits Made with 12-inch Gun at Five Miles.

A despatch from London says: The battleship Neptune has returned to home waters from her gun practice cruise in the Mediterranean. While no official report has been made as to the results it is reliably stated that the big gun trials established a record of 75 per cent. of hits. This was made with 12-inch guns at a range of five miles.

F. Lottinville of Fort William was killed by the fall of an anchor, caused by the breaking of a chain. Joseph Phillips of the York Loan has been released from Kingston Penitentiary.

Shiloh's Cure
quickly stops coughs, cures colds, heals the throat and lungs. 25 cents.

PERPETUAL PEACE ASSURED

Treaty Now Being Arranged Between Great Britain and the United States

A despatch from Washington says: The negotiation of a new arbitration treaty between the United States and Great Britain will probably be taken up shortly by Secretary of State Knox and James Bryce, the British Ambassador. For some months President Taft and Secretary Knox have been anxious to begin negotiations for a new treaty to include every dispute between the two Governments. Drafting of this treaty will be an important step toward perpetual peace between the United States and Great Britain. The present treaty excepts questions relating to the national honor, the "vital interest" and the rights of third countries. President Taft and Secretary Knox believe the Senate would ratify a

treaty for the arbitration of all disputes between the two countries. In recent speeches the President has referred to this subject and expressed the hope that such an arrangement would be consummated.

The actual negotiations for the convention have been delayed until information could be obtained of the attitude of Great Britain on the question. The speech of Sir Edward Grey, Minister of Foreign Affairs, in the House of Commons on Monday night, in which he said the British Government would welcome such a proposal, has, in the opinion of officers of the State Department, cleared the way for a convention along the lines indicated.

THE NEWS IN A PARAGRAPH

HAPPENINGS FROM ALL OVER THE GLOBE IN A NUTSHELL.

Canada, the Empire and the World in General Before Your Eyes.

CANADA.

A St. Catharines woman was burned to death in her home on Thursday.

Immigration officers say there are two jobs for every man coming to Canada.

The plant of the British Columbia Steel Corporation will be located at Port Mann.

New homesteads to the number of 25,000 have been opened to settlers in the west.

Mr. John Robbins, a farmer of Moore township, was killed by a bull on Friday.

The Dominion Government has been asked for a subsidy for a ship-building plant at Port Mann.

A lot of contraband whiskey stored in the jail building at Cochrane was stolen.

Several cars of beef have been sent from Toronto to Winnipeg to meet the local demand.

Mrs. Ann McMillan, an aged Chatham lady, set fire to her apron and was fatally burned on Monday.

Gaston Monroisin is wanted by the Winnipeg police for shooting N. Giovanni during a quarrel in a Winnipeg hotel. Giovanni is dead.

Intercolonial Railway employees and motormen and conductors on the Winnipeg Street Railway have been granted increases in pay.

The storage dams already constructed or in progress on the Ottawa River will control one hundred and sixty-eight billion cubic feet of water.

Alva James, a Kingston traveller, was struck by a train on Friday and carried along for some distance by his overcoat, which caught in the cowcatcher.

Messrs. W. S. Buell of Brockville and Isaac Pitblado of Winnipeg have been appointed to hold an inquiry into telegraph rates. The commission will sit at Toronto on April 24.

A Montreal man served with legal notices in French, which he could not read, ignored them, and judgment was given against him by default. He applied for redress, but was refused.

In discussing in the Senate the bill to prevent the use of opium and other injurious drugs Sir Richard Scott said that Canada imported enough opium to supply the legitimate needs of 50,000,000 people.

Canadian banks increased their commercial loans in Canada by \$6,728,000 during February, and the increase in note circulation reflected a firm commercial position. Foreign commercial loans were reduced.

GREAT BRITAIN.

Mr. Lloyd-George is seriously alarmed over his throat complaint. A prize of \$50,000 is offered for an aeroplane flight around England.

President Taft's arbitration proposals were eulogized from practically every pulpit in Britain on

ROYAL

YEAST CAKES

MOST PERFECT MADE

We know and users of Royal Yeast Cakes know that these are the best goods of the kind in the World. Bread made with Royal Yeast will keep moist and fresh longer than that made with any other. Do not experiment—there is no other "just as good."

E. W. GILLET CO. LTD. Toronto, Ont.
Winnipeg Awarded highest honors at all Expositions. Montreal

MADE IN CANADA

COMPLETION OF THE C.N.R.

Mr. Hanna Puts the Date in the Fall of 1914.

A despatch from Montreal says: Mr. D. B. Hanna, Third Vice-President of the Canadian Northern Railway, on Friday stated that the company now look for the opening of the railway from ocean to ocean during the fall of 1914. The five hundred miles through the Ontario clay belt would be completed either in two or two and a half years. Within a few years six daily trains will be leaving this city for different points on the Pacific coast. Two will be run by the Canadian Pacific Railway, two more by the Canadian Northern, and two by the Grand Trunk Pacific. "Why, then," asks Mr. Hanna, "if a new country can support six daily trains running across the continent, cannot we support a daily steamship service from British ports to the Dominion?" He believes that if Britain can send almost a steamer daily to an alien country, the day is not far distant when we will see the same to Canadian ports.

SEVERE SENTENCES.

Wife-Beater and Child-Molester Both to be Whipped.

A despatch from Winnipeg says: Judge Richards put his foot down on Monday morning on the lawless tendencies which have developed among a certain class of foreigners in the city. Four of the prisoners convicted at the Assizes came before him for sentence. Wm. Moon, for assaulting a child, received fifteen years in the penitentiary and thirty lashes. Paul Kocher, for beating his wife, was sentenced to the limit of two years, and will receive in addition fifty lashes. Michael Heryczyn, for manslaughter, must serve three years. Nicholas Lueska will serve six months for throwing a bottle at a street car.

SERIOUS STRIKE EXPECTED.

Action of Sailors' Unions is Anxiously Awaited.

A despatch from Antwerp, Belgium, says: The impression deepens among continental ship-owners that with attempts by the International Seamen's Union to bring about a universal strike a serious strike at English ports may be expected. This eventually is dreaded on the continent, where it is believed

LABRADOR FOLK STARVING

Have Been Cut Off From Supplies by Great Ice Fields For Months

A despatch from North Sydney, C. B., says: That the rigorous winter just closing has caused extreme suffering and probably many deaths among the hardy inhabitants of the barren Labrador peninsula, who have been cut off for months by great ice fields from the possibility of securing food and clothing, is the fear felt here and in Newfoundland. The last reports from the bleak country to the north, which were received late last fall, said that the food supplies were almost exhausted and that hundreds of the natives, mainly fisherfolk and their families, were on the verge of starvation. Months have passed since the stricken Labrador people have secured help, nor has word come to the outside world as to how they are faring in their extremity.

Repeated efforts have been made to carry succor to the starving people. Vessels laden with supplies of food and of clothing have failed repeatedly to pierce ice floes which choke the strait of Belle Isle, the narrow stretch of water which separates Labrador from the northern coast of Newfoundland.

The present misfortunes of the Labrador people have their beginning in the failure of last season's fishing catch. A blizzard which swept over Newfoundland and Labrador last week is believed to have further accentuated the suffering. A blanket of snow reached in some places a depth of from 20 to 30 feet deep. It is said that a large band of trappers who were operating in an interior section of Newfoundland are missing.

STRIKE EXPECTED IN WEST

Miners' Agreement Confirmed Two Years Ago Expires April 1

A despatch from Winnipeg says: The C. P. R. headquarters has given out the following:—A big strike of coal miners is expected in the Crow's Nest district and all through the west. Two years ago they had a strike in Crow's Nest Pass involving all the coal miners there. It was settled through the medium of a Board of Conciliation, and the agreement expires April 1. Negotiations are now under way but it is not expected that a settlement will be reached before April and it is likely that on that date work will be suspended in the coal mines in the Crow's Nest and the Cammore districts. The mines affected have a daily output of approximately 15,000 tons of coal and coke. The number of men affected is three thousand. The points of dispute are wages and the recognition of the open shop.

THIRTY FIREMEN OVERCOME.

Unconscious From Fumes of Ammonia at a Chicago Fire.

A despatch from Chicago says: Thirty firemen were overcome by the fumes of ammonia on Sunday while fighting a fire which destroyed a warehouse of the Monarch Refrigerating Company and caused an \$800,000 loss. Thrilling rescues

GOVERNMENT BONDS AT \$50.

Would Be a Secure Investment for Small Investors.

A despatch from Ottawa says: In the Senate on Thursday Senator Domville drew attention to a report that the British Government was about to popularize consols by issuing bearer bonds of from five to ten pounds sterling, which could be

GREAT BRITAIN.

Mr. Lloyd-George is seriously alarmed over his throat complaint. A prize of \$50,000 is offered for an aeroplane flight around England.

President Taft's arbitration proposals were eulogized from practically every pulpit in Britain on Sunday.

The proposal of President Taft for an Anglo-American arbitration treaty has been received with great enthusiasm in Britain.

UNITED STATES.

At Albany Mrs. Edith Melber was sentenced to 20 years' imprisonment for killing her son.

GENERAL.

China has concluded a loan for \$50,000,000.

War preparations are going on in the far east.

The Italian Cabinet has resigned. It has been scratched the great continent.

A conference to settle the Maximilian revolt will be held in Cuba next month.

TRAIN CRASHED INTO CAR.

Two Persons Killed and Four Injured at Buffalo.

A despatch from Buffalo says: Two persons were killed and four were injured on Sunday afternoon when a Lackawanna passenger train, running at high speed, crashed into a street car at a grade crossing on Clinton street. The dead:—Mrs. John McCormick, 35 years old; Robert W. Hoch, motorman, 30 years old. The injured:—John Fay, vaudeville actor, three ribs broken, leg broken, internal injuries broken, may die; Frederick Gottman, motorman, almost completely scalped, arm broken; Thomas Uhl, conductor, slight bruises; unknown man who was hurried away in an automobile before the police could learn his name.

POPULATION NEARLY 15,000.

Gains of \$566,795 in the Net Assessment of Guelph.

A despatch from Guelph says: The population of Guelph has almost reached the 15,000 mark, although it will fall a trifle short of that figure. The total population last year was 14,700. The City Clerk has finished the work of totalling up the assessment rolls, and finds that the gross assessment amounts to \$8,922,836.40. After deducting all the exempted property of the city, including the churches, city property and public utilities, the net assessment amounts to \$6,972,236.40. This is a gain over the net assessment of last year of \$566,795.40, considerably over \$500,000.

JUDGE DEACON DEAD.

Was Thirty Years Senior Member of Renfrew Bench.

A despatch from Pembroke says: Thos. Deacon, for 30 years senior judge of Renfrew County, died on Sunday. He was 80 years of age.

Shiloh's Cure
quickly stops coughs, cures colds, heals the throat and lungs.

A despatch from Antwerp, Belgium, says: The impression deepens among continental ship-owners that with attempts by the International Seamen's Union to bring about a universal strike a serious strike at English ports may be expected. This eventually is dreaded on the continent, where it is believed it would cause a condition of chaos in the world's shipping trade. It is admitted that there are not enough sailors available to take the places of union men if the latter should go out. The action of the English unions is anxiously awaited.

MINE SOLD FOR \$250,000.

One of the Largest Transactions in History of Nova Scotia.

A despatch from Halifax, N. S., says: Controlling interest in the richest tungsten mine in the world, located at Scheelite, near Moose River, Guysboro County, has been sold by A. A. Hayward to a syndicate composed of prominent Canadians. The price for the interest is about a quarter of a million dollars, and outside of the coal mines is the biggest mining transfer ever made in Nova Scotia. Hayward retains an interest, which is under option to a syndicate, and under second option to a French syndicate.

GROCER DIES OF EXPOSURE.

Montreal Man Left His Home Unknown to Friends.

A despatch from Montreal says: Wandering from home, clad in little more than his night clothes, James Brown, of 3,090 Alice avenue, died from exposure early on Thursday morning. Mr. Brown was a retired grocer, aged 75. The body was found on the side of the road near Crystal Park, a mile from his house. Several shirts, undergarments, and two pairs of socks were all the protection that he had from the cold and frost of the night.

A CORRECTION.

Error in Reporting Standard Bank Statement.

In reviewing the annual statement of the Standard Bank in this paper a few weeks ago, two typographical errors occurred. Statement was made that \$25,000 was written off "premiums." This should have been "premises." Deposits were given as \$20,413,503 instead of \$26,413,503.

GROWING TOBACCO.

Farmers in Prince Edward County Meeting with Success.

A despatch from Trenton says: Tobacco-growing is becoming one of the industries of Prince Edward county. The past year a West Lake farmer grew an acre and a half of tobacco and realized \$490. Another farmer had one acre, for which he received \$260, while two others had crops which realized for them \$225 each. It is stated that the soil in most parts of Prince Edward is particularly well adapted for growing tobacco, and that the quality grown was excellent. An effort is being made to interest more farmers in the culture of this article of commerce.

Unconscious From Fumes of Ammonia at a Chicago Fire.

A despatch from Chicago says: Thirty firemen were overcome by the fumes of ammonia on Sunday while fighting a fire which destroyed a warehouse of the Monarch Refrigerating Company and caused an \$800,000 loss. Thrilling rescues were made in carrying the unconscious firemen from the burning structure. Five explosions of ammonia filled the building with fumes and made the work of fighting the flames dangerous. The structure was heavily stocked with poultry, meats and butter.

EXPLORER KILLED.

Tragedy on Site of Ancient African City of Cyrene.

A despatch from Rome says: An American named Decon, who was a member of an archaeological expedition to the site of the ancient City of Cyrene in Africa, was shot and killed last Saturday by an Arab workman. After the shooting the murderer fled and has not been apprehended. It is supposed that the killing was done out of revenge. The murder occurred at Telenew, where a Turkish judge has instituted an enquiry.

COMING IN BROVES.

All Steerage Berths on Vessels Bound to Canada Booked.

A despatch from London says: The Canadian immigration officers at the headquarters in London estimate that the emigration to Canada from the United Kingdom so far this year is 59 per cent. more than in the corresponding period of 1910. All the steerage berths on vessels bound to Canada are booked up to the middle of May.

ARRESTED BY GOVERNMENT.

Sale of Battleship Plans by Four Germans and Englishman.

A despatch from Hamburg, Germany, says: A local paper announces that four Germans and an Englishman have been arrested charged with having transmitted plans and specifications for German warships under construction to Great Britain.

Would Be a Secure Investment for Small Investors.

A despatch from Ottawa says: In the Senate on Thursday Senator Domville drew attention to a report that the British Government was about to popularize consols by issuing bearer bonds of from five to ten pounds sterling, which could be purchased at post-offices. He said that the Canadian Government should do something of this kind. He suggested that the Government should issue transferable three and a half per cent. bonds for fifty dollars face value, which anyone could purchase from any Canadian post-office, and which could pass from hand to hand. Sir Richard Cartwright said there was no doubt it would place secure investment within the power of small investors. He would call the attention of the Minister of Finance to the suggestion.

RAILWAY DEVELOPMENT.

Important Announcements Made by Winnipeg Officials.

A despatch from Winnipeg says: The assumption that the present year will show a remarkable railway development in western Canada is established by a number of important announcements by various transportation companies during the past fortnight. These were supplemented on Thursday by the statement that the Grand Trunk Pacific will build 140 new stations, and that the Canadian Pacific will open fifty new towns on its new lines this summer.

EXPLOSION IN THE CELLAR.

Damage to Hardware Store at Barrie of \$17,000.

A despatch from Barrie, Ont., says: An explosion in the cellar of J. R. Hamby's hardware store at three o'clock of Thursday afternoon was responsible for a \$17,000 fire on Thursday. V. Hamby, nephew of the proprietor, was very badly burned about the head in the explosion. The loss to stock is estimated at \$16,000, on which there is \$9,000 insurance. Damage to the building amounted to about \$2,500 and is fully covered by insurance.

DIAMONDS FOUND IN CANADA

Mr. Chas. Camsell Discovered Them in British Columbia Rock

A despatch from Ottawa says: The Director of the Geological Survey announces that diamonds have been discovered by the survey in a British Columbia rock, the first recorded discovery of diamonds in Canada. The rock carrying the crystals is a peridotite of the variety known as dunite, consisting of olivine and chromite. The rock specimens in which the diamonds were found were collected by Mr. Chas. Camsell on Olivine Mountain, near the Tulameen River, where Mr. Camsell has been making a geological examination for the survey. Samples of the rock were submitted to Mr. R. A. A. Johnstone, mineralogist of the survey, to ascertain the nature of the minerals. In the course of his examination Mr. Johnstone recovered some uncolored fragments of crystals, which appeared to be diamonds. More of this material was separated and a series of tests conducted by Mr. Johnstone, which established beyond doubt the nature of the material. The individuals so far extracted from a number of samples are small, none of them being larger than an ordinary pin-head, but many appear under the microscope to be clear and bright, and of good quality, though some are yellowish or brownish.

Napanee Ladies' Musical Club.

The eighth regular meeting of the Napanee Ladies' Musical Club will be held in the town hall next Wednesday evening, the 29th inst., at 8 o'clock. A very attractive programme has been arranged for this meeting, including the names of such well-known artists as Mr. Francis Fischer Powers, of New York city, and Messrs. Harold Mallory and Harold Albery, of Brockville. Non-members admission 25 cents.

Pianos.

The place to select your piano is from VanLoven Bros. stock at Paul's music store, Napanee. We have several makes, including the celebrated Gerhard Heintzman and Newcombe. You can see the different styles, hear the different tones, and take your choice. We trade for anything, we want twenty horses on deal and give very easy terms of payment. We also sell Organs sewing machines, separators, and the celebrated Fairbanks and Harris Gasoline engines. We have two large farms sale. Will be at Mr. Paul's store Saturdays.

VANLOVEN BROS.,
Moscow and Yarker.

Books! Books!

Just a line to remind my customers, that I am still representing the Upper Canada Tract Society, in Mr. Chas. Stevens' old stand, west of the market, on Centre street. I have a lot of excellent literature, Bibles, Hymn Books, etc., and at reduced prices. Give him a call.

JAS. GORDON.

Change of Date.

The eighth regular meeting of the Napanee Ladies Musical Club, which was to have been held on Thursday evening, March 30th, will be held instead on Wednesday evening, March 29th, at 8 o'clock, the date having been changed unavoidably. Non-residents admission 25 cents.

Reciprocity

Means "equal benefits to be mutually yielded or enjoyed." For instance, if you buy your wall paper at Paul's you are benefitted by having the best paper in the market and he is benefitted by making the sale to you. This being a "mutual benefit" is Reciprocity. Try it.

Opera House Saturday Evening.

The press throughout the province have nothing but words of praise for the Royal Welsh Ladies' Choir which will play a return engagement at the Brisco opera house on Saturday evening. Yet it is hardly necessary to mention this to the people of Napanee for they have not yet forgotten the exceedingly pleasant programme which this talented company presented at their appearance here a few weeks ago, and this notice is simply a reminder of the date, in order that their admirers may not miss perhaps the last chance of hearing this superb choir.

W. L. Storms has purchased two fine Holstein cows for which he paid a fancy price.

Mrs. D. Babcock is spending a few weeks with her daughter, Mrs. James Webb, of Mount Chesney.

B. Davy, of Kingston Business College, is spending a few days at home.

Mrs. H. Walker is very ill with bronchitis.

THE QUEEN'S MARIES.

On the occasion of the coronation of the Queen it is proposed that the Maries of Canada shall unite with their name-sakes throughout our British Empire in offering a gift to Her Majesty.

The Imperial Order of the Daughters of the Empire have been asked to collect for the gift in Ontario. Contributions will be received from five cents to five dollars, and may be given only by those who bear the name Mary, May, Maria, Marian, or Marie. A list of contributors will be forwarded but not the amount given by each.

The choice of the gift will be left entirely to the Queen. It is hoped that the Maries of Canada will appreciate the opportunity of showing their affectionate loyalty to Queen Mary.

The list must be closed by April 20th. As the time is so short it would greatly help the committee if all who are interested will send in contributions with name in full, as early as possible to Mrs. J. H. Madden, Napanee or to Miss Plummer, Sylvan Tower, Toronto.

Committee—Lady Meredith, Lady Falconbridge, Lady Walker, Mrs. Edmund Bristol, Mrs. Anden, Mrs. Geary, Mrs. James George, Mrs. F. B. Fetherstonhaugh, Mrs. Harold Beckford, Mrs. R. C. H. Cassels, Miss Mary Estelle Nordheimer.

Miss Plummer—Secretary-Treasurer.
Mrs. Albert Gooderham—Convenor.

ONTARIO AGRICULTURAL COLLEGE.

To School Teachers and Trustees of Ont.

The attention of teachers and trustees who may be desirous of introducing some measure of agricultural teaching into the work of their school surroundings by planting trees, shrubs or vines, is called to the work of the schools' division of the experimental union, one of viz: The Ontario Agricultural College.

This organization was started two years ago for the purpose of bringing the school of the Province into closer connection with the college. The work is now past the experimental stage. In 1909 there were 117 school co-operating in the work and last year 237 schools. It is expected that this year there will be much larger number of schools taking up the work. Interest in industrial or vocational education is growing, and with our Government taking legislative steps to support this line of work, it should not be long before practically every school in Ontario has modified its work in the direction of giving the boys and girls some practical instruction in those things that concern every-day life. The instruction of Agriculture into the curriculum of the Public School has been tried several times. The plans offered by the schools' Division may be found to help in the solution of this problem.

For this year the schools' division is arranging to send out seed packets for children's gardening, seed grain for small experimental plots, shrubs, vines and tulip bulbs for school ground improvement; tree seeds and agricultural seeds are also included in its distribution. To schools undertaking to frame it and give it a place on the walls, a picture of the Agricultural college is sent free also. For some of these things no charge is made, provided the material is used strictly for educational purposes; for most of the material, however, a charge is made as it is not possible, nor considered advisable, to undertake free distribution of valuable material.

In all phases of the work teachers and pupils are provided with instruction sheets, booklets or charts; they are not left alone in the work, but have the experience and co-operation of others who are doing the same kind of work elsewhere.

Any teachers or trustees interested in the work may secure information regarding it by addressing as below.

Death of W. A. Bellhouse

After an illness of nearly two years, of an incurable disease, Mr. W. A. Bellhouse, passed away on Thursday night at midnight. Mr. Bellhouse had been for a number of years manager of the branch of the merchants' bank here and a gentleman respected and well liked by all who knew him. He was in the prime of life, being but fifty-six years of age. Mr. Bellhouse leaves a widow and two daughters to mourn the early death of a loved husband and father. Deceased was Vice-President of golf club, and honorary president of the curling club, two forms of sport of which he was very fond. The funeral was held on Saturday in the Presbyterian church, services being conducted by Rev. J. R. Conn, former pastor of the church, and the remains taken to Hamilton for interment.

98 cents.

ROYAL SHOE STORE.

Royal Welsh Choir.

The return visit of the Royal Welsh Ladies' Choir is being eagerly looked forward to by the music loving citizens of Napanee. At their recent appearance here they were greeted with a bumper house, which will undoubtedly be repeated at their coming appearance on Saturday evening, March 25th. The Montreal Daily Herald has the following to say concerning this fine choir: "This Choir is unique, as far as Canadian audiences are concerned, at least. It consists of but twenty voices, but every voice is a voice of fine quality—every voice is a voice of natural beauty; and not one has been spoiled by bad training. Natural production, natural singing—nothing artificial, nothing that of necessity detracts from the volume, the purity or the quality of the organ. The result is that these twenty singers not only sing in a manner that stamps them all as finished artists, but with an astounding volume, a clarity of enunciation, and a perfection of intonation wholly unusual, and with phrasing that is a lesson to any student of song." The plan opens Thursday morning, March 23rd, at the Opera House, at 9 a. m. The prices are 25c and 50c.

Wash Up.

The new roller bearing Acme Washing Machine does it so easy. We have a score of other makes of machines, full line clothes baskets and hampers at

BOYLE & SON'S.

King as a Fire Fighter.

The idea of a real live king acting as a fire chief is rather novel. Such was the case recently in Saxony when King Frederick rushed about directing the firemen, who were endeavoring to quell the flames that ravished a portion of the palace. Princess Matilda, a sister of the king, gave a bridge party in her apartments and while the noble players were in the midst of their game the wires on a Christmas tree still standing in the apartments short-circuited and in a second the room was a mass of flames. The party scattered in confusion, but King Frederick rushed upon the scene and took an active part in extinguishing the blaze. When the fire apparatus arrived he took the firemen in hand and directed them with all the ability of an expert and experienced fire chief.

Bargains in Marble.
